Big commotion crossword clue

Are there any puzzle hints that give you extra problems? Does it have a question mark at the end? In the world of crosswords, clues with question marks mean that special clues demand a second look. Usually, a little punctuation is an indication that the clue itself is a pun, as opposed to a direct question that demands an answer or [source: Sayles] that fills in the blanks. So, the most obvious answer may not be the correct answer. Think about all the possible meanings of the instructions; You can always mess it up as you move on to other parts of the puzzle. Photo: Pixabay (Pexels)For some reason, many people believe that the ability to solve crosswords is a crossword talent that is crossed out at birth for a select few. This couldn't be further from the truth. Crosswords aren't an irreversible test of your vocabulary or intelligence—they're learnable skills that anyone can develop. Learning new skills is one of the best ways to make yourself both marketable and happy, but... Read moreNo other word games or puzzles ask quite a lot of your brain as crosswords. Experienced puzzles assume not only the literal meaning of each clue, but also similar ones they've seen before, frequently repeated answers, unique syntax, word games, cultural references—and, of

course, puzzle themes. Unfortunately, this means that crosswords can be completely unfriendly to newcomers. Everyone starts somewhere, and no matter what you're capable of right now, here are four common strategies to help you improve. Do Puzzles Every Day The only way to improve crosswords is to do many of them, and the best way to do that is to work them into your daily routine. For me, that means overcoming some of the puzzles from Will Shortz's ancient book of 365 crosswords before going to bed every night. My mother printed Washington Post crosswords and chips on them at breakfast. My friends traveling by bus or train are fans of the New York Times Crossword puzzle app. New York Times puzzles are the gateway drug of most people's crosswords for a reason: they are easy to find and have an innate difficulty assessment. Monday is the easiest, Saturday is the hardest, and the puzzles are between ramp ups day by day, so you can pick and choose the one that works for you. That said, the New York Times is far from the only publisher out there. The Washington Post, Los Angeles Times, and Merriam-Webster also published American-style daily crosswords; If Faint cross is your jam, try The Guardian. Some organizations, such as Queer Crosswords and Puzzles for Progress, will even send you original themed puzzles as gifts for nonprofit donations. Keep in mind that each publication has its own style—mastering intricate hint phrases in Saturday New York Times puzzles won't always translate into one from the Post, and vice versa. Use apps if you really want to improve your crossword game, subscribe Apps, like this one from the New York Times, are a good idea. As much as I like, paper puzzles can't touch the easy-to-use features you get with the app. You can easily check your work or reveal letter-by-letter answers, rather than accidentally peering at the entire solution. These demystify hints just enough to make them viable, which is exactly what you want. In addition, most apps will take up your work time, which makes it easy to measure your progress. But really, the biggest advantage is accessibility: carrying about thousands of digital puzzles in your pocket makes it easy to do a lot of puzzles. Know When—and How—to Cheat Cheating is a sensitive topic among crossword puzzle enthusiasts, but it undeniably has its place. Crossword puzzles should be fun, and repeatedly banging my head against the same wall, praying for different results, is not my idea of fun. Moreover, frustration is a bad teacher; unless you have serious competitive puzzle aspirations, stubbornly refusing to look for answers or check your work won't take you anywhere. Many games require a big time investment—at least, if you want to have the best equipment, ... Read more Obviously, you have to solve any clues you might get without help, but you can't improve without challenges. A little strategic cheating can guide you through even the toughest puzzles. The app makes this very easy: just check or reveal letters one by one until you can solve very nasty clues. This gives you enough information to (mostly) hack it yourself, which in turn makes the answer more likely to stick to your memory. Paper puzzles make strategic cheating a little more difficult, but thanks to the Internet, not much. If you're stuck on a printed crossword puzzle, Google all the hints in quotation marks. Framing your search around clues rather than, say, how many letters you have to work on will help you understand what clues you want. Over time, you'll find yourself needing less help solving puzzles that would previously have been real stumbers. Learn Up! If you're serious about mastering crosswords, the Internet is full of loved one who wants to help. Blogs like Rex Parker are a great place to start. He solves New York Times puzzles every day, compares adversity with other puzzles from that day of the week, and breaks down the pair of key clues/answers in a short post. Between posts and comments, you'll get a more complete solution than if you were just looking for the answer. You can also further specialize and brush your crosswords—words that often appear in crosswords but are almost never in conversation. The New York Times has a quiz that tests your crossword knowledge, and there are more general guides than Dictionary.com. Perhaps predictably, there is also an entire website devoted to crossword puzzles, with a new word daily and extensive archives. If the statistical approach is more your speed, there's a crossword answering database out there. Data scientist Noah Veltman analyzed a set of New York Times crossword clues and answers from 1996-2012, then set them up with crosswords and how often they appeared. You can filter lists based on the minimum number of views or word length, and see details about specific answers. Similarly, Xwordinfo.com will show you the most popular answers and clues to Times puzzles by year or word length. Hell, you can actually go all-out and code yourself some training program like this guy did, although it's unclear if his approach is more effective than just doing a bunch of crosswords. This is not to say that you have to build robots or memorize clues to solve crosswords more efficiently; The best training strategy is the strategy that makes you happy. It doesn't matter how many puzzles you solve, or how quickly you can solve them—only that you save them. If you can do that, you'll never stop improving. View Slideshow We've seen pointless in houses for sale all week. Finally, in excitement, the real estate agent says, Well, there's always Grey Gardens. The name brings up all sorts of images. Hundreds of cats, two eccentric old ladies — Jacqueline Kennedy Onassis's aunt and cousin — decaying splendour; verité cinema film of the same name; criticism by the health department; ghosts in the attic; a terrifying, dilapidated, romantic seaside hideaway amidst an exclusive, perfectly manicured oasis in East Hampton. Little Edie Beale, Jackie's first cousin, Black Jack Bouvier's nephew, met us at the door. Her mother, Big Edie, had been dead for several years, she explained, and she was now forced to sell the house. Inside, the cat smells too strong. The floor is part of the dirt. The ceiling is perforated. Raccoon peeked at me through the rafters. Some twenty cats were running around as we entered each room. Still I think it's the prettiest house I've ever seen. We returned to the living room, treading carefully over the decaying board. I touched the key on the grand piano and it collapsed. Little Edie doesn't seem to notice. He did a waltz in the middle of the living room, and when he finished, he waved his hand superbly and said, All it takes is a little paint. You're out of your mind, is what my husband, Ben, said when I broke through the subject. Every day I come back. I'm obsessed. You should own this house, Little Edie told me. You are meant to own a home My mom said I should sell it to you. You are the only one who will restore it to its original glory. Everybody wants to knock it down. I told Ben that Big Edie wanted me to own a house. You're out of your mind, he said. I'm back. This time with Ben. He's very allergic to allergies. Cat. She cried when we finally got out of the house. Her eyes were red and swollen and she couldn't breathe. He has been surprised by raccoons. You're out of... He's starting to say it. But Ben, all it takes is a layer of paint, says I. Happily, Ben has a sense of humor. Also a sense of adventure. It doesn't make any mistake that he loves challenges. It's a challenge. In November I arrived in East Hampton to close the sale of the house. I ventured into the attic for the first time, to discover everyone's fantasies—a treasure trove of objects from the bygone era, not used for half a century. Almost enough of everything to complete the whole house. It was a true archaeological expedition, digging up things that painted a picture perfectly of the twenties and thirties. Everything I open takes me through the glass that looks to discover another world—one of wealth and privilege, travel and calling cards, beautiful servants and clothes and, most importantly, from leisure time that doesn't exist in many lives today. It was as if I had been left with a set of instructions on how to do the house, a tattered map with instructions to follow in the décor. I picked up torn chintz pieces and old slipcovers and found fabrics that had the same feeling of summer and beauty and style that didn't come off. I scratched the walls until the original paint came through, old East Hampton blue and soft green and pink. As soon as the back side of the house, which faces south to the sea, opened with French doors all around, the house became what I knew it could be—a comfortable, warm, bright, comfortable home. My goal is for anyone entering the house to feel good. Good.
