I. I something else is wrong here or or do something wrong. I did all that in tuturial, at the end it says: Root Full, I get a superuser installed, but I still do not have access to the root and the superuser still do not work properly. What could be happaning? If someone can help me, I would apprecciate. Cumpa Page 6 I need a META-INF folder to drive your phone with CWM or anything? Thank you for any help. Page 7 I have a the Avail 2 (aka 992) (and that sucks, given that it's a \$70 phone, buying a new one is not an option because I just built a computer). It hasn't had an update with 4.1.1, and it's very slow, (usually only 50mb ram free when just sitting on the launcher) even with all the tricks to speed it up (greenfiy, cleaner, etc.) and on top of that, it's loaded with features that THE put in that suck. So, after searching and searching for a custom ROM with the support of my phone, I can confirm that there is a way to make rum compatible other than android cuisine or directly learn programming, please tell me. I'm willing to learn everything that doesn't take very long. Thanks for any answers. April 23, 2014, 02:52 #2 quote: Originally published as Four'0 Means I? If there is a way to make rum compatible other than android cuisine or directly learn programming, please tell me. I'm willing to learn everything that doesn't take very long. Thanks for any answers. No, it's not. You can try many other porting tutorials all over the internet. I found a list of phones similar to yours might come in handy. In fact, since you're trying to port ROM, just think about where these ROM came from? These ROMs were built from source codes. Android is an open source project, and if you're feeling adventurous, you can just grab the source code and compose it yourself for your device. It can be very easy or very difficult, depending on your device. I would advise you to try to build Cyanogenmod 10.1 from the source will be a lot of fun! April 23, 2014, 8:45 p.m. #3 GOP Junior Member More Thank you! So I found a CM for xperia tipo, which was on a list of similar devices. I have to use that and change everything that needs to be changed, right? Also, is it possible to do this for 4.4 shares? This may be the best idea if CM consumes too much April 24, 2014, 09:52 PM No #4 OP Junior Member Read more quote: Originally published as tuxboy No, you're not. It can be very easy or very difficult, depending on your device. I would advise you to try to build Cyanogenmod 10.1 from the source will be a lot of fun! Okay, ignore my last answers, I read a lot and know what I'm doing now. The only problem is that I can't find shares of my phone rum! The closest I found was a custom ROM for a phone similar to mine, which is confirmed to be running on the one I actually have. So what would it be good for? androidforums. com/prelude-all-things-root/795640-azazel-rom-z993-aio.html's the one. Thanks again for any help. April 25, 2014, 02:47 PM -#5 quote: Originally published four'0 Ok, ignore my last answers, I read a lot and kind of know what I'm doing now. The only problem is that I can't find shares of my phone rum! The closest I found was a custom ROM for a phone similar to mine, which is confirmed to be running on the one I actually have. So what would it be good for? androidforums. com/prelude-all-things-root/795640-azazel-rom-z993-aio.html's the one. Thanks again for any help. You can easily back up your current ROM. Try downloading in recovery and make your own custom recovery (ClockWordMod). April 25, 2014, 10:09 PM No. #6 OP Junior Member More Quote: Originally published as tuxboy You can easily back up your current ROM. Try to load into recovery and make your own custom recovery (ClockWordMod). Oh, I didn't know it was going to work, thank you again! I have my rum modded like crazy though, tons of xposed modules and build.prop edits as well as I uninstalled a lot of stock applications - I'm sure I could get build.prop somewhere, but what about other things? Do they matter at all? Edit: After backing up I now have a ton of pitches, recovery.img, and boot.img. I extracted all the pitches, now I just put all the folders of pitches in the folder with imgs and this is my base drive? April 27, 2014, 03:53 AM -#7 OP Junior Member More Quote: Originally published as tuxboy You can easily back up your current ROM. Try to load up on recovery and make your own custom recovery Okay, I'm going quite far and I've made a few lightning bolts and fixed a lot of bugs, but there's one thing I can't understand - the update scenario doesn't work and I realized it's because I used one of the original port and I needed one for my phone that I can't get away from cwm recovery. I really need the whole META-INF folder. Where can I get it? Page 8 Hello all, Well, I'm looking for a portable power bank for my phone I'm 5, Like, I have to travel a lot and it can charge my phone I at least 2-3 times, do some of the online search and found some of the energy banks online at various e-stores like sfcable.com, Amazon, new egg, etc....... But still confused what kind of bank power I should buy???, please help me, or If you have more better offers, please tell me ... Thank you in advance!!! April 26, 2014, 04:25 am #2 More I bought one on ebay, which was nothing more than lipstick, and it charges my device completely (ipodtouch 5) before you need to be recharged. IT WAS ONLY \$5. AND AWSOME! Don't pay \$40 on some expensive it's not worth it! As always, if this help is just a click of thanks sent from my SM-T310 using the XDA app-developer app on April 26, 2014, 09:14 PM No #3 quote: Originally published androidhacker007 I bought one on Ebay, which was no more than lipstick, and it charges my device completely (ipodtouch 5) before needing a recharge. IT WAS ONLY \$5 AND AWSOME! Don't pay \$40 on some expensive it's not worth it! As always, if it helps just click the thank you button Sent from my SM-T310 using the XDA app-developer can charge my phone 2-3 times. So your offer is not an option. OP I recommend NewTrent, they do some with the largest capacity I found and seem to be at a reasonable price. April 27, 2014, 04:21 AM -#4 More for \$5 just buy 3 of them shipped with my SM-T310 using XDA developer app Page 9 I want to find sm-9005, So I flashed my phone with SM-900t firmware, but after that happened, it became more annoying with the boot sound. Other reasons why I need to find SM-9005 firmware are because I need all the language packages installed and it is unlocked. So if someone can help me find the SM-9005 firmware, unlocked or used in us, with all the languages (or just us English with Chinese), I don't have to pay t-mobile another \$25 dollars, just this is fixed. But for now, I'll try UK firmware. April 22, 2014, 05:37 AM -#2 quote: Originally published laujason221 I want to find sm-9005, So I flashed my phone with SM-900t firmware, but after that happened, it became more annoying with the boot sound. Other reasons why I need to find the SM-9005 because I need all the language packages installed and it's unlocked or used in us, with all the languages (or just us English with Chinese), I don't have to pay t-mobile another \$25 dollars, just this is fixed. But for now I'll try my best. British firmware. Well, when we say firmware here for Samsung devices, it means everything: system, modem, loader (if applicable), etc. What you would like to be called rom, which is just the operating system itself. Flashing actual firmware for another device is at best not in the modem, at worst the reason for the brick (probably just bland on the T-mobile version). I find it very strange that T-mobile roots your phone and put on an internationally based rum. So, now, do you have the official firmware T-Mobile flashed through One, Keys, or Heimdallr, or have you installed only stock-based rum through custom recovery? What update is Build Version and baseband on now? April 22, 2014, 06:11 AM -#3 OP Junior member More T-mobile rooted it, it came with the restoration of the philz touch, they also cancelled my Knox, and Every time after downloading, 45-60 percent of the ram was used, so it was kinda laggy, but who knew Lindroid was good for my phone, it allowed me to use any downloaded app for multitasking as well as the same for the per box. But the core has slammed the NFC. April 22, 2014, 07:03 #4 I think you're the first person I've heard of who wants Knox (if it needs to be for work or warranty issues). Lol But you haven't answered my questions, so I have no way of recommending something for you. April 27, 2014, 05:46 am #5 OP Junior Member More I decided it was just rum, I tried using UK firmware, it failed. In lidroid.com, you can download rum that can set: sm-9005, sm-9006, sm-9008, sm-n900s roms, the only problem is that it will take about a day (not because of your internet) to download rum. Thank you to everyone who wanted to help me. Page 10 I have entrenched my device XOLO No 800X-Edition .... Installed busy window .... terminal I want to forge my Mac address tried with android terminal with both IPLINK and IPCONFIG ..... for both of his shows Applet found no error ..... I tried with different Mac spoofer apps not changing phone specs... Android 4.2.1 KERNEL Version 3.4.5 SW Version -XOLO\_Q800X\_S010\_20131207 HW Version - Q800X\_Mainboard\_P2 BUSYBOX -JRummy ANDROID TERMINAL PLS HELP... THANK YOU IN ADVANCE GUYS Page 11 I went through this and it was very disappointing. Solution: I found that most ROMs' build.prop, 'ro.sys.usb.charging.only' was set at yes. change it to nothing, and it will allow for mass storage. All it took was one look at build.prop. Hit thank you and give proper credits if you're going to use this. April 26, 2014 - 7:11am #2 Originally published as I went through this and it was very disappointing. Solution: I found that most ROMs' build.prop, 'ro.sys.usb.charging.only' was set at yes. change it to nothing, and it will allow for mass storage. It's all there was one look at build.prop. Hit thank you and give proper credits if you're going to use this. I would like to try it out... But my build props don't have ro.sys.usb.charging.only What rum do you use..? April 27, 2014, 6:25 a.m. #3 ROorkee More Tsunami TechVanced ROM for A110 Canvas 2. You can try adding it with ROM Toolbox and change its value to no. Hit Thank you if it helped. Page 12 My cheap, \$100N'D qm734g tablet started crapping after I had to hold the power button while downloading... Apps (including, but not limited to; Google Play Store, Clash of Clans, Hay Day, Google Services and a number of other app data/app caches have disappeared from the list of installed apps). Au though, they seem to still be installed, all the files in /sdcard/Android/Data and /sdcard/Android/Data and /sdcard/Android/obb are still there (I think it's the same thing on internal storage, too...), but the recording from the App launcher is gone. It is rooted, but only after that it first began to occur as an attempt to fix it. I formatted and returned Android to the default factory, (Power Button and Vol Up does not work for some reason.), but the same issue of relapse after 2 days. And now Google Play (com.android.vending) is missing... I doubt there's much I can do that isn't connected by flashing a new image, but if that's the case, Clockwork Mod and Cyanogenmod aren't compatible, so I need help out there, too... Page 13 hello to my friends I have a problem with Samsung i8190 no hard reset, I have this bug in recovery mode #MANUAL MODE - Multi-CSC app... The CSC code :COA does not correspond to the size of '/system/csc/general/system/csc/others.xml' (NO available data) when I click on the data on the napkin/factory reset and restart... not a complete wiping show... When the phone is on the show's lock show template... I can not eradicate the phone, im flashing with z3x, but it's the same problem plez help me April 27, 2014, 05:01 am #2 OP Junior Member More Page 14 hello I just bought pivos xios DC, I plan to install xbmc on it. I'm new to this can anyone help me out I have a few issues. Are there different xbmc builds like rums? and if so, can anyone point me in the right direction? April 27, 2014, 08:37 am No #2 Junior Member More quote: Originally published xan3x hello I just bought pivos xios DC, I plan to install xbmc on it. I am currently working on a school project on the development of android. If you could have failed that time and answered this guestion for me, it would Appreciated. 1. What is your process when developing an Android app from start to finish? 2. How do you plan your ideas for your app? 4. What is the best way to distribute your app? Are there other options? Thank you, Casey April 27, 2014, 9:23 a.m. #2 OP Junior Member Detailed Page 17 Hello Guys! Today I downloaded Angry Birds: Star Wars 2 on my Galaxy Y. Everything works well in installation and in launch too, but I have a problem. After the game starts, I get a massage error: DEVICE IS NOT SUPPORTED. This game is not supported by this game, BUT!! The game runs WELL in the background, I hear the sound and I see the main menu in the background. (In short: I think the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play after I click: Ok-Button, the game works well in this phone, but the annoying massage bug keeps me unable to play after I click: Ok-Button, the game works well and Build.prop file, but I don't know how. -My phone is rooted! -Thank you for your help!! attached Thumbnails Page 18 Hi, I have a tablet TB-9718D (rebranded ployer-momo11\_3-0-8\_M1\_software\_chinese-version\_4-2-20130425-4-2M CWM ROM (Android 4.2.2) on the tablet and it boots just fine. However, the touch screen doesn't seem to work anymore with this ROM.: one of which was 907c\_compatibility\_1.2.0.zip Both files did not solve this problem. Does anyone else have any suggestions on how to fix the touchscreen with this drive? Can I, for example, extract the touchscreen driver from the original disk's lib folder and use it in this new drive? Thank you in advance. April 27, 2014, 9:54 #2 OP Junior Member More Does anyone have any suggestions? Page 19 Hello quys! Today I saw this home screen on mycolorscreen (and I just can't find wallpaper with audio socket (if that's the right word?) on it. The link in the description is just a link to the creators of the Google account, but I can't find this particular wallpaper. Google's image search also didn't work. So do any of you have a link for me? It would be awesome! Respectfully, jonnyyxo No. 27 April 2014, 10:41 AM No #3 More Page 20 Please anyone can help me, how to install CWM Recovery on GT-I9502 Chinese smartphone, I am already rooted, but I accidentally erased EEMs and phone now does not work and screen apps either and pannel settings don't work Page 21 Hey Hey my problem seems to be pretty simple. I'm stuck, so I don't: (I wanted to create a simple download for my htc Desire. I found several websites to explain almost everything from folder structure to content desc.txt, so I started playing around a bit. However after pushing my first individual bootanimation to the phone, all I get is a black screen after the original HTC logo. I've already tried using desc.txt files from various bootanimations that I found online. I even retrieved and re-zipped the loaded bootanimation so I could see if this could be a problem. But none of these ideas could solve my black screen. At least I think I narrowed the problem down to the png files I use. My last guess is that I save these files using the following workflow: First I create the frames I want in my animation (just like build a GIF file). I've opened the file - render video. Then I choose Image Sequence, choose PNG, disable the weave in the settings and finally choose the resolution 480x800. Alpha Channel is set at No. After that, I use IrfanView to change the depth of the image color to 24bits and save the files in the part0 folder. None of my files are more than 30KB. My folder structure looks like this: part0 ----00001.png ----00001.png ----00002.png My desc.txt looks like this: 480 800 30 p 0 part0 After lightning folder and desc.txt without compression, I push the files on my phone. But when I try to watch it, all I get is a black screen. I really don't have any ideas, so maybe some of you know what I'm doing wrong. I attached bootanimation.zip. Freddie PS: When I download bootanimations from the internet, it works just fine. August 9, 2010, 04:04 p.m. No. #2 Senior Member of Sarnia, Ontario Read More Quote: Originally published by member68 Hey guys, my problem seems to be pretty simple. I have the same problem, please can you share the solution?? Thank you. July 9, 2011, 12:00 am #10 black screen hey you can help me too I have the same problem with mine is 480x800 .png image I attach it. I also used shoe animation previews and it worked perfectly, but on my phone it just gets a black screen, please help. Attached files ATT bootanimation.zip - Click on R Code (3.67 MB, 83 January 25, 2012, 08:31 PM (member #11 Mulvane, KS More What does its structure look like??! can't seem to get anything to work.... Page 22 Hello guys! Today! downloaded Angry Birds: Star Wars 2 on My My Y. Everything works well in installation, and in running too, but I have problems. After the game starts, I get a massage error: DEVICE IS NOT SUPPORTED. This game is not supported by this game, BUT!! The game runs WELL in the background, I hear the sound and I see the main menu in the background. (In short: I think the game works well in this phone, but the annoying massage bug keeps me unable to play, after I click: Ok-Button, the game will come out.-So how to fix it? I don't know. -Thank you for Android) part of the reason I got this because all the settings I can do for it. I want to install CyanogenMod to get a full dose of Android customization while keeping the original Gpad OS as it will be my standard. Include as much information as you could please. Thank you in advance. Page 24 Hello to each body. I have a problem with my Galaxy s2plus (gt-9105p) jelly beans 4.2.2 (the device is rooted). I'm out of a 3g network and I have only 4 apps that work on 2g: mini operas, skype, facebook messenger and aptoide, but other apps never work only on Wifi. I checked all the phone settings, but nothing happens. Thank you for everyone. Page 25 Hi XDA Team, you guys are rocking and no doubt in this. I'm asking you to do two things, please. 1. Can you port the Xperia No. 2 lock effect for the Xperia SP. ...... April 27, 2014, 07:24 #2 z2 lock port for Xperia z anyone can port lockscreen z2 for xperia z... z2 lockscreen is so nice. April 27, 2014, 12:25 p.m. #3 Senior Member of More Don't Work With Our Sp Camera and Smart Control. Gesendet von Meinem Xperia SP Page 26 ---transmissions google.translate rus 2 eng--- I decided the roots of the device. Loaded unlocking loader off.site, set root. In the left corner you see the following inscription ... The tablet is rooted further wishes of video instructions for this recording picked up by Root, made a wipe, changed firmware Ruth disappeared, but the inscription remained. When I started writing video instructions program loader betrayed what this error, the change of firmware did not help ... Well decided to get rid of loader removed through fastboot ... -cache 0.5 sec 13 sec -userdata -system 2 min -data that has been removed for a very long time - about 5 minutes can wait for thought - probably stuck or terminal fastboot closed or cable - pulled - forgot . and more like boot (boot) or recovery if there is one . Turn after all erases, the inscription remained mode rekaveri worked endlessly spinning circle . Decided to try to upload through the terminal in tablet firmware ? P.S. Communicated with one person , he advised to flash nvflash tegra4 but where to look? Can not nvflash tegra 4 lead into operation? ----In the original Russian---- I decided to rud the device. Downloaded the unlocker unlock from off.site, installed, rut. In the left corner there was an inscription... Tablet was routed Further wanted to record video instruction for this removed rue, made a vape, changed the firmware, the rue was gone, but the inscription remained. When I started recording video instruction, the downloader program was making some mistake, the change of firmware did not help... Well decided to get rid of the unlocked loader to hit through fastboot... -cache 0.5 sec -userdata 13 sec -system 2 min -data which IS FOR VERY long removed - can minutes 5, did not wait to think - probably hung either the fastbut terminal closed or the cable pulled-forgot. and like another boot or a reover if there is one. I turn on after all erass, the inscription remained, the mode of the reover worked and endlessly spinning circle. Decided through the terminal to try to pump the firmware into the tablet - some mistake led. Then there was no reover, nor a spinning mug. P.S. communicated with one person, he advised to sew nvflash tegra 4 bring to work mode? Mode? ler querido john online pdf. livro querido john ler online
