The data from Neufert architects are an important reference to the initial design and planning of a construction project. One short volume contains the basic information needed to form the basis for more detailed design and planning of any construction project. Organized mainly by building type, it covers the full range of preliminary considerations, and with more than 6,200 diagrams it provides a wealth of data on spatial requirements. Most of the illustrations are dimensional, and each type of building includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since its first publication in Germany in 1936, Ernst Neufert's handbook has been gradually revised and updated in 39 editions. This fourth edition in English has been translated from the 39th German edition and is a major new edition for international English-speaking readers. Reviews of the previous edition: Neufert Architects Data was the first book I bought when I started my studies in architecture. It was priceless to me back then and it's still a useful help in my designs. - Cesar Pelley With this thorough rewrite Neufert has released once again a priceless handbook. - Architects' Journal is an indispensable tool for the initial stages of designing and planning a construction project This new edition of the classic, best-selling text provides, in one short volume, the necessary way to form the foundation for more detailed design and development. Organized mainly by building type, it covers planning criteria and design considerations function and sit, and with more than 6,200 diagrams, it provides a ton of data on spatial needs. Most of the illustrations presented are dimensional, and each type of building includes an extensive bibliography and a detailed set of metric/imperial conversion tables. The architects' data begins with the basics of designing a new construction project before moving on to illuminating everything that an architect needs to know. It also examines design styles and specifications to create different types of structures, such as which are made for residential, religious, cultural, sports, medical and other activities. includes numerous examples and over 6,200 illustrations and tables 5th English edition of the classic, international directory for Architects' Data is an excellent resource for architects, construction surveyors, space designers, and design and construction contractors around the world. Architects Data Cover of the 3rd English editionAuthorErnst NeufertOriginal titleBauentwurfslehreCountryGermanyLanguageGermanSubjectarchitectural drawing; Human Factors and ErgonomicsPublishBivelt-Verlag (German 1st) Lockwood (English 1st Ed.) Publication Date1936Published in English1970ISBN980258965092 Architects' Data (German: Bauentwurfslehre), also simply known as Neufert, is a guide to spatial requirements in building design and site planning. First published in 1936 by Ernst Neufert, its 39 German editions and translations in 17 languages have sold more than 500,000 copies. The first English version was published in 1970 and was translated from the original German by Rudolf Hertz. Teaching history in Bauhosul Weimar from 1926 after the completion of Bauhaus, Ernst Neufert began to collect data on construction, in the way of rationalization. It was first published in 1936 as a guide for students and architects. Since then, more than half a million books have been printed in 39 German editions and 17 other languages. The first English edition was published in 1970. In the United States, it competes with the most common architectural graphic standards and is little known compared to Germany. Until 1986, Ernst Neufert was its editor, after which his company AG Neufert Mittmann Graf Partner, until his death in 1995. The content book is designed to help the initial design of buildings by providing extensive information about spatial requirements. Working mainly with ergonomics and functional layouts of buildings, thousands of drawings illustrate the text organized in accordance with the typology of buildings. The weight is now just under two kilograms, it is constantly updated. Influenced Argentine artist Guillermo Kuistka worked on the rationalization of architecture in his piece Neufert Suite in 1998.
