Mazda 6 Technology Works was selected due to garage conditions with instructions for disassembling, assembling, customizing and repairing the vehicle's components and systems using a universal tool available to everyone, and only in exceptional cases recommendations for the use of a special tool are also available commercially. Repair work of any mechanisms in each section is selected on the principle from simple to complex: from elementary operations, adjustment of components and systems, replacement of often unsupadaced parts to large-scale full-scale repair of units. In the proposed materials you will find the following main sections: Car device - presents general information and passport data, panels and control machines Operating Recommendations - preparation for departure, recommendations on road safety malfunctions in the way - what and how to do in each case maintenance - Full information about repair of components such as engine, transmission, chassis, steering, braking system (each mechanism in a separate chapter), small and large repairs, assembly and disassembly of components and assemblies of machines are considered electrical equipment - malfunction diagnosis and basic blocks Mazda 6 wiring charts - greatly simplify troubleshooting in electrical equipment Attention!
