Before you explain the steps to perform the operation, you need to understand some very basic terms. For those regulars to the Windows operating system, the famous installables were known for their extensions completed in EXE (something that lost relevance in the latest version, since, error, the extension disappears from the address of the file and so many users never have to deal more with this technical concept). Similarly, for Android Google has adopted another type of extension to call the installables: the APK extension. Therefore, if An APK simply means a file that contains all the necessary information about an application fully installed on your device, as if we made it through play Store.De done, internally, when we installed an application in the Play Store by pressing the Install button, which the system actually does, is to automatically download it to the APK and then run it to install it, all in a way hidden from us.
