See what matters most first with the focus of the mailbox that keeps important messages on top. Switch between email and calendar to schedule your next meeting or share your availability in just a few taps. Or take a document from a list of files and attach it to your email seamlessly. With all you need to just tap away, managing busy days is now easier than ever. Outlook for Android works with Microsoft Exchange, Office 365, Outlook.com, Gmail and Yahoo Mail. Features: Seamless control of a mailbox with a focused mailbox that displays the most important messages first, swipe gestures and smart filters. Easy access to your calendar and files directly from your inbox. On-the-go features such as Word, Excel, and PowerPoint integration. What's new: Do you see what I see? We have new icons in the app designed for the modern mobile experience and exclusively for Microsoft. Want the whole picture? You can now instantly add your Evites apps and other events to the Outlook calendar with built-in iCS attachment support. Don't let the email work steal your nights. We've improved our Do Not Disturb feature with the new evening option and the ability to set up days and hours to meet your needs. You don't need dim light to love dark mode. All under Preferences. This function slowly rolls out. Another week is filled with app improvements and bug fixes. We'll be back soon with new features. The official Microsoft Outlook.com app gives you the best mobile experience for your account Outlook.com system. Sign up for your existing Microsoft account, which is usually your email and password Outlook.com. With the Outlook.com app, you can:- Get emails right away with push notifications - Sync Outlook.com Calendar and contacts with the device-View and sync folders and sub-folders- Choose from 8 different color topics to personalize your experience.- Group your email conversations with Conversation Threading- Use the search server for easy search through the entire email history. - Sync multiple accounts Outlook.com and send emails from aliases Tips and Tricks-Change the color theme in the app settings menu by selecting a generic and then color theme.- Filter your email (all unread or by) by selecting your inbox in the top menu. - Switch accounts or access folders and sub-folders by selecting in the top left menu. - Choose which folders automatically sync from the app settings menu, selecting synchronization, folders, and then folders that you want to sync.
