You may know specifically what you want in a soul mate, or you may have no idea what you are looking for as a partner, but you know that you want someone to connect with, love, share your ideas and feelings, and share your soul with. Someone who loves you unconditionally and you love them just as much. Someone who makes your life better, someone you fully trust, no doubt. You are so comfortable with this person that it seems that you have known them for several lifetimes. Your soul mate brings the best of you, even when it's hard. If this is what you want, please continue this meditation as you are on your way to manifesting it in your life. Your subconscious is most comfortable and open to suggestion when you are unconscious in a dormant state. You may be sleeping, but your subconscious is busy at work. While sleeping, your subconscious mind engrains your thoughts by learning and solving the problems of the days. These last few minutes before you sleep, the time when you are between waking and sleeping, this is the most important time for you to focus on the positive and focus on what you want in your life. Your subconscious will take this information and use it for the next 8 hours of sleep. Now you will focus you subconsciously on attracting your soul mate. Make sure you are comfortable and ready for bed. You will be guided down through this meditation in a relaxed state while you are fully asleep. Follow along with meditation for as long as you want. If you feel tired, just let go and feel free to fall asleep. Your subconscious will take from there. Over there.
