Super Mario Run is fun? The answer is very funny. However, simply using Parkour for classification seems not appropriate. Because Super Mario Run is more of a puzzle controller than the average parkour game, and it's not that hard. The action of the game is actually very simple, Mario automatically forward, short jump, long press to the high point in the traditional Super Mario Bros series. People tortured to death 70% of monsters can be automatically avoided, compared to the platform action games greatly simplified, but the level of difficulty of the game increased only not decrease. To make up for the gameplay that simplifies and weakens the game, the game designer has designed a number of top-up gadgets: a forward-facing arrow grille that can stand farther above, a grid of arrows facing backwards, which can jump backwards; Pause in the above action pause and so on. These devices must not be an abbreviation that facilitates border crossing. Instead, you don't want to be able to close these gateways. Game designers at the level of control design is really wonderful, the game six worlds, a total of 24 minor, each level can give people a completely different feeling, sprint, climb, fly through the plains, deep caves , explore the castle, these rich adventures will not be lost due to the simple action of fun, but because of the magnificent level layout , people can experience the charm of each of the different worlds. Although most monsters in the game can automatically turn around, there are still two chances to die, but this is again a goodwill trap. Because in some places you need to use the pace of trekking monsters to jump in , after each death, bubble to send you back and not give you a chance to rebirth, as it is one that allows you to think about using this mechanism to maximize access to gold opportunities. Because of these settings, each of your actions, your jump, are no longer limited to avoiding monsters and cliffs, more is to better adjust your own progress rate, and better mystery map customs clearance Question - yes, that does not mean that you can avoid all the dangers you can get the gold color required for customs clearance, every gold coin are up to you by constant thinking , analysis, gain experience, if you want the first customs clearance to get all the colored gold coins, it is basically impossible. These wonderful level designs naturally raise the level of difficulty of the game, but when you go through the level you will experience the heart felt joy, as you will know that it is not a lucky settlement, but rather through hard work and due to your own strength only customs clearance, gives you a sense of accomplishment is not the usual parkour game you can compare. In addition to the basic world tour, the games include rallying and building a system that also gives players the joy of getting around. To put it so much, Super Mario Run as Nintendo's first hand for water testing, the quality far exceeds people's expectations, compared to others with the fully portable fried rice mobile platform that is new to the mobile game maker is simply the conscience of the industry, if you want to feel the allure of this classic IP in a mobile gaming platform, this is definitely a good choice, so more gamers like the game can play such a good game.
