PEMASANGAN INSTALLATION 1: Use the Supplied WiFi cable: Connect the micro USB head to AnyCast and then plug the USB cable head into a usb power or charger (5V 1A). 2: Connect AnyCast to the TV's HDMI port and switch to the right input. NOTE : - 5V USB power or charger with a minimum current of 1A is required for a stable Wi-Fi connection. -You can reset Anycast by clicking on Anycast for 10 seconds. PEMASANGAN 1: Dengan kabel WiFi yg disediakan : Pasang kepala micro USB ke AnyCast and kepala USB ke sumber kuasa/charger USB. 2: Pasang AnyCast ke port HDMI TV and dan pilih input HDMI yang betul. NOTA: - Sumber kuasa Atau charger USB 5V dengan arus minimum 1A diperlukan untuk sambungan Wi-Fi yg stabil. -Untuk dump Anycast, thachan y tahan butang yg ada di anycast selama 10 saat sehingga ia reboot. ANDROID There are 2 ways for Android: Miracast mode and DLNA mode. We recommend using Miracast mode. 1. MIRAKAST MOD (recommended). Step 1: Turn on your Wi-Fi device, but don't connect it to Anycast. Step 2: Open Miracast feature on your Android. Miracast may have a different name depending on the phone model, such as: Screen Mirror/Wireless Display/Miracast/Smart View/PlayTo/Multi Screen/Fast Connection/HTC Connect, etc. Usually it is under a quick setup (falling down the menu) or wireless networks or display or more settings. You can see some samples here: CLICK HERE If you haven't found it, install the Miracast label app from the Playstore as 'Miracast Screen Mirroring Shortcut' or 'Wifi Display (Miracast)' Open it up and it will take you to the Miracast feature. Step 3: Turn on Miracast and let it search anycast for a while. When you're hired, select Anycast to run. If the device is not found, please turn off Anycast and Wi-Fi of your device for a minute and try again. Make sure the Miracast feature is on and your device's Wi-Fi is on. A phone with a minimum of 1GB of RAM is recommended. Sample video using a quick setting (drop down menu) of the Smart View : Video example using the Wifi Display (Miracast) app from the Playstore : Video example using the phone menu (Senfon 3) : Set up the web and the internet to zgt; More playto. \_\_\_\_\_ 2. DLNA MODE (requires a Wi-Fi router. Step 1: Go to your device's Wi-Fi, find Anycast-xxxxxx, enter password 12345678 and connect. Step 2: Open your internet browser, enter 192.168.49.1 and go. Then click the WiFi AP button. Step 3: Click The Scan button and select your Wi-Fi. Enter your Wi-Fi password and connect. Anycast will restart and connect to your Wi-Fi router. Step 4: Connect Wi-Fi in addition to the wi-fi router used in step 3. Step 5: Install the DLNA sharing app from the Play Store like iMediaShare and follow the instructions. Make sure your phone and Anycast are connected to the same Wi-Fi router. Note: Note: Wi-Fi is not available when you connect to your Wi-Fi router. If you want to go back to anycast, enter the IP address that appears on your TV screen in your internet browser. AnyCast is a Wi-Fi display that supports the Miracast standard for Android and Microsoft Windows, and DLNA for a home multimedia app. In addition, it also matches the Apple Airplay mirror image for iOS and Mac OS X. Enjoy a mirror image of the screen with AnyCast! Continue reading AnyCast is a WiFi display receiver that supports the Miracast standard for Android and Microsoft Windows, and DLNA for a home multimedia app. In addition, it also matches the Apple Airplay mirror image for iOS and Mac OS X.
