Gps tracker tk102-2 manual

The TK102-2 is a simple and inexpensive TRACKER GPS Tracker TK102-2, powered by the most advanced GSM network technology and uses GPS navigation satellite system. Thanks to an integrated sensitive antenna, the tracker can determine the location. Set the main

In this case it sends information about the nearest BTS GPS Tracker further has a built-in microphone that allows you to eavesdrop on sounds if necessary. To get the tracker up and running, you need a standard SIM card on your mobile phone standard SIM Tracker will send a location report. The device will broadcast these messages until you send me help with an authorized number of features. In each message from GPS Tracker, you will receive information about the current geographic location at the current time, as well as data on the speed and direction of movement. In addition to these basic features, this GPS Tracker provides the ability to find GPS coordinates, send an SOS signal, alert you when the battery is low, exit from your chosen area or if the set speed is exceeded. Can be used to track a dog, etc., if the tracker does not have a GPS signal sends information about the nearest BTS QUESTION: Where to put the tracker or tracker antenna in the car? Answer: To the front of the plastic mask, to the plastic mask and the rear window on the left an the left, to the plastic position between the pasterge window on the right and l x Cover with 1 x Waterproof Body Magnets Video shows the battery insert, close the lid - the diode flashes once in 4 s.
