APCCombo Application Social Omegle 1 · Lujuple January 20, 2018 (3 years ago) Omegle. Talk to strangers! Omegle connects you with random, anonymous strangers for a real-time private chat under the pseudonyms You and Stranger. This does not require registration. You can also sort strangers by common interest. Features and modes : ✓ 1-on-1, or ask/answer question mode (see below) ✓ Language Compliance and Common Interests. ✓ Notifications. gives you and a stranger a random question to discuss. The question is given by a third stranger who can watch the conversation but cannot join. What's new Modes. Email: e-mail liutheyu@outlook.com See more The best anonymous chat in the world, Omegle, now comes with an Android version that you can use to start secret conversations with millions of people from a very simple interface. The options for the conversation found in the mobile version are the same as in the web version: regular chat and spy mode. With the first you can talk to a random person about everything you want, always with the option to choose another random person if the first tires you. In spy mode, you send a question that starts a conversation between two strangers and you can't get involved. The moment one of the two shuts down, the other conversation starts with two other random people. All you do is read their posts. If you've had a conversation with someone and you don't want to lose it, you can save it on a mobile device or share it with Facebook friends who can read it all as soon as it's posted. Allow yourself to get carried away with anonymous chat and make friends around the world with Omegle. Download Omegle for Android Download the APK file Android 4.0 and above required. Download Omegle for PC Although the Omegle PC app is not published, we can still run the android app on the PC using the following method: Download the Nox or BlueStacks emulator. Complete the installation of the preferred emulator and run it. Open the web browser and open the Install our Omegle APK file through the emulator. The app will run smoothly on your computer.
