Nokia 6.1 Plus aka Nokia X6 is one of Nokia's most successful devices, thanks to built quality, Android One and overall balanced specs. However, camera performance is not up to the mark compared to other brands in the budget segment, they are already touching some great feats with their cameras, especially Xiaomi and Realme. But, you can always download the GCam for Nokia 6.1 Plus and get the best out of your smartphone. The GCam comes loaded with better image processing there and is much better than Nokia's stock camera.Thanks to the developers, GCam is ported and available as an APK to install in any Android device, provided that, camera2api is included in that Android device. GCam uses camera2api to better monitor the smartphone's camera sensor and then apply its amazing image processing algorithms to produce Sharp, detailed images with a good dynamic range. Night Vision, a feature introduced into the Google v7 camera, captures great photos in low light and therefore improves the low performance of any Android in low light by a wide margin. Speaking of Nokia 6.1 Plus, it was released back in 2018 with pretty good specifications in the budget. It's a swing SDM636 Snapdragon 636 chipset with 4 or 6GB of RAM. For the display, we have a 5.8 inch IPS LCD with a resolution of 1080 x 2280 pixels. Coming to the cameras, there The camera is mounted on the back, which consists of an initial 16 MP sensor accompanied by a depth sensor for portraits. A 16 16 Lens on the front capturing the selfie. It is powered by a 3060 mAh battery that supports a fast charge of 18 W. Why use GCam? HDR's Large Dynamic Range Google is based on image synthesis technology that takes different images and then combines it into one but more detailed image. This improves the dynamic range as well as give the best low light shots. Portrait ModePortrait mode is now quite common in every smartphone, but GCam has taken the upper hand in finding Edge and natural blur. Night SightThe night is different from HDR in many ways. HDR gives the best dynamic range, on the other hand, Night Sight gives the best low light shots, illuminating them and removing noise. Until now, Night View is GCam's most powerful ability and much better than Mi's Camera.Astrophotography Modelt is just to photograph the night sky full of stars. This is a feature in Night mode. How to install the GCam (Google APK Camera)You need: GCam APKThat's it, Camera2api is already included in the Nokia 6.1 Plus, install GCam APK and use it So that's it.
