First Steps Pairing Step 1: Dislocating two headphones from the battery box will power automatically. Step 2: Update your mobile phone's Bluetooth device, pair Redmi AirDots_R. The left ear doesn't need to be matched separately. It can be connected automatically. Note: If you put the headphones back in the charging box and the red light is turned on, Redmi Airdots automatically shuts down. If you take out your headphones and turn on the white light, Airdots automatically connects back. How do I reset Redmi AirDots? Step 1: Tap the multifunctional key for 15 seconds until the red and white light flashes alternately three times on and off, the device reset successfully. Step 2: Ignore or unpair Redmi AirDots_R, in the list of Bluetooth devices for mobile phones. Remove the connection record and complete the reset. How to manage a functional key? 1.Answer/hang/reject phone call When the incoming call comes, click on the multifunctional key to answer the phone. During a phone call, press a multifunctional button to hang up. When the incoming call comes in, press the multi-functional key for a long time to reject the phone. 2.Play/suspend music When the music player is running in the background, light-press function to play or suspend music. 3. Turn on the voice assistant On standby to double-click the function key to start the voice assistant Note: The phone must support voice control function and enable a quick wake-up setting. Xiaomi Redmi Airdots supports voice control of Xiaomi Xiaoi, Siri and Google Assistant. Redmi AirDots supports third-party chat and voice input on iOS, while Android uses the phone's default microphone when typing a voice. 4.The volume adjustment of Xiaomi Redmi Airdots does not support volume control, you need to adjust the volume with your phone. Remove the product from the packaging and all protective tape and stickers 2. Place the headphones back in the charging case and plug in the USB to charge for an hour or so. It should be light red when charging on the box and headphones. Red also means that it is disconnected from Bluetooth. 3. If there is a white light when taken out of the box, it means that it is connected to a Bluetooth mobile phone. When there is white light, when in the charging box for a minute and then comes out, it means that the headphones are fully charged. Setting up and pairing: 1. After charging, remove the headphones from the charging box and turn them on. 2. Turn on Bluetooth and search for Redmi AirDots_R or Redmi AirDots_L depending on which headphones are taken out in a pair of devices. If it doesn't show up, please update your Bluetooth device list and search again. The other part of the ear should be connected automatically. 3. Pair only one of (the only one) took out the earpiece and the white light will flash quickly for about 4 - 5 seconds as soon as the white light starts flashing slowly, check the list of Bluetooth devices on your smartphone and pair it. Works on both sides of the headphones. On/off headphones: 4. Turn the headphones on the press with a multifunctional key (about 1 - 2 seconds). 5. To turn off the earpiece, either put it back in the charging box or press the multifunctional key for about 5 seconds until the white light turns red and then off. Operation: 1. Call function (answer, hang up or reject call) - Incoming calls: Click on the multifunctional key (the end of the earpiece) to answer the phone and click the multifunctional key again hang Music or video Xiaomi Redmi AirDots Guide for users Now you know how to use Xiaomi MiDot Airs.
