(No rating yet) Write a Review Royal Purple 0W-20 high performance synthetic motor oil with an API-enabled heavy duty SAE engine oil. Our oil combines premium base oils with patented additive technology to create high-performance engine oil. As a result, it optimizes engine performance and provides excellent protection. Royal Purple is one of the few commonly available premium synthetic engine oils that has the inherent benefits listed above, but Royal Purple synthetic oils go beyond that. With advanced, patented Synerlec® additive technology, Royal Purple synthetic oils outperform all other lubricant, including additional premium synthetic oils. Engines run cooler Royal Purple, and so do the fittings and other moving parts lubricated with our extensive line of automotive, marine and other different lubricants. Performance benefits Improved WEAR PROTECTION Improved additive technology prevents metal-to-metal contact in addition to both GM dexos1™* and ILSAC GF-5 specifications, increasing fuel efficiency The low frictional efficiencies result in optimal fuel efficiency (the 5W-30 fuel consumption meets the fuel consumption requirements of 5W-20 oil) Better protection of vehicle exhaust emissions equipment for wear additive chemistry minimizes the adverse effects exhaust gases pose on catalysts with better compatibility with fuels patented additive technology prevents white sludge and lubrication starvation, that may occur in higher concentrations of gasoline ethanol mixtures SUPERIOR corrosion protection No rust observable standard industrial test Royal Purple 0W-20 Benefits No special procedures are required, if upgrading royal purple. Royal Purple motor oil is fully compatible with mineral or other synthetic oils. Royal Purple recommends waiting until the manufacturer first planned an oil change for new petrol engines before upgrading to Royal Purple. Royal Purple's API-licensed engine oil provides excellent protection and improves the performance of petrol and diesel engines. Royal Purple API's SN-licensed engine oil meets the performance requirements of ILSAC GF-5 and Dexos1 1. With unprecedented oxidation stability, there will be longer oil drainage and fewer oil changes, saving time, money and reducing the impact on the environment. Above all, the Royal Purple 0W-20 increases horsepower and torque, saves fuel and reduces heat, wear and emissions. © 1996-2015, Amazon.com, Inc. or subsidiaries of New API License SP/ILSAC GF-6 What are GF-6 ENGINE OILS? increasing valve assembly wear protection* increased resistance to oil oxidation* * to GM 2 dexos1 gen 2 specifications & PROTECTION Specifically designed to maximize performance and meet the requirements of high-performance and modified engines. item We aim to show you accurate product information. Manufacturers, suppliers and others provide what you see here, and we haven't checked. Royal Purple Motor Oil combines premium base oils with proprietary additive technologies to create high-performance engine oils that optimize engine performance and provide superior protection. No special procedures are required to upgrade to Royal Purple. Royal Purple motor oil is fully compatible with mineral or other synthetic oils. Royal Purple recommends waiting until the manufacturer first planned an oil change for new petrol engines before upgrading to Royal Purple. Royal Purple's API licensed engine oil delivers excellent protection and improves performance of gasoline and diesel engines. Royal Purple API SN licensed engine oil meets the performance requirements of ILSAC GF-5 and Dexos1 1. Improved wear protection Increased fuel efficiency The expensive catalytic emission system provides better protection of ethanol containing fuels Excellent corrosion protection BrandRoyal PurpleAssembled product weight10 lbsMotor oil ViscosityOW - 20Manufacturer part number5102 0 Model51020ManufacturerCalumet Specialty Products Partners L.P.Assembled product sizes (L x W x H)7.12 x 4.70 x 12.50 InchesWell I will tell my story. Before you use mobile one you will have a problem because every time after 3000 miles of oil is becoming black. I don't want to drive in New York for an elevator and An Uber, so I've done 200 miles every day for the locals. Then someone told me to switch to Pennzoil ultra platinum. Guess what happened every 6-800 miles you have added almost 1 liter. I thought there was something wrong with my car, and then I'm going to change the PCV valve, but all the results are eating a bunch of oil. Five cords change and then the fourth cable added 5,000 miles Recently someone told me to listen to me switch to royal purple and then let me know words that knew result. Ahaaa guess what. Every 5,000 miles doesn't need to add anything, and my AMG is that it's almost 2 miles more gasoline. If you don't believe me it's ok! But that's the true story. Do not waste your time with another oil just to switch to royal purple, you will see resultsUseful? At one point I wasn't a big fan of 100% synthetic oil, but that changed forever after trying Royal Purple. There is no oil that compares to him that I tried and I tried many. Getting a simple 10,000 miles between oil changes makes using this brand well worth the extra cost and keeps the 2010 Honda CR-V running as new. Useful? Royal Purple has always done well in my car. And Walmart has the best deals on this product. Useful? Oil changes between 9,000 and 14,000 miles (from driving conditions). This oil was the only think tank in the last 110,000 miles! Useful? A A Purple you can make is synthetic because of the color, you can not determine if other oils are synthetic or not. Royal Purple also increases gas mileage. Useful? Customer &Amp;Q: AGet has specific details about this product for customers who own it. HOW MANY MILES CAN YOU GO WITH THIS OIL? by BOBOctober 10, 20143 Answers1. I drove over 6,000 and it was still ok. I won't#39 recommend it exceeds the manufacturer's ' though. Helpful?2. Regular maintenance of the vehicle and the use of a good oil filter such as WIX or Bosch will take an easy 10,000 miles between the oil change. Even my oil looks pretty new and doesn't have a burnt smell to it. That said, I don't drive the extremes of speed or off-road, although if I' m sieténéI not #39, I do not mind punching it a little. Useful?3. It depends on the driving conditions. I change between 9,000 and 14,000 but I'm managing this computer which tells me when #39, time. Usually you need to last 3x traditional. Useful?3 AnswersA 0 20w good one Harley chrisMay 4, 20180 AnswersWalmart Protection Plans Most items come with limited manufacturer warranty. Adding a Walmart protection plan from the date of purchase provides additional protection. Walmart's defense plans cover the entire repair cost, or replacement, of the products, as well as shipping costs to cover the replacement. Walmart Protection Plan options and prices can be found on the product page as well as in your cart. Go towww.walmart.com/protectionto all coverage for each product. You can view the Walmart protection plan after purchasing the Walmart Protection Plan Hub.Product warranty:Warranty Information: 1 year simple replacement warranty directly from thorough AutoPartsWAY. An additional manufacturer's warranty is available directly from the manufacturer. Have you already purchased the product? The Walmart protection plan can be added within 30 days of purchase. Click here to add the plan. webapp branch
