Conque pour l'utilisation d'un détergent haute efficacité seulement. WASHER SAFETY WHAT'S NEW UNDER THE LID? Cleaning with less water Choosing the right detergent Use only high efficiency detergents. The package will be marked as HE or High Efficiency. Low water washing creates excessive sudsing with a regular non-HE detergent. Using regular the most striking difference in its new washer is the low water washplate washing system. The washer automatically adjusts the water level to the size of the load—a water level selector is not required. Automatic sensing of the load size Once the cycle starts, the cover will be locked, and the washer will start the detection process to determine the correct water level for the load. This can take several minutes before water is added. You'll find a step-by-step description in the Cycle Status Lights section. Washplate You will hear the motor turn the basket into short pulses to completely water the load. This low water washing method uses less water and energy compared to a traditional stirrer style washer. The traditional washer-style agitator with detergent of the low water washer washing system is likely to result in longer cycle times and reduced washing performance. It can also result in component failures and noticeable or. He detergents are made to produce the right amount of suds for the best performance.
