With a small set of preloaded apps, Android One gives you more storage to use the way you want it. And for all your memories, you automatically get unlimited, high-quality photo storage for free on Google Photos. High-quality free storage requires a Google account and an Internet connection. Con Google Foto, tutte kills the foto sono giò organizzate e facili da trovare. Trova le foto tramite le persone, i luoghi e gli oggetti che ritraggono: con una ricerca rapida Persone puoi trovare le foto corrisponnti. Puoi anche etichettare le persone che ti interessano per trovare rapidamente le loro foto, as John ed io a Londra o Mamma in spiaggia. Not available in tutti i Paesi Mi A2 Lite Double camera, two-day battery AI Double Camera 4000mAh Battery 19:9 Full Screen The dual AI-powered camerais for enhanced shooting capabilities Capturing the fullness of your Beautifly beauty 4.0sees the only one removes the darkness under your eyes Removes buttons and imperfections Features Metlights Brightens skin High-capacity battery meets all your needs Continue to use your phone all day with the 4000mAh battery. Play music for up to 34 hours or call for up to 19.5 hours on a single charge. 19:9 Full-screen view Discover better visuals with 432 pixels per inch clarity and NTSC color brightness at 84%. Octa-core processor for an optimal metal gaming body with an elegant and sale grip 2.5D glass display curves gently curve into the metallic body so that it feels right in your hand. Double Nano-SiM Card - 256GB microSDUp slots of expandable storage Insert two SiM cards at once and expand your storage to 256GB. Designed by Google. Intelligent, secure, and simply amazing. Learn more about Android One - All data is based on design specifications, lab data and vendors. Test data may vary slightly between different test versions and test environments. Google, Android One, Google Photos, Google Play Protect, and Google Lens are trademarks of Google LLC. Monthly security updates to be supported for at least 3 years after the phone's initial release. Earlier this month, Xiaomi released Android 10 for the poplar range of Android One smartphones, including Mi A2 and Mi A3. This meant good news for the Lite variants of the A2 and A3 series as well. The day has finally arrived. Stable Android 10 update has just rolled out for the Xiaomi Mi A2 Lite in europe's regions Asia. So just go to the system updates settings and check all the OTA updates. You can also download the entire Fastboot ROM from below and manually update your Mi A2 Lite on Android 10. Apparently, the internal beta program of the Mi A2 series is over and the manufacturer has just released stable versions of Android 10 for Mi A2 Lite as well codenamed - daisy. The OTA comes in a large 1.3GB package in while, the full ROM Fastboot comes in a 1.63GB package. It packs all the beloved Android 10 goodies, including dark mode (or dark theme for Android One), smart response, brand new gesture navigation system, advanced privacy and location controls, and the latest level of Android security patch. However, as indicated by some users, the update is not quite stable for the first version. Some of the bugs still persist in this new update. Users for Mi A2 lite who updated to Android 10 live reported bootloops, light bleeding from the bottom of the LCD screen, UI problems, etc. But these are just a few cases. In addition, other important features like VoWiFi may also be missing with this update; as he did with the regular Mi A2. Anyway, you can always update your device automatically via the OTA update or manually via fastboot ROM. Here are the full OTA downloads for the Mi A2 Lite available directly on Xiaomi's update servers. This is the direct download link. Xiaomi Mi A2 Lite Android 10 Full roaming ROM downloads (direct link) You'll also need: Note that, this update may require a locked Bootloader to apply. Although this is a recovery update (tutorial here), you can also install it using a custom TWRP recovery or via the Fastboot method (tutorial here). Also, back up before your update. Android 10 will arrive soon for Xiaomi Mi A3 Lite. So stay tuned! Updated on February 27, 2020: The Xiaomi Mi A2 Lite was launched in July 2018 with Stock Android 8.1 Oreo powered by the Android One program. While a few months ago, Xiaomi's support team mentioned that the Mi A2 Lite will not get Android Q support. But in the new year, things will change. Now we can really expect that the Xiaomi Mi A2 Lite Android 10 update is on its way as the Mi A2 Lite Android Q Kernel Source code was recently released on Github. Previously, it was quite unexpected that the Mi A2 Lite variant will receive the new Android OS version. As the days fade, more and more things will come out in the next few days or more. While some of the users interested mid A2 Lite have signed a petition on Change.org platform. It is also worth mentioning that all android One devices running promise to receive two years of major Android updates and three years of security patch updates. Thus, it is quite obvious that most Mi A2 Lite users are already in update for a few months. In addition, the Mi A2 Lite appeared on Geekbench running the new OS version which would be good news for all users. However, there is no specific announcement or report available yet on the Mi A2 Lite Android 10 update. So we have to wait for more reports or leaks. To be very specific, the Mi A2 began receiving the Android 10 update a few days after Xiaomi released the core source code officially. So there may be a few to happen the same with the Xiaomi Mi A2 Lite as well. Until then, stay tuned for more information. Updated on January 28, 2020: Xiaomi was recently blamed for not giving updates to its Android One devices. The Mi A3 was one of the devices that didn't receive the Android 10 update even now. Recently, a user asked Xiaomi regarding the update to Mi A2 Lite, surprisingly the brand said that Android 10 for Mi A2 Lite is not in their plans. This was shocking to us, since it is an Android One phone, it must receive at least two major Android updates. The device came with Android 8 Oreo on board and later received the Android 9 Pie update. Earlier they updated their MI A1 in Android 9 Pie, the brand says that the latest update for Mi A2 Lite is the Android 9 Pie and it will stay with Mi A1 i.e. in Android 9. After seeing this brand response, Mi A2 Lite users began to wonder what the Android One program really means? Users around the world have signed up for the petition in change.org. Apparently, another Xiaomi support executive says that the Mi A2 Lite will receive the Android 10 update. After seeing this report the users of the device got at least one hope that they will receive the Android 10 update. In addition, Xiaomi UK support says there is already Android 10 beta test for some users of the device. And he adds that a stable rollout of the update is expected once the bugs are fixed. When Xiaomi is going to deploy is the only question in front of us. Updated on December 01, 2020: Google launched an official Android 10 (aka Android Q) version in September 2019 and rolled out the update to its Pixel series devices. While, most smartphone OEMs are also trying to provide the latest software update or its features to its devices. In addition, there is a category of non-Pixel devices available where budget and mid-range Android smartphones receive faster updates. We are talking about all Android One devices based on the Android program. Xiaomi Mi A-series phones also come to this list. Last year, Xiaomi released the Mi A2 and Mi A2 Lite models under the Android One program running on Android 8.1 Oreo out-of-the-box. If you're using the Mi A2 Lite and waiting for the Android 10 update, check out Xiaomi Mi A2 Lite's release date and features. By the end of 2018, Xiaomi Mi A2 Lite has started receiving Android 9.0 Pie update in some of the regions and currently, all Mi A2 Lite devices are running on 9.0 Pie. Now, if you are an Mi A2 Lite user and you Get the Android 10 update, check out this full article. It is worth mentioning that Google's Android One program is simply developed for budget and mid-range Android smartphones. It provides faster major Android updates for two years and security patch updates for three years. Therefore, the update of the second year or the second major Android update is still arrive on Mi A2 Lite. All devices in the Xiaomi Mi A series offer better specs, good software support and better camera performance in its class in the same price category. The Mi A2 was the successor to the Mi A1 model and comes with a brother-in-law Mi A2 Lite variant. As a non-Pixel device, Android One smartphones are so consistent in terms of receiving software updates. Now let's take a look at the Android 10 (aka Android Q) some features highlighted. Android 10 Features Last month, Google announced the latest Android 10 version which is the 10th generation of Android OS. It is more refined and stable than the previous generation Android 9.0 Pie and also brings so many additional useful features. Android 10 includes a new system user interface, gesture navigation, enhanced security and privacy features, location control, improved application permissions, foldable display support, system-wide dark mode, etc. It also brings a new focus mode, Family Link, Cat Bubbles, Smart Reply, and more. For more details on the new Android 10 version, check out the main features of Android 10 from here. Xiaomi Mi A2 Lite Android 10 Q Release Date The Mi A2 Lite has already received a major Android update For example Android 9 Pie. Now, as promised by the Android One program, Xiaomi will soon roll out the Android 10 Q update to the Mi A2 Lite by the end of this year should. Although there is no official confirmation yet available. But if we look at the previous update last year, Xiaomi can release the Mi A2 Lite Android 10 update in November 2019. Meanwhile, Xiaomi has launched the 3rd generation Mi A-series device called Mi A3 with Android Pie this year. Reports are coming that Mi A3 will be the first mid-series A device to receive Android 10 in November of this year. Maybe both devices will get the latest update together. So we have to wait for more leaks or reports on the Mi A2 Lite. Until then, stay tuned for more information. Info.
