GBWhatsApp is an advanced and customized mod of the original WhatsApp and is most suitable for those who want to use two Whatsapp accounts on the same device. It is based on the fashion of WhatsApp Plus, which was discontinued by WhatsApp creators when they ordered WhatsApp. The advantage of GBWhatsApp is that you can install it along with your original WhatsApp without any interference. You can also view messages that have been deleted by another user, and you can easily get photos that have been deleted in a private or group chat. This version of Whatsapp is also best suited in case you get banned from the original Whatsapp. Accounts that receive are banned from receiving only a small message: Your phone number is prohibited from using WhatsApp. Seek help in support. Whatsapp official usually doesn't issue any warnings before banning your account, and that's all you can't use Whatsapp anymore. But GBWhatsApp offers a detour from the Whatsapp ban. WhatsApp plus Mod stayed in circulation and because of that we have GBWhatsApp which you can easily customize if you are a developer. GB WhatsApp has a modified user interface for additional features and uses the same license and protocol as WhatsApp. Once installed, you can continue to use GBWhatsApp with the new number as a fully independent chat app. GBWhatsapp comes with lots of features and more improvements. In addition, it has many new themes and improved privacy policies. You can use this app to discover the hidden features of Whatsapp. The best app to enjoy two different accounts on the same device. You can hide your status online, send large video files, more than 90 photos can be sent at once, not 10 photos in WhatsApp. GBWhatsApp Features: GBWhatsApp supports many special features added to its latest Modded APK. Because this app comes from independent developer AlexMods, so it gives the anti-Ban app a function and makes it Ban Proof. It works great on standard phones and there is no need for Root Access. But you can always check if your phone is rooted using the Root Checker app. You'll also notice improved personal privacy when using this modern version of Whatsapp. You can disable calls from specific people with the ability to block and unlock. Also, change the tick styles of your choice. It's easy to hide your last seen by changing the settings in privacy options. Normally you won't find these settings on standard Whatsapp. You can also hide the double tick and set up the second tick settings. And the other person won't even know you're this. In normal Whatsapp any changes you make you have to implement it for yourself as well. But this is the beauty of GB WhatsApp where you only have to make changes to one side until you like everything yourself. Privacy and Customization in GB Whatsapp In the latest update, you can also set privacy on your status and can only for yourself or your contacts. Or you can hide your status from specific contacts. This feature is unique only to GB Whatsapp. You can also stop receiving calls from anyone you want, or for everyone. Now talk about the fun features of GB Whatsapp include increasing the profile of your contacts' photos. Just click on the photo and zoom in. In addition, you will also receive a warning if one of your friends has changed his Whatsapp profile picture. Also, you can copy any status just to open your status copy and download. Sharing multimedia on this modern version is also fun and you can share up to 90 images at a time. Audio clips can be up to 100MB and video size can be up to 30MB. Watching media is also very easy as everything loads automatically and you only have to click and play. Please note that we do not recommend using GBWhatsApp because it is unofficial and offers encrypted. WhatsApp Inc. has officially begun to discourage the use of such apps. You can read more often and you can customize the messenger's themes and apply custom themes. It also offers a dark mode and built-in emoji shift along with numerous GBWhatsapp themes. Settings also include the ability to change missed call icons, which are very useful if you use GBWhatsapp for secret purposes along with the ability to change the screen of your calls. All of these features may seem amusing, but keep in mind that this version of Whatsapp is very modded and insecure compared to the official version. This is why this version has been removed from the playstore and poses a serious privacy threat highlighted in this article. You're browsing old versions of GBWhatsApp. Here you will find APK files of all versions of GBWhatsapp available on our website, published so far. Для большинства людей. For the latter, WhatsApp serves as the most popular instant messaging app, with over a billion daily users. As a free text messaging and sme, WhatsApp has a lot to offer. However, it is still missing quite a few features. That's why modified APK is so popular with users and Among the many sought-after additions to WhatsApp functionality is the ability to use two accounts simultaneously, usually yielding results for third-party and unreliable and memory-hogging cloning applications. GBWhatsApp Pro is app to solve the problem in different ways. Using the GBWA Pro directly for two users on the same phone, GBWhatsApp Pro offers all the advantages, but none of the storage space and RAM associated with the flaws of clone apps. This third-party app allows the user to take advantage of exclusive features that are not available anywhere else, such as chat topics, hidden receipts for reading, app blocking, multiplayer functionality and more. With GBWhatsApp Pro on your Android device, the following features will be available. They won't be found on standard WhatsApp instances, so they're worth reading to understand what they're offering. Topics: Themes were included in GBWA APK, and now they are one of the best features of fashion. They allow you to change the layout of the app whenever you like, as many times as you like. Several themes are already available, and the developer adds more constantly. Privacy Options: GBWhatsApp Pro includes additional privacy settings that are not available in the official app. They allow you to hide/show your status online, hide/show blue ticks, and hide/show double ticks, enter status, etc. Lock app: Lock app allows you to require that a template, PIN, password or fingerprint enter the app and gain access to your messages. This adds a level of security and keeps your messages hidden even from people who have access to your phone. The PIN and password can be shown during their century if you want. No contact list required: With GBWhatsApp Pro, you can send messages to any number, regardless of whether they are on your contact list or not. They only need to have that number registered with WhatsApp to get your text. Media Sharing: With WhatsApp, you can share all kinds of media, from documents to images, GIFs and videos. However, you are limited to a relatively small file size for this media transfer. With the GBWhatsApp Pro Pro, this limit increases to 700MB, a significant improvement for things like sharing long videos. Full image sharing resolution: While compressing the image that WhatsApp performs can make sending images a little faster, the resulting quality is pretty bad, especially if you want to use the photos you post on other social media. GBWhatsApp Pro allows you to share images in full resolution. No more grainy or pixelated photos! Pin Chats: Up to 1000 chats can be fixed with GBWhatsApp, not just three. Privacy call: Some numbers can be locked at certain times of the day, ensuring that you have a full over your privacy. Stickers: Play Store stickers are available, as you can find, for example, on Facebook Messenger. Download GBWhatsApp Pro and install it on your Android device.
