I made this up because there's a lot of weird info out there about what weapons you should choose in BDO when starting and leveling up. This is important because you DO NOT WANT TO INVEST in weapons without a future. This is it! But, before I proceed – the most important part of this guide is this: How do I know this guide is updated! The simplest way? Please comment on this page, or click on [/r/TeamBRG](#). Especially, see if duo's ultimate weapons stats are the same: Duo Ultimate Min AP Max AP Avg AP Ex AP Adj AP Eff AP Slot Impt Note Bares 79 87 83 22 18.7 101.7 1 All Species Yuria 84 93 88.5 22 18.7 107.2 1 Human Only Rosar 85 94 89.5 0 89.5 2 2 Slot Kalis 81 99 90 0 90 1 High RS If some new updates change the statistics on older weapons such as Styd, Azwell, or some new type added – again, contact us and I'll see how BDO Best Leveling & Starter Weapons: SUMMARY Mainhand: Bares & Yuria = Kalis Bares is best against all non-human targets when grinding. Yuria is roughly 5-10% better only on Human and PVP targets. Kalis is the best for Pushing, but... New players should focus on increasing power for GRINDING, which translates into revenue and more gear upgrades. Bares goosebumps any weapon against a non-human target. But - Famous score is weak. Yuria is amazing versus Humans (Sausan, Gahaz, etc...) and PVP. Kalis is OK against all targets, and helps inflate your Famous Score by a considerable amount – Kalis roughly within 1% of the Famous Score of the boss's gear! However, the acquisition of hospitals is very inconsistent ... Just get this as a backup weapon/if you know what you're doing. Hospitals don't ALWAYS increase your strength in commensurate amounts. Boss gear (Kzarka, for example) obliterates one of these choices in a wise Famous Score performance. Liverto is usually a trap (only worth considering when cheap dirt is going through the show, I guess). Offhand: accuracy & Pure AP. Here's the list. Accuracy offhands by Offhand class for Accuracy Pure Type AP Warrior Shield Vangertz Axion Valkyrie Shield Vangertz Axion Musa Horn Bow Black And White Maehwa Horn Bow Black And White Dark Knights Ornamental Knot Saiyer Oros Berserker Decorative Knot Saiyer Oros Striker Vambrace Scale My Skin Ninja Shuriken Quitar Estique Kunoichi Kunai Quitar Estique Sorceress Talisman Helrick Jubre Witch Dagger Bronze Steel Wizard Dagger Bronze Steel Tamer Trinket Incense Needle Keep in mind: You will NOT use this weapon forever. Pure selection meets the specific needs of the most effective Milling until you upgrade to the boss's teeth. These weapons are legitimate from the leveling process up to DUO/TRI. Old info: Rosar and the other options are outdated, their upside not stacking up well against Bares or Yuria today. All the other green guns not mentioned here need in-game updates to be competitive – they are just remnants of the past, or instantly WORSE in non-niche scenarios. The choice of weapons for alts (Black Abyssal, Liverto, Hand me downs) will be discussed towards the end. BDO Flattening Starter Weapons: This comparison is all under the assumption that they will not exceed duo, or be most abandoned in TRI – because they had to be replaced by the boss's teeth at the time. BDO Flattens The Ultimate Duo's Main Hand Weapon Min AP Max AP Avg AP Ex AP Adj AP Eff AP Slot Impt Note Bares 79 87 83 22 18.7 101.7 1 All Species Yuria 84 93 88.5 22 18.7 107.2 1 Human Only Rosar 85 94 89.5 0 89.5 2 2 Slot Kalis 81 99 90 0 90 1 High Hospital Weapons above is what you see usually discussed in these threads. IMO, Bares, Yuria, and Kalis are the only ones being considered. Main hand weapon: This is a choice between Bares & Yuria = Kalis I will go into more details on WHY in the next segment. BDO Leveling Weapons Duo Ultimate AP DP Acc RS Offhand 12 23 84 35 AP Offhand 28 2 0 30 Above is the only 2 correct options (No Rosar? Holding Hold horse – will explain). Off-hand weapon: Accuracy Offhand is well-liked versus the Pure AP. I will discuss more details on WHY in the next segment. BDO Leveling Weapons – Why good is good. In this segment I will focus on WHY these evenly distributed weapons recommendations are selected, while the data in the table speaks for itself, the discussion also helps. Main hand weapon: This is a choice between Bares & Yuria = Kalis, why? Bares has an effective AND customized AP of 101.7 against ALL TYPES OF MONSTERS. Yuria has an effective and adjustable AP of 107.2 against HUMANS and PVP. Kalis has an effective AP and adjusted only 90 - but has a high Notable Score. Offhand Weapons: Accuracy & Pure AP Pure, why? Offhand Accuracy is a 100% responsible option. The only other option for beginners is the ALL AP option, which is niche and nice to have. For now, here's a list of accuracy offhands. BDO Leveling Weapons – Why don't we use the others I would also like to add WHY dismiss some of the older, or oft hear the weapons recommendations leveling NOT UNTIL PAR NOW. Here are some writings: BDO Flattening guns for the alts, or for the rich Here we are talking about guns that are an option for those who don't level up the first time. Luckily Black Desert has a system to make leveling alts very easy. BDO Leveling Weapons - Summary & Everything you need to know Bares only works anywhere. No BS. Kalis works as a perfect backup weapon because of his high hospital. You can also use it every now and then as an experiment as to whether the rs gets pushed up to new heights. If your main weapon explodes or ends up as a PRI due to roulette upgrades – you can cover with your Kalis easily. Yuria is great for PVP and human milling - by a considerable margin. That limitation, however, is not something many people are willing to suffer. But it's only so powerful in that scenario that it's good to call it the same as Kalis. What would I do personally, if I could turn back the time? Mainhand: Bares, with Kalis as backup. In person: Accuracy, with PURE AP as a side project. Well that's about it for a selection of the best weapons to level up, or a new player starting out in Black Desert Online. I know there are a lot of confusing things for beginners in this game, but hopefully this little guide helps you to not waste resources increasing dead end weapons. Support us in Patreon!
