INGREDIENTS: Brewers Rice, Whole Grain Corn, Chicken Food, Pea White, Egg Product, Pork Fat, Corn Gluten, Chicken Liver Flavor, Dried Beet Cellulose, Lactic Acid, Pork Liver Taste, Soy Oil, Potassium Chloride, Iodized Salt, Phosphate Diction, Vitamin (Vitamin E Supplement, Vitamin B12 Supplement, Pyridoxine Hydrochloride, Biotin, Folic Acid, Vitamin D3 Supplement), Calcium Carbonate, Shellium Seeds Hask, Choline Chloride, L-Tryptophan, Taurine, minerals (ferrosulfate, zinc oxide, copper sulfate, manganese oxide, calcium iota, sodium selenium), mixed tocopherols for freshness, natural flavors, beta-carotene.

INGREDIENTS: Water, Turkey, Pork Liver, Rice, Modified Rice Starch, Whole Grain Corn, Egg Product, Chicken, Chicken Flavor, Chicken Liver Flavor, Dried Beet Cellulose, Powder Cellulose, Potassium Chloride, Caramel Color, Dicalcium Phosphate, Flaxseed, L-Lysine, Iodized Salt, Psyllium Iodized Salt, Psyllium Seed Husk Choline Chloride, vitamins (vitamin E supplement, L-Ascorbin-2-polyphosphate (source of vitamin C), ascorbic acid (source of vitamin C), Thiamin Mononitrate, Niacin supplement, Fancotenate calcium, vitamin A supplement, vitamin B12 supplement, biotin, pyridoxine hydrochloride, ribi, Folic acid 3 supplements), L-tryptophan, taurine, minerals (zinc oxide, ferrosulfate, manganese sulfate, copper sulfate, and calcium), beta-carotene. Recipe Diet® *i/d*® Pet Dog Feed is specifically designed by nutritionists and veterinarians for digestive care and clinically proven nutrition to address diarrhea in just 3 days. Clinically proven, highly digestible diet helps to solve diarrhea in just 3 days. Prebiotic fibers are shown to significantly increase beneficial gut bacteria and maintain a healthy G. AI microbiome balance psyllium to promote healthy bowel mobility and regularity These characteristics make prescription diet® *i/d*® Dog veterinary exclusive pet feed, beneficial as a nutritional aid for dogs with gastrointestinal disorders or recovery problems, and growing puppies: Assimilation (including protein, fat and carbohydrates) High provides easy absorption of gastrointestinal nutrients. Prebiotic fiber Added promotes a healthy and balanced gut microbiome, fuels intestinal cells and ultimately supports a healthy intestinal barrier. Electrolytes and B-vitamins High helps replace key nutrients lost with diarrhea and vomiting. Soluble and insoluble fiber Blend Added helps maintain digestive balance and digestive health. Moderate fat provides adequate nutrient intake with small portions of food. and -6 fatty acids and clinically proven antioxidants Added essential fatty acids help maintain healthy skin and a luxurious layer. Antioxidants Antioxidants maintain a healthy immune system. 100% satisfaction guarantee or your money back. If you are not satisfied for any reason, return the unused part to your Hill's authorized retailer for a full refund or replacement. Made in our U.S. at other facilities with U.S. and imported ingredients. Acute and Chronic Gastrointestinal Disorders Recovery Problems Growth and Development This highly digestible formula is useful for supporting gastrointestinal healing, and in combination with moderate levels of fat, the Prescription Diet® *i/d*® Dogs suitable for patients with pancreatitis without concurrent hyperlipidemia. Note: *i/d*® dogs can be fed in the long term to patients requiring highly digestible foods with moderate levels of fat. *i/d*® canned food is designed to meet the needs of patients with exocrine pancreatic insufficiency and other conditions leading to maldigestion and/or malabsorption. For optimal recovery from acute GI disease, it is recommended to feed this food for at least 7 days (1-2 weeks for acute cases, 3-12 weeks for maldigestion or long-term as needed). Appropriate nutrient levels meet the specific nutritional needs of puppies and adult dogs. Supplied in 2 kibble sizes, regular and small bites. For patients with colitis, gastroenteritis, vomiting or inflammatory bowel disease (IBD): Recipe diet® *z/d*® dogs, Prescription diet® *d/d*® dogs or prescription diet® *i/d*® Sensitive dogs for patients with colitis, Diarrhea or Constipation: Prescription Diet®® Dog for Patients with Flatulence: Prescription Diet® *i/d*® Sensitive Dog or Prescription Diet® *g/d*® Dog for Patients with Pancreatitis: Recipe Diet® *i/d*® Low Fat Dogs, Prescription Diet® *i/d*® Dogs up to 30 pounds), a recipe for a diet® a train® dog (*dry*) or a recipe diet® *p/d/d*® dog for dog up to 30 pounds with stress-related GA disorder, including stress-collitation: Recipe diet® *i/d*® Stress dogs for growing puppies: Science Diet®, a healthy and useful treatment for dogs with adverse reactions to nutrition, inflammatory skin disease, or gastrointestinal disorders, and for dogs to eliminate feeding tests: Prescription diet® Hypo-Cures How to adjust feeding amounts to maintain optimal weight. Adjust the amount of feeding as needed to maintain optimal weight. Monitoring your patient's condition will provide a nutrition recommendation for the best results. We recommend feeding recipe food® dry food, canned food, and treats exclusively. Gradually switch to new food within 7 days. Small, frequent meals (3-6 times a day) are often appropriate in cases for which *i/d*® Canine is commonly used.
