Founded in 1856, UMD is the flagship institution of the University of Maryland system. It is also the largest university in both the state and the Washington metropolitan area, with more than 41,000 students representing 50 states and 123 countries and having a global student network of more than 360,000. Together, 10.12 schools and universities offer more than 200 degree conferment programs, including 92 deans, 107 master's programs and 83 doctoral programs. UMD is a member of the American Association of Colleges and Universities and participates in inter-college athletics as part of the Big Ten Conference [the University of Maryland's proximity to the nation's capital makes it a number of research partnerships with the federal government.] [12] Receive research funding and institutional support from agencies such as the National Institutes of Health, NASA, the National Institute of Standards and Technology, the Food and Drug Administration, and the Department of Homeland Security. [13] [14] It was R1: Ph.D. University - Very HighActivities[15] and labeled Public Ivy show the quality of education comparable to the private Ivy League. [16] UMD is ranked by multiple indexes in the top 100 universities nationwide and globally [[18][19] In 2016, the University of Maryland, The University of College Park, and the University of Maryland, Baltimore, formalized strategic partnerships after collaboration led to more innovative medical, scientific, and educational programs. [22] [23] As of 2017, the University of Maryland has an operating budget of about \$2.1 billion. [25] According to the National Science Foundation, the university spent \$540 million on research and development in 2018, ranking 47th nationally [27] in October 2017, when the university received a record \$219.5 million from the A. James & Alice B. Clark Foundation, ranking among the largest charitable donations to public universities in the country. [29] History Article: History of the University of Maryland, Early History of College Park Charles Benedict Calvert (1808-1864), predecessor of UMCP on March 6, 1856, predecessor of today's University of Maryland, chartered to the University of Maryland Agricultural University[31]. Two years later, Charles Benedict Calvert (1808-1864), a future U.S. Congressman in Maryland's 6th Congressional District from 1861 to 1863, was a descendant of Lord Baltimore, a Maryland colonial manager in 1634, during the Civil War, and a Maryland colonial manager in 1634. I purchased. Later that year, Calvert founded the school and served as acting president from 1859 to 1860[19] and on October 5, 1859, the first 34 students enrolled at Maryland Agricultural University. In February 1864, the school became a land-subsidized university. Built in 1898, The Bankrupt and Reconstruction Morrill Hall is the oldest academic facility on campus [During the Civil War, Confederate soldiers under Brigadier General Bradley Tyler Johnson, on July 12, 1864, by Jubal Early in Washington, D.C. 34] as part of the raid, financial problems forced administrators to sell 200 acres (81 hectares) of land. For the next two years, the campus was used as a boys' prep school. After the Civil War, in February 1866, the Maryland Legislature took on ownership of half of the school. The university thus became a state institution in part, and by October 1867, the school had reopened with 11 students. Over the next six years, enrollment has increased and schoolst was rewarded. In 1873, Samuel Jones, a former Allied major general, became president of the university. [35] Two decades later, a federally funded agricultural experiment station was established. During the same period, state law gave the university regulatory powers in several areas, including managing farm diseases, inspecting feed, establishing geological surveys with the state Weather Service, and housing forestry commissions. [1] Morrill Hall, the oldest education building still in use on campus, was built the following year. During the fire on November 29, 1912, the great fire of 1912 destroyed the barracks where the students were housed, all school records, and most of the academic buildings, leaving only Morrill Hall untouched. There were no injuries or fatalities, and all but two students insisted on returning to the university and continuing classes. No new administrative buildings were built until the 1940s, but [1] large brick and concrete compasses inlaid on the ground, housed by families in neighboring towns until the houses were rebuilt, designate the former center of the campus that existed in 1912. Modern History The University of Maryland campus appeared in 1938 before a dramatic expansion designed by President Byrd, the state ruled the school in 1916, and the institution was renamed Maryland State University. That year, the first female students entered the school. On April 9, 1920, the university was part of the existing University of Maryland, replacing St. John's College, Annapolis as the university's undergraduate campus. [36] In the same year, graduate schools on the College Park campus were awarded their first PhDs, reaching 500 enrollments. In 1925, the university was accredited by the Association of American Universities, and by the time the first black students entered the university in 1951, the number of enrolled students had 30,000. Of those, 4,000 were women. Before 1951, many black students in Maryland enrolled at the University of Maryland's Eastern Shore. In 1957, President Wilson H. Elkins moved to increase the academic standards of the university. His efforts created one of the first academic probation plans. In the first year the plan took effect, 1,550 students (18% of all students) faced expulsion. On October 19, 1957, Britain's Queen Elizabeth II attended her first and only college football game at the University of Maryland after showing an interest in watching typical American sports on her first tour of the United States. The Maryland Terrapins defeated the North Carolina Tar Heels, 21-7, and are now called the Queen's Game. [39] The Memorial Chapel Pi beta Kappa founded a chapter at the universityIn 1969, the university was elected to the Association of American Universities, and the school continued to grow, reaching 38,679 enrollments by the fall of 1985. Like many universities during the Vietnam War, the university was a place of student protest and had a mandatory curfew by the National Guard. In a major reorganization of the higher education system in 1988, it was designated as the flagship campus of the University of Maryland system (later changed to the University of Maryland system in 1997) and officially designated as University of Maryland College Park[All five campuses in the old network were designated as different campuses in the new system. However, in 1997 the Maryland General Assembly passed a law to make the University of Maryland College Park known as the University of Maryland, recognizing the campus's role as the flagship institution of the University of Maryland system. The University of Maryland's other university system, named University of Maryland, is not the satellite campus of the University of Maryland College Park. The University of Maryland, Baltimore, is the only other school allowed to award certain degrees from the University of Maryland; in 1994, the National Archives in College Park completed construction and opened on a parcel of land adjacent to the campus donated by the University of Maryland. [42] [43] In the 21st century, in 2004, the Company bebed construction of a 150-acre (61-hectare) M-Square Research Park belonging to the New National Weather and Climate Prediction Center, which belongs to the U.S. Department of Defense, the Food and Drug Administration, and the National Oceanic and Atmospheric Administration (NOAA). In May 2010, ground broke at a \$128 million, 158,068-square-foot (14,685.0 m2) physical science complex that included an advanced quantum science laboratory. Wallace Law became president in 2010. The university's High Expectations campaign from 2006 to 2012 exceeded \$1 billion in private donations. The university was hit by multiple data breaches in 2014 [initially resulting in the loss of records of more than 300,000 students and faculty. [48] The second data breach occurred a few months later. The second breach was investigated by the FBI and Secret Service and found to have been carried out by David Helkowski. [50] Despite attribution, no charges were filed. As a result of the data breach, the university offered free credit protection to affected students and faculty for five years. In 2012, the University of Maryland at College Park and the University of Maryland at Baltimore unified their national initiatives under MPowering.Strengths of both institutions. [52] [53] The University of Maryland Strategic Partnership Act of 2016 formally formalized the partnership [[21][23],[23] a University of Maryland district plan developed under President Wallace Law and the College Park City Council in 2011 to improve housing development, transportation, public safety, local pre-K-12 education, and support sustainability projects. It aims to make the city of College Park a top 20 college town by 2020. As of 2018, the university is involved in more than 30 projects and 1.5 million square feet of development as part of the Greater College Park Initiative, equivalent to more than \$1 billion in public-private investment. The university's vision is to revitalize the campus to foster a dynamic and innovative academic environment, as well as to work with surrounding areas and local governments to create a vibrant downtown community for students and faculty. [57] [58] As of February 12, 2020, it was announced that Darryl J. Pines would become the 34th President of the University of Maryland College Park from July 1, 2020. [4]. Darryl J. Pines has been dean of the A. James Clark School of Engineering and professor of aerospace engineering at Nariman Falberdin since January 2009. Darryl J. Pines has been in college park at the University of Maryland for 25 years since arriving in 1995 and starting as an assistant professor. [60] Scholar Profile The University of Maryland offers 127 undergraduate degrees and 112 graduate degrees at 13 universities and schools: A. James Clark College of Agriculture and Natural Resources University College of Language, Letters and Culture University of Computer Behavior and Social Sciences, Mathematical Sciences, and School of Planning and Conservation, Faculty of Public Health, University of Natural Sciences It is centered around both academic programs selected by students and selection of core

coursework that meets general education requirements. [61] Stairway on the South Campus The University offers a Living Learning program that allows students with similar academic interests to live in the same residential community, take specialized subjects, and conduct research in those specialties. An example is Honors College, which is designed for undergraduates who meet high academic requirements and consists of some of the university's honors programs. Honors College welcomes students to the community of faculty and undergraduates.7 Living and Learning Programs: Advanced Cybersecurity Experience for Students, Design Culture and Creativity, Entrepreneurship and Innovation, Honorary Humanities, Gemstones, Integrated Life Sciences and University Honors. The Advanced Cybersecurity Experience (ACES), which began in 2013, is overseen by Michelle Kukie and is run by faculty, staff and graduate students. ACES students will be housed at Prince Frederick Hall and will take a 14-credit, two-year curriculum that educates future leaders in the field of cybersecurity. ACES also offers complementary two-year miners in cybersecurity, Design Culture and Creativity (DCC), which began in 2009, is overseen by artist Jason Furman and run by faculty and graduate students. The DCC program encourages exploring the relationship between emerging media, society and creative practice. DCC students will be housed together in the Prince Frederick Residence Hall and will take 16 credits, a two-year interdisciplinary curriculum culminating in Capstone. The Entrepreneurship and Innovation Program (EIP) is a living and learning program for first and second year students at Honors College that help build entrepreneurship, skill sets and relationships for the development of solutions to today's problems. Through learning, courses, seminars, workshops, competitions and volunteer activities, students receive an education in entrepreneurship and innovation. In collaboration with faculty and mentors who have launched new ventures, all student teams develop innovative ideas and create product plans. The Humanities of Education is an equality program for undergraduates interested in the humanities and creative arts. The selective two-year living learning program combines a small liberal arts college environment with the resources of a large research university. Gemstone is an interdisciplinary four-year research program for students of all majors who have chosen a faculty. Under the guidance of faculty mentors and Gemstone staff, a team of students will explore the interdependence of science and technology with society and design and conduct research directly. Integrated Life Sciences (ILS) is an equal program for students interested in all aspects of biological research and biomedical science. The University of Computers, Mathematical and Natural Sciences has partnered with the Honorary University to create an ILS program that provides nationally recognized innovations in life sciences and interdisciplinary training of pre-medical students. The purpose of the ILS experience is to prepare students for success in graduate school, medicine, dentistry, or other vocational schools. [70] University Honors (UH) is the largest living learning program at Honors College, allowing students maximum independence in shaping their education.And other undergraduates are committed to a broad and balanced education. [71] Students will choose from more than 130 seminars exploring interdisciplinary themes in three areas: contemporary challenges and challenges, the art and science of the modern world, and the use of the world as a classroom. The College Park Scholars Program is a two-year life learning program for first and second graders. Students are selected to enroll in one of 12 themed programs: Art; Business, Social, Economic Environment, Technology, Economic Global Public Health; International Studies; Life Sciences; Media, Self, Social And Public Leadership; Science and Earth Change; Science, Discovery, Space; Science, Technology and Social Students live in dormitories in the Cambridge community on the North Campus. Working on McEldin Mall, the nation's first live entrepreneurship program. Ceo Hin man is targeted at students interested in starting their own businesses. We provide resources for students from all disciplines to live together and explore business ventures. Quest (Quality Improvement Systems and Teams) Best Fellow Program is designed for undergraduates in business, engineering, computers, mathematics, and physical sciences. QUEST students attend courses focused on inter-department collaboration, innovation, quality control and teamwork. Since its founding in 1908, the Department of Civil and Environmental Engineering (CEE) has long been considered an excellent engineering department of the university. Other life learning programs include CIVICUS, a two-year program of the School of Behavioral and Social Sciences based on five principles of civility society. [77] The Global Community is a program that allows students to live and practice with the same language in diverse cultures (students from all over the world live in the community) and language houses[79]. The mock trial team participates in an inter-university mock trial competition. The team, which first started competing in 1990, won five national championships (2008, 2000, 1998, 1996 and 1992) and finished national runners-up in 1992 and 1993. [81] Faculty's Main Article: University of Maryland List, College Park Faculty College Faculty includes 4 Nobel Laureates. Forty years later, physics professor William Daniel Phillips won the Physics Prize in 1997 for his contribution to laser cooling, a technology that slows the movement of liquid atoms. Thomas, Emeritus Professor of Economics and Public Policy, 2005He was awarded the Economics Prize for his contribution to game theory. In 2006, ad-time professor of physics and advanced astrophysicists at NASA John C. Mather won the Physics Prize along with George Smoot in the discovery of black body morphology and anykthema of cosmic microwave background radiation. Two University of Maryland graduates are Nobel Laureates. Herbert Hauptmann won the Chemistry Prize in 1985 and Raymond Davis Jr. won the 2002 Physics Prize. The university has many distinguished scholars, with mathematics professor Sergei Novikov winning the Fields Medal in 1970 and graduate Charles Pfeifferman in 1978. Graduate George Danzig was awarded the 1975 National Medal of Science for his work in the field of linear programming. Physics professor Michael Fischer was awarded the Wolf Prize [with Kenneth G. Wilson and Leo Kadanov] in 1980 and the IUPAP Boltzmann Medal in 1983. James A. York, a distinguished university professor of mathematical physics and chair of the mathematics department, won the 2003 Japan Prize for a chaotic system. In 2013, Professor of Physics Sylvester James Gates was awarded the National Medal of Science. [82] Study On October 14, 2004, the university added 150 acres (61 hectares) in an attempt to create the largest research park inside known as the Washington, D.C. Capital Beltway, and Washington, D.C. Many of The University of Technology's professors, Glenn L. Martin, are funded by federal agencies such as the National Science Foundation, the National Institutes of Health, NASA[84] the Department of Homeland Security, the National Institute of Standards and Technology, and the National Security Agency. These relationships have created many research opportunities for universities: taking the lead in national research initiatives on human and bird flu transmission and prevention. Hornbake Library The University of Maryland Library provides access to the academic information resources needed to fulfill the university's mission. Since 2008, the university has hosted the NSF-IGERT Interdisciplinary Graduate Training Program, which serves as a catalyst for broader integrated efforts in linguistic science, with contributions of 50 participating students and 50The University of Maryland also has two important go-around centers that connect basic research to important national needs in education and national security: the Center for Advanced Studies in Language (CASL) and the National Center for Foreign Studies (NFLC), which provide citizens and policymakers with research on U.S. political institutions, processes, and policies. CAPC is a nonpartisan, non-profit research institute within the Department of Government And Political Science in the School of Behavioral and Social Sciences. The Space Systems Laboratory studies human-robot interactions for applications in the space field and includes the university's only neutral buoyancy facility. The Joint Quantum Laboratory conducts theoretical and experimental research on quantum and atomic physics. The institute was established in 2006 in collaboration with the University of Maryland and the National Institute of Standards and Technology (NIST). The Technology and Systems Management Center (CTSM) is intended to advance the state of technology and system analysis for the benefit of people and the environment. It focuses on conducting investigations into reliability, risk, uncertainty and decision analysis. The Joint Institute for Global Change was founded in 2001 by the University of Maryland and the Pacific Northwest National Laboratory. The institute focuses on an interdisciplinary approach to climate change research. The Center for Advanced Life Cycle Engineering (CALCE) was established at the University of Maryland in 1985. CALCE is dedicated to providing a knowledge and resource base to assist in the development of electronic components, products and systems. The National Consortium for Terrorism and Counterterrorism Research (START) was launched in 2005 as one of the Centers for Excellence supported by the U.S. Department of Homeland Security. START focuses on scientific studies of the causes and
consequences of terrorism in the United States and around the world. Admissions to Maryland are rated more selective by U.S. News & World Report. The university received 28,301 applications for its class of 2019 (entering autumn 2015), acknowledging 12,637 (44.7%) with 3,937 enrolled and an admission yield of 31%. In the class of 2019, the mid-50% range of SAT scores for freshman enrollment was 590-690 for critical reading and 620-730 for math. The average score average (GPA) in high school was 4.22. From the 2017-18 admissions cycle, the University of Maryland uses applications provided by the Coalition for Access, Affordability and Success [92] joining more than 130 top public and private universities using the platform to streamline university applicationsFrom August 2018, the University of Maryland waives college application fees for U.S. military veterans and current service members applying for the 2019-2020 fiscal year. According to the Washington Post in 2017, the University of Maryland in 2016 was more selective than in recent decades because a general increase in public school applications helped Maryland's apparent rise in prestige. Of course, the prestige of this selectivity was based on the number of applicants and the accepted, but not the quality of the applicants. [96] Ranking University Rankings National ARWU[97] 31 Forbes[98] 63 THE/WSJ[99] 75 U.S. News & World Report[100] 58 Washington Monthly [101] 50 Global ARWU[102] 53 QS[103] 152 THE[104] 91 U.S. News & World Report[105] 51 USNWR Graduate School Ranking[106] Biological Sciences 62 Business 44 Chemistry 41 Clinical Psychology 33 Computer Science 16 Criminology 1 Earth Sciences 28 Economics 21 Education 27 Engineering 20 English 30 Art 110 History 27 Library & Information Research 8 Mathematics 22 Physics 14 Political Science 29 Psychology 39 Public Issues 32 Public Health 32 Sociology 24 Linguistic Pathology 16 Universities across the United States National Universities 2021 U.S. News & World Report rankings ranked 58th and ranked 19th nationally among public universities. The academic rankings of the world's universities were ranked 43rd in the world in 2015. The 2017-2018 Times Higher Education World University Rankings ranked Maryland 69th in the world. The university ranks among the Peace Corps 25 top volunteer producing colleges for the seventh year in a row in 2018. [108] The University of Maryland ranks among the top 20 colleges and universities in the U.S. that will produce the most graduates for faculty and staff in 2017. Kippinger's Personal Finance 100 Best Value at Public College 2015 ranks ninth in college for students in the state. For the fourth consecutive year in 2015, the university ranked first in the United States in the number of bohren scholarship recipients, with nine students receiving awards for intensive international language studies. The university is ranked by the U.S. Department of Education and Culture as the top producing institution for Fulbright U.S. students and scholars for the 2017 2018 year. [113] In 2017, the University of Maryland was ranked among the top 50 universities in the 2018 Best Global University Rankings by U.S. News & World Report based on its high academic research performance and global reputation. [115] [116] In 2018, the university was rankedTop 10 universities in the Princeton Review's annual survey of top schools for innovation and entrepreneurship. This was the third consecutive year of rankings. [117] [118] The Campus Walkway University campus along McEldin Mall mceldin mall in the fall is famous for its red brick Georgian buildings and its large central lawn, named McEldin Mall and nicknamed The Mall, the largest academic mall in the United States. [119] The white pillars adorn many buildings, with about 770 rows on campus. The planting of 1,500 trees and gardens spanning 1,250 acres (5.1 km2) of the university leads the American Public Gardens Association to designate the campus of the Maryland State Botanic Gardens. The designation allowed the university to display seeds and gardens, including native plantings. There are arboretum tours, including a centralized tree walking tour around McEldin Mall, with 56 specimen trees. In addition, there are nearly 400 acres (1.6 km2) of urban forests located on campus[122] and the Arbor Day Foundation has named the university on its Tree Campus USA list. Like Paint Branch Stream, a branch of the Northeast Branch Anacostia River, it cuts through the campus. [124] McEldin Mall functions as the center of the campus. The academic building surrounds McEldin Mall at the northern and southern ends and is home to many departments of the School of Behavioral and Social Sciences, the Faculty of Arts and Humanities, and the University of Agriculture and Natural Resources. West of McEldin Mall was the North Hill community, and south of McEldin Mall were Morrill Hall and Morrill Quad, the original center of the campus. South of the Morrill Quad is the South Hill and South Campus Commons communities, and southwest is southwest of the Southwest Mall and Robert H. Smith Business School. Running parallel to McEldin Mall to the north is Campus Drive, the main thorough fare through campus .Adele H Stamp Student Coalition sits along Campus Drive near the center of the campus and shuttles UM (university bus service) and city buses to pick up and drop off passengers as a transit center for campuses. Hornbake Plaza, home to the Hornbake Library, and several buildings housing the academic department are also on Campus Drive, east of The Stamp. Stamps will function as a center that includes a food court, bowling alley, bookstore and space available for major events such as freshman orientation and career fairs. The winter campus walkway outside the Stamp Students Union on Armory Campus Drive near the South Commons residential area is Jim HensonMemorial Garden in honor of the late Jim Henson, a Maryland graduate. Henson's similarity sits on a park bench, facing arguably his most famous creation, Kermit the Frog. To the north and northwest of Stamp and Hornbake Plaza are the North Campus Community, Maryland Stadium, Eppley Recreation Center (the main gym on campus), the XFINITY Center, and Oued Hill Rock, a 22-acre (8.9-hectare) forest next to the XFINITY Center. The stadium drive runs between the more southern Maryland Stadium and the rest of these. The Clarice Smith Performing Arts Center is located west of Maryland Stadium. M Circle Another boulevard, Regent's Drive, runs perpendicular to McEldin Mall and is home to Memorial Chapel and Campus Farm. Regent's Drive crosses Campus Drive with the M circle, a feature of the campus, which is a large M formed by flowers at its center and a traffic circle. The university is also divided by U.S. Route 1, known locally as Baltimore Avenue. Most of the campus is located west of Baltimore Avenue, but fixtures such as fraternity lines and the Leonardtown community are to the east. Located at the western end of Baltimore Avenue, the Visitors Center, also known as dairy products, the Lecold Armory, and the Rossborough Inn, built between 1798 and 1812, is the oldest building on campus (older than the university itself). [127] The campus has five regularly used entrances. The main entrance, off Baltimore Avenue and on campus drive, features a gatehouse called Northgate, an ornate gateway honoring the university's founder. 140-acre (57-hectare) Maryland Golf Course University located at the northern end of the campus as well as an observation deck. The campus also has one of the root servers responsible for DNS operations. Sustainability The four-person sustainability office was established in the summer of 2007 after University President Dan Mote became a charter signatory to the American College and University President's Climate Commitment (ACUPCC) with the goal of campus climate neutrality, against the backdrop of the McEldin Library, a sundry clock in the heart of McEldin Mall. The Climate Action Plan Working Group completed its inventory of campus emissions from 2002 to 2007 and developed the Climate Action Plan in August 2009. [129] According to the university's Climate Action Plan, Maryland aims to become carbon neutral in 2050. [130] New buildings and major renovations must meet LEED-Silver certification requirements. The office has promoted several initiatives, including a 17 percent increase in campus recycling rates from 17 percent in 2003 to 89 percent in 2014. In 2008, the recycling rate increased from 37% to 54%, with someFeed the Turtle program for home football games. While campus-wide recycling rates are increasing, some areas of the campus have high pollution rates, so not all bins can be recycled. For example, as of 2017, the Stamp Students Union had a 54% pollution rate in the bins, meaning that more than half of the waste in stamp bins had to be trashed. In November 2007, 6,000 people attended the PowerShift, the National Youth Climate Action Summit, at the University of Maryland. The night hall, the university's first lead gold building, opened in April 2010 as the new home of Philip Merrill College of Journalism. [135] The university plans to add solar panels to the rooftops of the diner canteen on its North campus in spring 2010 and to the rooftops of Caulfield House. Announced university announcement 158,068 square feet (14,685.0 m2) of state-of-the-art physical science complex (scheduled to be completed in July 2013) to meet LEED-Silver certification requirements. [138] In 2008, the Sustainability Office launched the Sustainability Advisors Program, in which teachers invite their peers to give lectures on sustainability concepts. The Sustainability Bureau launched an initiative called the Chesapeake Project in 2009, in which professors integrated sustainability education into existing classes in all areas. Participating professors will participate in a two-day workshop in late May to learn about
environmental, economic and social sustainability. [141] All participants receive a \$500 benefit. By the end of summer, workshop participants will submit a revised course plan for at least one course that will provide the next grade. Since the first workshop in 2009, 71 professors have participated in the program, and more than 80 courses have been implemented at all 12 universities in the school. In 2003, with the cooperation of the Prince George's County Department of Environment and Resources, a bio-retention facility was established on campus. Since this time, research has continued on the effectiveness of these bio-retaining sites in controlling water flow and filtering contaminants. A prime example is the work of Professor Allen Davis of the Department of Civil and Environmental Engineering, who examined and improved the removal of contaminants with rain gardens. Starting in 2010, the University of Maryland Department of Systems and General Services launched three projects that would continue for the next 20 years [three projects included a solar project at Mount St. Mary's University, a wind project in Western Maryland, and another wind project in West Virginia. The first of these projects, the solar project, is 16Project. The first wind project is 10 megawatts and the second is 55 megawatts. The project will allow universities to receive 15% of the energy purchased from these renewable energy resources, and in 2010, Ellicott Dining Hall installed solar panels that provide up to 30% of the energy to heat its water. The university installed three solar storage tanks, a pump, a temperature sensor, and 20 panels with control. This system increasingly provides a lot of water needs in the dining hall. In 2011, the Maryland team won the U.S. Department of Energy's Solar Decathlon. [143] The team designed and built a solar-powered house with a split butterfly roof in a project called WaterShed [the house was inspired and guided by the ecosystem of the Chesapeake Bay, connecting the house with its landscape and guiding residents towards a more sustainable lifestyle. More than 200 students contributed to the project. Maryland's design beat submissions from 20 other universities from around the world, including China, New Zealand, Belgium and Canada. In the 2017 Solar Decathlon, a team from the University of Maryland won first place in the United States and second in the world. [147] Named Resilient Adaptive Climate Technology (react), the 100% solar-powered home was largely inspired by the environmentally conscious traditions of the Nanticoke people and other local Native American tribes in Maryland, including water reuse, kitchen gardens and composting [Maryland has been a canteen (OZZI container) since officially launching the program in August 2011. Promote the use of reusable containers in [149] students first pay a \$5 fee to use the container, but they receive coins when they return it to the dispenser. With coins, the use of containers is free. In January 2011, Maryland installed occupancy sensors in nearly all of its 300 general-purpose classrooms. [150] These occupancy sensors automatically turn off after 30 minutes if there is no movement in the room. The project estimates it will reduce energy consumption by 30% and save the university \$100,000 a year. In 2012, the University Sustainability Fund gave \$130,000 to projects promoting sustainability. The money was raised from an essential sustainability fee of \$8, a fee that will increase to \$12 by 2014. Mark Stewart, project manager for the Sustainability Office, expects the fund to grow to \$300,000 by 2013. On May 2, 2012, the Wellness Coalition hosted maryland's first farmers market, a weekly tradition of supplying produce from farms in Maryland, Pennsylvania, and Virginia. [152] On the first day, more than 1,000 visitors were seen. In October 2013, the Faculty of Behavioral And Social Sciences (BSOS) formed the university's first university. Task force. In April 2014, a task force created a BSOS sustainability plan to advance campus sustainability and complement the university's climate action plan to help the university become a national model for green colleges. Designed to as a guide for other universities participating in BSOS in this effort. In September 2014, the BSOS Sustainability Task Force expanded to include the Student Sustainability Task Force [Student Task Force is an interdisciplinary team focused on addressing sustainability issues on campus.] In August 2015, compost bins were placed in two residence halls, and after a successful year, in August 2016 they were placed in nine residence halls. As of 2017, the University of Maryland has increased its compost collection by nearly 450 percent since 2010 [efforts are being made to add compost collection sites to academic facilities and residential halls on campus, while many have been removed due to high pollution rates.] Some Greek lifehouses and some of the apartments on campus were composted, but in 2017 and 2018 we had to get rid of many of them because they were causing more harm than good. Student Life Details: List of University of Maryland Student Organizations The Residential Life Talbot Hall campus at the South Hill Community Brick Entrance near the South Hill community is home to two major residential areas, the North Campus and the South Campus, and is further divided into seven residential communities. The North Campus consists of the Cambridge Community (which consists of five residence halls), the Denton Community (which now consists of four halls, including Auckland Hall, which opened in the fall 2011 semester) and the Ellicott Community (consisting of three halls). The South Campus includes the North Hill community, which consists of nine Georgian halls and Prince Frederick Hall (opened in the fall semester of 2014), and is located just west of McEldin Mall in the South Hill community, offering apartment-style living and further divided into former Leonardtown (consisting of six buildings). The South Campus Commons community consists of seven apartment-style buildings (the seventh and most recent building that opened in January 2010) and a courtyard, a garden-style apartment community on the north campus consisting of seven buildings. The South Campus Commons Community and Courtyard are built on campus while being managed by capstone's on-campus management, a private company, as part of the company's public-private partnership with the University of Maryland. I don't have a family in college.As of 2011, some students with families advocate the addition of family housing. Resident Life is supervised by a resident life department consisting of staff and departments. For example, a residence assistant who is a full-time undergraduate student facilitates student interaction and development on the assigned floor, building, or floor within the community and is supervised by the resident director. The Department of Resident Life Sciences offers many programs to residents and other students, including math success programs, academic success programs, common ground dialogue programs, and many living and learning programs. There are three dining halls on campus: The North Campus Dining Hall (Diner) is located between the Ellicott community, the South Campus Dining Hall is located near South Hill and the South Campus Commons community, and the 251 North Dining Hall is in the Denton community. As of fall 2016, the University of Maryland Dining Service has changed its meal plan from a paid à la carte to an all-you-can-eat dining experience. Stamp Student Union food courts offer many of the eateries for the college community. The Maryland Food Collective, commonly known as the Co-op, is a worker-owned collective that has offered a variety of vegan and vegetarian food options alongside local, organic and fair trade fruits and vegetables since 1975. It was then closed in 2019. [161] [162] Transportation University Park - University of Maryland metro station downtown, Washington, D., Provides easy and quick access to C. The university is accessible through three airports that exist in the larger Washington metropolitan area: Ronald Reagan Washington National Airport, Washington Dulles International Airport, Baltimore-Washington International Thurgood Marshall Airport.College Park's small public airport, college park airport, but is nearly adjacent to campus. The business is limited to the Washington metropolitan area. College Park Airport is the oldest continuously operating airport in the world and the first site of many important aviatiions. [164] The free shuttle service, known as Shuttle UM, is available for UMD students, faculty and staff, as well as some residents of College Park and Greenbelt. [166] [167] The university is offered at off-campus stops on the Washington Metro Green Line and Yellow Line The Yellow Line called the University – the University of Maryland. station also has the Camden line of MARC trains running between Baltimore and Washington. Shuttle-UM bus (Route 104) arrives at the station every 5 minutes in the fall and spring semesters (every 10 minutes in summer) and takes visitors to the campus (stops before the Stamp Student Union). Metrobus and Prince George's County TheBus bus services also stop on campus.In early 2012, TheBus service on Route1Ride (Route 17) was launched in Washington, D.C. It was free for all University of Maryland students and staff on Route 1 from the C border to Ikea in College Park, stopping at the University of Maryland metro station. [168] [169] There is an additional service called Night Ride, which is available every night from 5:30 p.m. to .m:30 p.m.. The service is designed to service areas of the campus that are not part of the nightly service route. More than 21,000 parking spaces are located on campus in parking lots and garages. There are a total of 16 free, publicly available electric vehicle charging stations on
campus.[171] and plans to add additional stations [zipcar services on campus] will be available to UMD students, faculty, and staff. [173] The university plans to introduce a bike-sharing program and add bike lanes on campus in an attempt to make campuses more bike-friendly by installing covered bike parking lots and bike lockers on campus. As of spring 2011, the university was encouraging cycling on campus by installing covered bike stores and mawat lane garage security lockers outside newly built Oakland dormitories. [176] In addition to the increase in storage options, the university allows students to learn how to fix their bikes and keep them on their own, and operates a campus bike shop. Since 2014, the University of Maryland has been selected as a gold-level bike-friendly university by the American Bicycle Federation. [179] As of fall 2019, electric scooter stations were installed on campus to facilitate the introduction of electric scooters, hybrid bikes and manual bike sharing systems. During the semester, private scooter companies were introduced, slowly increasing the number of scooters and bicycles that can be rented on campus. Bicycles and scooters for paid rental are only available daily from 5am to 9pm. In the fall of 2019, personal scooters have also increased significantly on campus. Under the administration of former President C. Daniel Mote Jr., the university was the main cause of Prince George's County's opposition to the installation of one or more light rail stops on campus as part of the Maryland Department of Transportation's Purple Line proposed out of concern for student safety, protecting sensitive lab equipment. [181] This sentiment is similar to previous transit positions taken by the university in the 1980s, when the administration strongly opposed a second proposal to put the stop to the right, rejecting Metro's initial proposal to run underground a campus where the University of Maryland College Park Station connects to the Adele H. Stamp Student Union[We make inferences to keep students and residents safe on the campus in downtown College Park on Route 1. [183] [184] In 2017, Paris Glendenning, a former Maryland governor and Prince George's County executive, acknowledged that the university's decision to take the metro station as far (1.6 miles) away from campus as possible was a disaster and racially biased. [184] Under President Wallace Law's vision in 2011, the administration recognized past transit mistakes and accepted having a Purple Line on campus to significantly increase transportation access for students, faculty and staff, and encouraged more walkable transit-oriented development in downtown College Park[183] The Purple Line route, scheduled to be completed in fall 2022, has five stops on and around the university campus: M Square, college park subway station, the front door to the Campus on Route 1, near the Stamp Student Union on Campus Drive, and on the other side of the campus on Adelphi Road. [186] [187] Diamond Back's main story: The Stamp Student Union's Diamondback Strip, near the food court and co-op diamondback, is an independent student newspaper. Founded in 1910 as the Triangle, it was renamed in 1921 in honor of the diamondback terrapin, a local reptile that became the school's mascot in 1933. Newspapers are published daily Monday through Friday in the spring and fall semesters, with a print circulation of 17,000 and annual advertising revenue of more than \$1 million. There are four sections: News, Opinion, Sport and Diversion. The 2008-2009 Diamondback received an Excellence Award from the Professional Journalists Association and finished second in the Best All Around Daily Student Newspaper nationwide and first place in the region in the same category. [190] Three years ago, the newspaper finished third nationally in the Best All Around Daily Student Newspaper, finishing first in the region. Notable journalists who have had him in the paper include David Simon from HBO's The Wire and NBC's Murder: Life on the Street. The disgraced Jason Blair, editor-in-chief in 1996 (he did not graduate and instead got a job with The New York Times). Norman Chad was editor-in-chief in 1978. Cartoonist Jeff Kinney, who created the diary for the Wimpy Kid fiction series, whose Igduf strip appeared on The Diamondback; Aaron McGruder first published his cartoon Boondocks in The Diamondback. And Frank Cho began his career in the popular University Square for diamondbacks. WMUC-FM Main Article: WMUC-FM WMUC-FM (88.1 FM) is a non-commercial radio station at a university staffed by UMD students.Volunteer. WMUC is a freeform radio station that broadcasts at 10 watts. Its broadcasts can be heard throughout the Washington metropolitan area. Notable WMUC alumni include Connie Chung, Bonnie Bernstein, Peter Rosenberg and Aaron McGruder. WMUC Sports WMUC Sports is WMUC-FM's online sports division that provides live broadcasts for more than 10 Division I sports at the University of Maryland, including terrapin soccer and basketball teams. As seen from the end of the reflection pool, the Greek Life Management Building has about 15% of maryland undergraduate body men and 20% of women involved in Greek life. A lot of school fraternities and loneliness are located in the fraternity line and graham crackers that are controlled by the university. Fraternity Row is the backdrop for several recently produced films. All social Greek organizations are governed by one of five groups: the Council between The Fraternity, the Panheric Association, the Pan-Greek Council, the United Greek Council, or the Professional Fraternity Association. All cultural Greek organizations are governed by the United Greek Council. These councils, with the support of the Department of Fraternity and Sorority Life, support the creation and governance of chapter-by-chapter legislation, risk management plans, and philanthropy. [193] Each year, each Organization in Greece must meet certain requirements, such as conducting services and conducting programs/events related to community service, diversity, and alumni and faculty outreach. The most prominent of these groups is the mixed ensemble's fake pass, which came third in the ICCA finals in New York in 2016. In 2020, the A cappella archive ranked fake paths at #10 among the ICCA competition groups. [196] Athletics Main Article: Maryland Terrapin XFINITY Center, Maryland Basketball Home University Sponsors Variation Athletic Team in 20 Men's and Women's Sports. The Terrapins team represents Maryland in Division I of the National Colle college athletic association.
Maryland became a founding member of the Atlantic Coast Conference in 1952, but left on July 1, 2014, to participate in the Big Ten Conference. As of 2017, Maryland athletic teams have won 44 national championships from the NCAA, USILA, AIAW and NCA. [197] [198] Princeton, 2008 and 2010Wme named the University of Maryland athletic facility the best in the whole country. [199] The Terrapins nickname (often shortened to Terps) was created in 1932 by former university president, football coach and athletic director H.C. Curly Bird. The mascot is a diamondback terrapin named Testod, latin for tote. Since the beginning of the 2020s, the school's athletic color has been a combination of red, white, black and gold for the Maryland flag. [203] Men's Basketball Maryland Stadium Game-day men's basketball is one of the most popular sports in college. From 1989, graduate Gary Williams revived a program he had suffered in the wake of the death of Len Bias and the violation of NCAA rules [Williams led Maryland basketball to national renown with two Final Four appearances, and in 2002 he competed in the national convention. On February 7, 2006, Williams won his 349th game, surpassing Dolly Sell, 2006, 2006, the all-time leader among Maryland basketball coaches. In May 2011, Williams retired as head coach, allowing the entrance of new coach Mark Turjion. The XFINITY Center court was named in honor of beloved coach Gary Williams. Maryland football is also popular in college. The Terrapins were awarded a national championship by wire service in 1953 and awarded by multiple retrospective selectors in 1951 [beyond the two revenue sports the university will field 18 other variation teams. The women's basketball team attracted attention in the 2000s (10 years), when head coach Brenda Frese led Lady Terps to her first NCAA title in 2006. [206] Men's Lacrosse Maryland fielded one of the best lacrosse programs in the country.Maryland Men's Lacrosse is one of the sport's top programs since it began as a team in 1865. [207] He won the national championship in 2017, breaking a 42-year drought. The team has won 10 USILA and NCAA national championships since being promoted to diversity status in 1924 and is a regular fixture in the NCAA Tournament. [208] The women's lacrosse team has the most national championships of any program nationwide, including the most recent in 2017. [210] The men's soccer men's soccer team has won four NCAA Division I College Cup national tournaments in 2018 [under the guidance of coach Sasho Chirovski] the football team has reached the Final Force nine times and won three College Cups since 1997 [the football team has developed a large and dedicated fan base among students and communities.] The attendance record at Ludwig Field was set in 2015 when Maryland beat top-ranked UCLA in extra time with 8,449 fans. The total annual attendance increased dramatically from 12,710 in 1995 to 35,631.Field Hockey Maryland Women's Field Hockey Team has won eight NCAA championships. Maryland's Mighty Sound Marching Band attends all home football games and offers pregame performances. During the basketball season, the marching band will become the University of Maryland Pep Band, providing music in the stands during men's and women's home games and tournament play. On July 1, 2012, the university cut seven variation teams: men's cross-country, men's indoor track, men's swimming and diving, men's tennis, women's acrobatics and tumbling, women's swimming and diving, and women's water polo. The men's outdoor track team was going to be cut, but the team raised \$888,000, \$940,000, enough of the goal to avoid elimination. The mascot statue of Tested on campus in 1932, Carly Bird, who served as the university's football and baseball coach, athletic director and president, proposed adopting diamondback terrapins as mascots [the first statue of the bronze Testud casting was donated by a class of 1933, it was exhibited on Baltimore Avenue in front of the Richie Coleiseum. But the £300 sculpture was vandalised by visiting the university's athletic team. In 1947, a Johns Hopkins University student stole a bronze statue and moved it to campus. Maryland students traveled to Baltimore to get it back and laid siege to the house where it was hidden. More than 200 city police responded to quell the riots. In 1949, President Byrd awoke to a phone call from a University of Virginia fraternity and received a request to remove the statue from the lawn. Tetud was later filled with 700 pounds of cement and fastened to his pedestal to prevent future removal, but students at rival schools continued to destroy it. It was moved to Maryland Stadium in 1951. In the 1960s, Testud was returned to its central location in front of the McEldin Library. [221] [222] [223] A duplicate statue was placed at Maryland Stadium in 1992, and the football team touched for good luck passing by before the game [additional Tested statues now sit outside the Gossett Team House near the stadium.] XFINITY Center, school basketball arena. Riggs Alumni Center; in the lobby of the Adele H. Stamp Student Union. It stands in the courtyard of Van Munching Hall. [223] In 1994, the Maryland General Assembly approved a law designating diamondback terrapins (malacraem terrapine terrapins) as official reptiles and legally adopted mascots of the University of Maryland. From the 2000s, the university promoted the slogan Fear the turtles as a cry for school pride. The nose of the statue is polished by passersby who have rubd it for good luck. [228] Around finals week, students start offering offerings to tested in the hope of being goodin 2013, the Tested statue caused a fire due to an inappropriate mixture of offerings and lit candles. A local news channel reported on the event and it trended on Twitter. During the COVID-19 pandemic, campus guidelines included instructions not to rub the statue's nose unless cleaning was carried out using a disinfectant mouth. [230] Prominent Alumni Kappa Kappa Gamma Memorial Fountain in front of the Riggs Alumni Center Main article: University of Maryland, List of College Park People and University of Maryland Presidents List, College Park Prominent Alumni include House Democratic Whip Stealey Heuer. [232] Google co-founder Sergey Brin; Muppet creator Jim Henson[234] suppressed wire creator David Simon[235] as well as Seinfeld co-creator and your enthusiasm creator Larry David. [236] Prominent graduates of the former NFL quarterback Norman Boomer Eliason.business include Ed Snyder, chairman of Comcast Spectacles and owner of the Philadelphia Flyers. Jim Walton, journalist, former president and CEO of CNN. Kevin Plank, founder and executive chairman of athletic apparel company Under Armour. Leonard Kevin Reen bias, first team All-American College basketball forward. Chris Kubasik, former president of Lockheed Martin. Carly Fiorina, former CEO of Hewlett-Packard. And telecommunications entrepreneur Brian Hinman. Campus TELEVISION Personality Connie Chong's Arched Gateway[237] ; El Associated Press writer Gioriana Rancic earned a bachelor's degree from Philip Merrill College of Journalism. ESPN reporters Bonnie Bernstein and Tim Krjukjan graduated from Philip Merrill College of Journalism, as did Peter Rosenberg. Fellow ESPN's Scott Van Pelt attended Philip Merrill College of Journalism, but was a few credits short of graduation. Journalist Carl Bernstein, who won the Pulitzer Public Employee Award for his coverage of the Watergate scandal, attended college but did not graduate. Mark Rosenker, former chairman of the National Transportation Safety Board (NTSB) and now a CBS NEWS traffic safety analyst, graduated with a bachelor's degree in arts in radio and television. Kiran Chetley, co-host of CNN's American Morning, earned a bachelor's degree in broadcast journalism. Maryland Public Television's Jean Wirthley hosted Hodge Podge Lodge and co-hosted it on the Nature's Trail after enrolling in the Graduate School of Education. David Zurawik, a television and media critic for the Baltimore Sun, earned a Doctorate in American Studies. CNN Newsroom's Heidi Collins earned her Bachelor of Science degree. Former Maryland Gov. Harry R. Hughes was also in attendance. O. Oprah Magazine editor-in-chief Gayle King graduated from Maryland with a degree in psychology. TV host Bruce Deupuit, host of News Channel 8's Newstalk, graduated from Philip Merrill University in journalism. Attendees inNobel Laureate in Science and Mathematics Raymond Davis Jr., winner of physics in 2002. Herbert Hauptmann, 1985 Chemistry Prize winner and Fields Medal winner Charles Pfeifferman. Other alumni include George Danzig, considered the father of linear programming. The late NASA astronaut Juri Leshnik, who died in the destruction of the space shuttle Challenger during the launch of Mission STS-51-L. Engineer James S. Albus, founder of the Division of the National Institute of Standards and Technology (NIST). NASA Administrator Michael D. Griffin; Sarah Hallager, curator of birds at the Smithsonian's National Zoo. [238] And Kevin Greeneau, the first African-American to earn a Doctorate in Nuclear Engineering from the University of Maryland. Some donors have distinguished themselves for their great gifts to college. It gave more than \$45 million to the Clarice Smith Performing Arts Center, which bearing his wife's name. Construction entrepreneur A. James Clark, who earned an engineering degree in 1950, also donated more than \$45 million to the engineering department that named his name. Another engineering donor, Chung H. Kim, earned his Ph.D. from the university in 1991 and gave \$5 million to build a state-of-the-art engineering building [Philip Merrill, a media figure, donated \$10 million to the Journalism University [Robert E. Fischel, physicist, inventor, and holder of more than 200 U.S. and foreign medical patents[242] [244] [244] He donated \$30 million to the Faculty of
Engineering of A. James Clark,[245] and established the Fischel Department of Bioengineering. Oculus VR co-founder Brendan Iribe donated \$31 million to a new computer science building and scholarship in 2014. [246] Also the university has a number of executive trustees who are elected and have a diverse array of professional backgrounds. [247] Filmography University campuses have been featured in numerous films, TV shows and music videos. 2012[249] [250] Naked Science (Earth's Invisible Shield)[2008]National Treasure: The Book of Secrets [2007] [25] [52] CEO Exchange [2006] [253] Naked Science (Core of Earth) [2005] Tragedy to Victory: Maryland Terrapin Odyssey [2003] [255] Species II [1998] [256] Antique Roadshow (College Park, Maryland) [1997] [257] Foot & Blowfish (I Want to Be Only You) [1995] [258] Life 101 [1995] [259] The X-Files (Lazarus) [1993] [259] [Citation Required] St. Elmo's Naked Fire [1985] [260] Lolly Rowe's House [1983] [261] Maryland Portal Shuping Yang Initiating Speech Controversy Monroe H.
