FieldMove Clino is a geological oil experts field mapping program designed for forward-thinking geologists using digital data collection. ----- \* Use GPS devices and smartphones as navigation aids. \* Global positioning system (GPS) devices are commonly used to help with navigation, having grown in popularity over the past decade. Over the past few years, this has extended to smartphones and digital compasses, often equipped with GPS capabilities. GPS is an invaluable help for navigation during field work, although maintaining safety on the front line is important, and we draw your attention to the advice given by a number of mountaineering councils: Each one heading to the hills must learn how to read a map, and be able to effectively navigate with paper map and traditional magnetic compass, especially in poor visibility. Oil experts will accept no liability or loss, arising from the use or misuse of this product. Apk Mirror 1: : Download Site Visit APK Site External Download Site
