Whether we're struggling with heat or bundled in the middle of a blizzard, we always crave ice cream. This rich, creamy goodness is hard to beat if the freezer hasn't turned our favorite sweet treat into a solid piece of crystal. Ice burn occurs when air seeps into boxes, so creating an airtight container is your best protection. It also stops the ice cream from soaking up the smells of other not-so-pleasant freezer products (we're looking at you fish sticks). Check out the video for three simple methods. Do more with the freezer. In the video above, we share some creative ways to use the freezer. How to store your plastic wrap in the freezer to stop it from clinging, keeping all your plant waste for possible stock, or creating pesto cubes in an ice tray. And say goodbye to the rough drops of frozen bananas sticking together in a plastic bag- we have the best method for you. Do you have unique ways to use the freezer? Share them with us below. Getty Images As the weather heats up, there's nothing nicer than an ice cream cone to cool down and ice cream means you can make your own when you want! They are also a fantastic way for you to create your own unique taste and bold combinations - or, if you're looking for healthy alternatives, they allow you the freedom to control the amount of sugar and dairy products you include. There are two types of ice cream maker available on the market: freeze-first and self-washing models. Freezing the first models come with a bowl that should be stored in the freezer for anything from 8 hours to the day, before the foaming process, meaning that only one batch of ice cream can be made at a time. Self-freezing models don't require pre-freezing and are ready to start churning as soon as your mixture is ready - you can also make a few batches of ice cream. Here are our best purchases. Advertising - Continue reading below the self-freezing ice cream makers Score: 89/100A is just a designed and easy-to-use machine that produces good, creamy vanilla ice cream and smooth sorbet. It can leave a thick ice cream film around the bowl every time, which is hard to scrape off. Price: 194.99 euro Accessed from: amazon.co.uk Score: 89/100 This ice cream maker is an absolute joy to use because it is so well designed. It has very easy-to-use controls, and a clear screen that shows your ice cream progress. It's completely automatic right down to the happy little sound it makes when finished! BUY NOW John Lewis, 269.99 pounds Score: 83/100A well-working self-freezing model capable of making up to 1.5 liters of ice cream. He Designed with some useful features. It is convenient to use, as there is no need to freeze the bowl in the first place. BUY NOW John Lewis, No 249.99 Freeze-First Ice Cream Manufacturers Score: 80/100 This is the first machine that produces consumable results for ice cream and sorbet. This could do with more recipes and more ingredient feed hole. BUY NOW Lakeland, 39.99 pounds Score: 78/100 This machine has a deep bowl, so needs deep freezer boxes or freezer for the bowl. It produces good creamy results, but the tester had a few problems locking the lid in a couple of tests. With a quality ice pick, filling and emptying ice forms or buying a bag of ice will be a thing of the past. It's a handy tool regardless of the setting, though if you're the one to entertain, this device is sure to become your best friend. Choosing the perfect ice pick for your home or bar comes down to a few key details: what space you can highlight, the quality and type of ice you're looking for, and how much you need at a time. For example, if you have a large family that consumes a significant amount of ice, you want something in a home-friendly commercial lineup or a powerful countertop option. If you are going through a random small collection and plan to bring your machine to other functions, consider something portable. Finally, do you drink casually or mixing serious cocktails requiring large, clear cubes? Once you have outlined your priorities and needs, see our selections of the best ice picks for each scenario. Pebble ice (also called ice nugget) is great for tropical and tiki cocktails, cobbles, crayfish, mixed drinks, juice and more; It is also a type of ice that is difficult to make in bulk without a machine. The Opal tabletop model from GE measures 15.2 x 14.2 x 17.2 inches and is cleverly designed with a reservoir that replenishes itself if the ice starts to melt, minimizing water waste. The machine gives ice in just 20 minutes and can produce a total of 24 pounds in one day, holding up to 3 pounds at once. Opal is also equipped with Bluetooth control, that you can manage its production from your mobile device with the free GE Profile Opal app. Read Next: Best Ice Cube Trays Packed With With At a relatively affordable price, this machine from Costway can make up to two different sizes of ice (small and large), which is suitable for all your cocktail needs. Ice pick indicators warn you to pull out ice cubes when the machine runs out. With an easy-to-use control panel, you can also track its ice production solutions through a clear window. The eco-friendly, low-noise machine boasts a high power compressor for fast ice making, producing nine ice cubes for six to 13 minutes and a total of 26.5 pounds of ice per day. At 9.5 x 14 x 13 inches, this compact ice pick also fits on any countertop in your home bar or kitchen. For those with aesthetics in mind, the retro-inspired Igloo countertop is a great option. For seven minutes, this 9.6 x 14.7 x 12.4-inch mini machine makes nine small or large cubes of bullets and can produce up to 26 pounds of ice per day (the inner basket can also store 2 pounds at once). Add water (up to 3 quart), choose the size of a cube using an LED-lit control panel, and wait until your ice appears --ultra-quiet gear makes all the legs work for you. This ice countertop includes easily removable baskets and a scoop to serve. In addition to red, the car is available in aqua, black, stainless steel and white. The sleek, space-saving and incredibly quiet, stainless steel Frigidaire ice countertop is a silver bullet. With LED backlit control, compressor power cooling to avoid overheating, and tweaking for two different ice cube sizes, this tabletop model is portable and can be placed anywhere in your kitchen or bar. At 14.5 inches deep, 11.7 inches wide and 15 inches tall, this autonomous machine can make ice in less than seven minutes and can produce up to 26 pounds of ice in 24 hours. Read next: Best Cocktail Shakers, According to experts This EdgeStar ice maker is both built and compact in stylish, stainless steel and black trim, all at an attractive price for home and office use. With front ventilation and reversible treated doors, this device serves as a functioning freezer for up to 6 pounds of ice at a time, and can produce 12 pounds in total for 24 hours. This machine is controlled with a simple switch and will even turn off when the bin is full of ice. At 15 inches wide, 20 inches deep and 26 inches tall, this ice pick will easily fit under any countertop. Read next: The Best Coolers Kold Project, also known as the King of Ice Machines, easily top the industry standard for bars and restaurants around the world. This particular machine can produce 59 pounds of crisp, large cubes (1 x 1 x 1.25 inches) per day, storing up to 26.5 pounds in its well-insulated chamber at once - the thickness of the ice is also adjustable based on your your (with low, medium and high settings), and the machine will automatically stop producing ice when full. This stainless steel ice manufacturer is extremely easy to use and self-cleaned. Please note that drainage is required. Touted as one of the fastest nugget ice makers on the market, this NewAir machine can shoot down its first batch of ice in just five minutes. Thanks to the high-power cooling process, it can produce up to 40 pounds of ice per day - all in a compact, countertop body that measures 16.5 x 10.6 x 16.3 inches. The crisp but chewy nugget of ice it makes is perfect for cooling any cocktail or mixed drink. What's more, the extra-thick wall of the interior keeps the newly made ice insulated. The autonomous machine also has a self-cleaning function and is made of non-BPA parts for clean, safe ice. In addition, its stainless steel exterior will look good on any kitchen countertop. We may receive commissions for purchases made on selected links. Food and drinks often cause place and time. For iced tea, it's sweating jugs on picnic tables, ice cubes ringing against the glass as you stir. It's summer barbecues, hail parties, Fourth of July fireworks, catch up with friends on the porch. As with many cases of drinking iced tea, there are many ways to do this-sweetened or unsweetened, flavored or spiked, but they are all delicious. Our list makes it faster, easier and tastier to brew this favorite drink. Explore options ranging from simple jugs to tea infusers to electric brewers that take just a few minutes. From summer to any time, here are the best iced tea makers to buy. Designed to make great ice tasting quick tea, you'll be sipping in less than a minute using the Takeya Flash Chill Iced Tea Maker. It is available in two sizes (1 quart or 2 liters), so you can drink tea all day or have enough to serve all your friends at the barbecue. You can use this one with any free tea or tea bags as well. This is a good feature if you really enjoy studying tea and don't want to be tied to one way or another. To make your tea, just put loose or bagged tea in an infuser and attach it to the lid. Fill the container halfway with hot water and let the tea steep until desired, then remove the infuser, add the ice, and shake for 30 seconds. The plastic Tritan, free of BPA, can cope with the heat, and it will not be damaged by sudden cold or shaking. The lid is non-resistant, so you won't make a mess of it when it also allows you to store the container on its side if your fridge is overcrowded and there is no space on the shelf or on the door. You can also toss it in your bag to take it to a picnic without worrying about the spill. With a simple simple Process, this budget kettle saves time and money. Add your favorite loose leaf tea, brew with hot water, then place a sturdy Tritan jug over the mug to enjoy fresh tea, whether hot or iced. The removable thin mesh strainer prevents any tea leaves from getting into the cup, which is an extra money saver, since you don't have to buy a separate infuser basket. Since the creator of leafTEA works similarly to the coffee maker pouring, this item can also brew coffee, allowing you to replace your home French press or Chemex. Users have given the product a nearly five-star rating, with particularly high marks for its ease of use and ease of cleaning, as well as praise for how great a gift it makes. For customers interested in entertaining large groups or serving the whole family, the ability of leafTEA maker may be a disadvantage. The point can only brew 18.5 ounces of tea at a time, which measures out to just over two cups. But if you are looking mainly for individual use and want a quick, easy and delicious cup of iced tea, you will find it hard to find better value for money than this option. Mr. Coffee switched to the tea party with the TM1 2-quart Ice Tea Maker. Of course, it's as easy to use as one of their coffee makers and a great option if you want an electric brewer. This kettle can handle either loose tea or tea bags and amounts to up to 2 quarts of tea in just a few minutes. Simply fill an ice jug for chilled tea immediately, or store brewed tea in the fridge for longer use. It has an automatic shutdown after

brewing is done, so you don't need to watch it. The brewing basket is removable for easy cleaning, so your tea flavors won't mix, and the machine has a cleaning cycle to keep itself clean without fuss. Although this one is designed to brew iced tea, you can also use it for brewing iced coffee. These days, many people try to avoid using plastics in the kitchen. If you get into this group, you'll love The Ovalware Airtight Cold Brew Iced Coffee Maker and Infuser Tea. The carafe is made of borosilicate glass, stainless steel food class infuser, and silicone seal. Cleaning is easy since all parts of the dishwasher are safe and they won't keep the smells preventing green tea from tasting like the mint tea you brewed last time. The glass is warm-safe so you can brew the tea hot and pour it on the ice, or you can make tea in the fridge overnight. The seal is airtight and leaky, ensuring that your drink stays fresh in the fridge and you don't need to worry about spills if it tips. The filter can handle either loose leaf teas or tea, and you can even use this to make a cold coffee brew. The large handle is simple for anyone to grab, and the spout makes pouring easy, while the design of the glass looks smooth and modern. Measurements along the side of the side You add the exact amount of water or other liquid when you follow the recipe. Convenient for travel, easy to cook at home, and just fun to use. Guests will enjoy watching the magic happen to the igenuiTEA teapot from Adagio tea. All you have to do is add your free leaf or tea bags to the pan and then add the hot water and let it steep. Have a mug or a waiting glass and fill it with iced tea for ice. Place the kettle on top of the glass and watch the tea drain from the bottom, leaving the tea leaving behind. To stop dosing, just lift the pan off the mug, and the flow will stop. This makes it very convenient to serve a few people from a 28-ounce kettle, or a few cups for yourself. Since the tea simply floats in the pan and is not contained in the filter at the top of the pot, you add more tea for a stronger cook or fill the pan with less water to make one cup. If you prefer tea overnight, just mix the tea leaves with cold water and let it steep overnight in the fridge. The wavy handle is perfect for the fingers, offering a cool, safe grip. It is also a dishwasher safe for easy cleaning, and for more thorough cleaning, the filter clicks in and out and the lid is removable. If you tend to make smaller batches of tea or you travel alone, a 16-ounce pot is also available. Sometimes a few glasses of tea just aren't enough. Fortunately, this large jug of Primula can hold a whole gallon of iced tea, making it an ideal choice for families to have fun on these hot summer days, or for brewing worth a week of tea in one shot. Few iced tea producers have even come close to this power, and Big Iced Tea Pitcher is the most reliable product of 1 gallon and up. It has an airtight and leafy lid that keeps all this iced tea fresh for a few days (and safe from spills). The core of the brew works with both loose leaf and package tea, as well as fruits and berries for delicious flavored tea. And you can make iced tea either through a hot brewing method or a cold brewing method, depending on how much time you have and what flavor you prefer. Some customers question the durability of the product, saying that different parts such as an infuser or sealant ring broke down over time, but most reviews are positive, and the item is still higher than the four-star rating in durability. The Plastic Tritan jug is also insusive. With three different cores, you will always have an application for this attractive drink jug. Primula Flavor It Infuse Pitcher is fantastic and its use goes far beyond iced tea. One core has holes, making it perfect for all your loose tea leaves. One has large holes that allow for a lighter flow of water when you use tea bags or fresh fruit. The third core is to keep your drinks cold without diluting them. Just keep this core in the freezer so it's ready when you need it This jug is made of Tritan plastic, which is durable, heat-safe and attractive for serving drinks at any party. The container is designed to fit on a shelf on the doors of most refrigerators, so it's easy to store and easy to find when you need a chilled drink. No matter how big or small your hands are, a large handle is easy to grab. It also has a silicone insert for a safer grip when you wear a full jug. The top locks are in place to prevent occasional spills and you can even store it on your side if your fridge is too full. For easy cleaning, the jug and all parts of the dishwasher are safe, so you'll be sure that your herbal teas don't taste like green tea. The final verdict of the Tayeka Flash Chill Iced Tea Maker is an all-around great option. It's affordable, easy to use, and available in multiple sizes and colorways, so it earns our first spot. Those interested in another budget option can check out the Tealyra leafTEA maker, which uses a lower dosing method instead of the traditional pouring route. Donna Curry is a freelance food writer who specializes in product reviews and recipes. Her work has appeared on serious eats, fine cooking, and her own recipe blog, Cookistry.com. She is also the author of Make Ahead Bread, a book designed to simplify the process of baking bread. This piece was edited by Derek Rose, a coffee and tea expert on spruce eats. He researched a variety of products, from coffee scoops to commercial espresso machines, and interviewed field experts to understand them. He holds a MFA degree in Creative Writing from Columbia University and a Bachelor's Degree in Communications from Marist College. Size: How much iced tea do you usually drink? If you swallow a glass behind glass throughout the summer or often entertain a lot of guests, it is worth buying a larger kettle with ice, even if it takes up a lot of real estate in the refrigerator. Otherwise, there are many small options that will suffice and save space. Easy to use: Since iced tea is such a simple drink to make, no one wants a device that confuses the process. Think about what parts you prefer in an iced teapot. Do you want to insist? An item that pours from above or distributes from below? Also keep an eye on the number of parts involved and whether they are all dishwasher safe. Guide or electric: The long-standing image of a traditional iced tea maker is a large plastic jug that you fill and let cool. However, there are many electrical options out there that can make the hand process free. Some even allow you to adjust the strength of the tea. The best part? You can find a lot tea makers with ice that come at about the same price as tame. Those. Those.
