Bisnis.com, JAKARTA - One of the innovations of the Ministry of Environment and Forestry (KLHK) has once again entered the top 99 or Top 99 innovations of the public service in 2020 from the Ministry of Use of the State Apparatus and Bureaucratic Reform (Kemenpan-RB). KLHK is an innovation of the National Forest Monitoring System (NFMS) or also called the National Forestry Monitoring System (Simontana). NFMS or Simontana is a system created by KLHK to provide reliable, reliable and reliable forest resource and spatial information in the area of better national forest management and environmental quality. Simontana can monitor forests across Indonesia so that the public can quickly and accurately know the dynamics of current forest conditions. LHK Minister, Siti Nurbaya expressed her excitement after getting Simontana's words managed to enter the Top 99 Public Innovation Service. Alhamdulillah, I am proud of the success of Simontana innovations, as well as other KLHK innovations that can provide benefits to society and the country. said City, Friday (6/19/2020). According to Siti, this is the fourth time in a row since 2017 that KLHK has been praised and recognized in terms of innovation in information technology, which is good in helping its decision-making. All products and employees work with the support of the state budget and science. The important thing about this recognition is that KLHK's steps and efforts are on the road to correct concept and public acceptance. That is, KLHK's hard work in creating work and decision-making models in the areas of natural resources, forests and environment management is becoming more systematic. I know very well and believe that it is not easy to develop it, because, in addition to the technical aspects, there are aspects of values such as openness, honesty, unity, measurable work, and are open to constructive critical notes, as well as work ethic, and competitiveness, that will continue to stimulate progress. Thank you and high appreciation I express for the hard work of ASN KLHK in providing services to the public, Siti. Siti said in particular Simontana aims to present data on land closures in a series, including its changes in the form of deforestation, reforestation and forest degradation to plan and monitor forest resources and the environment, which may reflect the level of success of the interracial period. Come on, help with donations right now! Click here for more information Information. Photo: Dadan Sudariya Samalinda - Not just Berlian (Ojek Online Bersama Lindungi Anak), the Government of Kaltim Province has also adopted another innovation in the Top 99 innovations of the public service in 2020 by the Ministry of Use of State And Bureaucratic Reform (PANRB). Another kaltim innovation that has been announced to be nominated in the Top 99 Public Service Innovations 2020 is the Halal Food Products Program for East Kalimantan (Pahala Kaltim). This program is an innovative product of the Department of Livestock and Health (DPKH). The head of the DPH, Kaltim X Dadang Sudaria, explained the backstory of the Kahala program for Kaltim, none other than because Indonesia is the largest Muslim country in the world with a Muslim population of 209.1 million people, including Kaltim. Thus, halal is a mandatory sharia for Muslims. The Government has an obligation to protect and guarantee the halal of products consumed and used by the public. Dadang describes Halal Product Guarantee Act 33/2014 (JPH), which regulates products that enter, circulate and trade in Indonesia, must be certified by the Halal Inspection Agency (LPH). The implementation of Pahala for Kaltim, continued Dadang Suardnya, was carried out by UPTD Laboratorium Keswan dan Kesmavet (LKK) in conjunction with provincial, district and city governments of interested parties, MUI Kaltim, business people and the media. They support the formation of an effective team to introduce structuring and supervision of halal and hygienic products. Rewards for Kaltim continues to be socialized to raise public awareness of the importance of halal and hygienic products. We are also cooperating with the media, including the Setda-Kaltim Provincial Public Affairs Bureau, Dadang Sudaria said Friday (26/6). A number of media outlets that are part of the collaboration include SCTV, Tepian TV, Kaltim Post and Kaltim Newspaper. The collaboration aims to raise awareness among consumers and manufacturers about the importance of halal labelled products. Make Pahala for Kaltim a joint commitment was made in the form of support in the form of an application for understanding in halal certification from local and private authorities, including livestock enterprises. We also work with a number of hotels. Including the creation of a comprehensive group on the structuring and supervision of halal and hygienic products in accordance with the government of Kaltim Region No. 2 2014, he said. Pahala's program for Kaltim, Dadang continued, influencing the food business evaluation task force. Since this innovation is implemented in the form of food halal surveillance, food counterfeiting in Kaltim is very high since 2012 can be nipped. The results of our assessment, our assessment, socialization, coaching and bullying, then in 2018 the incidence of counterfeiting has decreased significantly, Dadang explained. This innovation ensures the inner rest of society in the availability of halal food. It also shows the reaction of people who are satisfied with the lab's work and innovation also contributes to the initial view of the region (PAD) through testing conducted. The benefits of Pahala for Kaltim, Said Dadang also give a sense of security to the community, so there is no need to be careful anymore with traded products because it is guaranteed halality. This includes improving competitiveness and improving the income and standard of living of businesses. The Kaltim government is currently fighting to make the Kaltim Award in the top 45 innovations of the public service in 2020. Thus, for all walks of life Kaltim can support by sending support comments: Info.sinovik@Menpan.go.id, Dadang sudarya message. One of the innovations of the Ministry of Ecology and Forestry (HLHC) has once again entered the top 99 or top-99 innovations of the public service in 2020 from the Ministry of State And Bureaucratic Reform (Kemenpan-RB). KLHK is an innovation of the National Forest Monitoring System (NFMS) or also called the National Forestry Monitoring System (Simontana). NFMS or Simontana is a system created by KL HK to provide reliable, reliable and reliable forest resource and spatial information to better manage national forests and improve environmental quality. Simontana can monitor forests across Indonesia so that the public can quickly and accurately know the dynamics of current forest conditions. Environment and Forestry Minister (LHK) Siti Nurbaya expressed her excitement after receiving Simontana's words made it into the Top 99 Public Innovation Service. Alhamdulillah, I am proud of simonana's success in innovation, as well as other KLHK innovations that can provide benefits to society and the country, said Siti Nurbaya, Friday (19/6). According to the Minister of the City, it is in the top 99 innovations of the public service for the fourth time in a row and annually from 2017. KLHK has been praised and recognized for good innovation in information technology, helping to make decisions. All products and employees work with the support of the state budget and science. original domestic. - said the minister of LHC. Siti Nurbaya also noted that the recognition shows that KLHK's steps and efforts are already on the right track and are understandable and recognized by the public. This means that our efforts to create working models and decision-making in the areas of natural resources, forests and the environment are all I know very well and believe that it is not easy to develop it, because, in addition to the technical aspects, there are aspects of values such as openness, honesty, unity, measurable work and openness to the acceptance of constructive critical notes, as well as work ethic, a competitive nature that will continue to stimulate progress, he explained. Thank you and I appreciate the hard work of ASN KLHK in providing services to the public, said Minister City. City of Nurbaya further stated that, in particular, Simontana was seeking to provide data on the closure of serial land, including changes in the form of deforestation, deforestation and forest degradation, to plan and monitor forest and environmental resources that may reflect success rates between periods. Simontana also provides data on a variety of needs, including support for the preparation of the Indonesia Environmental Quality Index (IKLH) in one province, where forest closure data are one of the indicators. City of Nurbaya also confirmed that Simontana is now used as a major supporter of the IRV REDDH system (measuring, reporting and verifying emissions from deforestation and forest degradation) of the land sector system and making results-based payments. In addition, Simontana is also used as a means of reporting greenhouse gas reserves, reporting on forest resource assessments - FAO, forest emission training (FREL) and other international needs, he explained. Simontana as one of the innovations of KLHK has successfully become the Top 99 innovations of the public service with 2017, 2018, 2019 and 2020. (RO/OL-09) (RO/OL-09)
