The first phones were way oversized compared to any phone today. There was an antenna on top of the phone and they used to be quite troublesome to carry because of their weight. Technically, they were called brick phones. There was only one thing you could do with the phone, call. But these phones were quite expensive and it was quite prestigious to own such a simple mobile phone at the time. These phones are no longer available on the market. The phones function Then in the early 20th century came a little smarter so-called bar phones or feature phones. They are also called button phones in Bangladesh. These phones had the ability to text messages, MMS, polyphonic melodies, FM radio, 3.5mm connector, simple games, Bluetooth and some of them also had low quality rear camera. Phone features have become quickly popular among the population of Bangladesh. Entry-level phones were more priced than first-generation mobile phones in Bangladesh, and it offered a lot more options at the same time. This is because by the time the technology moved faster, the market was growing, new brands were bringing new ideas and offers. MP3 ringtones, Mp3 player, video, internet access via WAP, etc. features are also developed in later generation phone features. Finnish brand Nokia was leading the market for phone features alone at the time. Phones like the Nokia 3310, 1100,1110, 3210, 6600, 2600 led on the local as well as the world stage. Now there are still many brands that offer decent quality devices with modest prices. But Nokia still remains the most reliable name in this category. Samsung is another reliable name for phone bar consumers who appreciate consistent quality and durability. Smartphones In the mid-20th century, first-generation smartphones came to market. Nokia has maintained its leading position with its N. BlackBerry series smartphones was another respectable name in generation of smartphones years. There's there is still no touch screen, apps, etc. and no one could do too many things with these devices. Internet access has gradually become increasingly popular, but it is still only possible with much slower GPRS technology since the 3G network arrived in Bangladesh in 2012. First-generation smartphones have been perfectly designed with improved camera quality and higher internal storage. Storage photos, Mp3 audio files, MP4 or video files, various ringtones, mobile themes, etc. were the main functionality of these gadgets along with 2G calls, sending SMS and MMS. Android smartphones In late 2008, the first commercial Android phone was launched by HTC called HTC Dream. In just one year after the launch of Android began to completely restructure the market. While Apple iPhones with iOS, Nokia Symbian or BlackBerry OS phones were present in the market, Android phones have taken the lead with its innovative Android Store apps and through the number of features that these apps have offered. Android phones began to gain attention in Bangladesh after the launch of the 3G network in the 4th quarter of 2012. Symphony and Samsung were the leading names in the early years of Android in this southeast Asian country. As of 2019, Android's share of the global smartphone market is about 76%, which is expected to be significantly higher in Bangladesh. Tage: Mobile BD, Mobile BD Price, Mobile Price in Bangladesh, Mobile Bangladesh, Mobile Price, mobilebd.com, Mobile BD Market Price, MobileBazar.com, Mobile Bazaar, Mobiledokan, Mobilemaya, Mobile Dokan When It Comes to Smartphones, most people would like to have Android phones. Now days, Android phones are very popular as well as not too expensive. So people who don't want to spend most of their money on a cell phone, cheek list the top 5 best android phones in 2017 under 5000 taka. Yes, many of us do not want to spend a lot of money on the phone or do not allow ourselves to do it. But when we decide to purchase a phone, we expect that our phone will have the best specifications and features. Here we have compiled a list of android phones 2017, which offers a decent smartphone experience without paying more than 5K taka. The Symphony V65Symphony V65 is a good smartphone to buy less than 5000 taka. It has 1GB of RAM and a 1.2GHz quad-core processor in which you get good performance from it. You'll get 8GB of storage on this phone, but you can increase it to 32GB with a microSD card. The phone has a 5MP back and a 5MP front-facing camera with an f/2.2 aperture and an LED flash for the back. You can take a decent photo with these cameras. The phone also has a very good battery life with a Li-ion 2800 mAh capacity that will keep your phone running almost a day. Speaking of Android, it works with Android 6.0 Marshmallow operating systems. Price: Tk. 4,890/- V65 Full Specification Symphony V65 has a 4.5-inch FWVGA display. You could say the size of the display is small too the screen will not be bright with a resolution of 480x840p. If you like to watch movies while playing games on android phones, then you need a bigger screen. So if your basic decorum is more of a display, then you might not go with that phone. Finally, the Symphony V65 has a decent processor, RAM and camera; It also offers a great battery life. The display size and resolution are not good enough though. Symphony V75Another's lower-budget phone comes with a good 1GB of RAM and powered by a 1.3GHz quad-core processor. The phone also sports a 5-inch display on 480x854 resolutions, 5MP rear and 2MP front cameras, and 8GB of internal memory. The V75 has 2000 mAh battery and works with Android OS 6.0 Marshmallow.Price: Tk. 4,990/- V75 Full specs So we can say a decent enough phone that contains a great display and a good processor and RAM. Rear camera in But the front-facing camera is not good with just 2-megapixels. Battery performance should also be decent only with a capacity of 2000 mAh. Walton Primo EF5 Primo EF5 sports 5-inch display, 480x854p resolutions, powered by 1.3GHz processor, combined with a good 1GB of RAM and 8GB ofGB The phone has a BSI 5MP rear camera with an LED flash and a 2MP for a selfie. You can capture HD 720p video with phone cameras. It provides a li-ion 2300 mAh battery and works with the Android OS 6.0 version. Price: Tk. 4,990/- Ef5 Full Specs Looking at phone features and the prices you have to pay for your phone, looks very decent. The phone is available in two colors: Grey and Gold.Walton Primo F7It phone has very similar configurations as the Primo EF5 except the front cameras. The phone comes with a 5-inch display at 854x480p resolution, powered by a 1.3GHz quad-core processor and packages with 1GB of RAM and 8GB of ROM. Speaking of cameras, the Primo F7 offers decent 5MP rear and 5MP front cameras with Full HD (1080p) video recording. The phone offers 2000 mAh of battery life and works with Android OS 6.0 Marshmallow.Price: Tk. 4,890/- Primo F7 Full Specs So you get a great display, a good processor and a camera on the F7, but the battery performance won't be good enough. The phone is available in four different colors: gold, black, white and GreyWalton Primo GF5This is a very stylist Android phones that has a 5-inch 2.5D curved display. The Primo GF5 is powered by a 1.2GHz quad-core processor and 1GB of RAM under the hood. You get 8GB of internal memory, and that can expand further to 64GB with a microSD card. The phone cameras are also decent with 5MP AF rear and 5MP front cameras. It provides 2350 mAh of battery and works with Android OS 6.0 Marshmallow.Price: Tk. 5,190/- GF5 Full Specs So a very decent Android phone is priced and you get a good smartphone experience with it. Top 5 best Android phones less than 5K PriceWe chose 5 smartphones from Symphony and Walton Brands. These two brands offer the best smartphones under 5000 taka in Bangladesh. You'll net get a lot of phones under 5000 taka of the best brands in the world.
