By Kow ChanshikdaAug 21, 2015Oct 16, 20180124 Share0 Blackberry is the most popular smartphone in the world. Blackberry use them won the operating system on a Blackberry smartphone. Blackberry smartphone specialty is their security system is too high. So, every most celebrate person to use smartphone for their safety. Now some young boys and girls are favorite best Blackberry smartphone. But one problem with this smartphone. Sometimes we face this type of trouble, the problem is not enough to be charged, forgotten password, cell phone hang, etc. but, every big problem has some small solutions. Thus, this type of problem-solving devicereset.com. Because here you can find all kinds of smartphone factory reset/hard reset/unlocked phones solution. Today I'll show you the popular BlackBerry No.3 smartphone Reset solution. See our important tips and use our simple methods to reset your smartphone password. Before the reset Read some important tips about BlackBerry No.3 several kinds of resetting techniques. While you use a soft reset method, your mobile phone will not delete any personal data. When you reset the factory, you lost all valuable data in your phone storage. So, make sure that before resetting your phone's device all valuable backup data on your phone's storage, like image, video, app, contact number, pdf file, etc. Making sure to complete all the backup data on your computer or any alternative device and then start using the mobile reset device method step by step. Process 1: Soft reset is very simple and the easiest process is to reset the BlackBerry No.30. If you use the soft reset method you will not lose any data from your mobile phone. This process does not solve any major problems, but it does help to solve a small problem. Step 1: Tap and hold the power button and tap the power from the menu to turn off the mobile device. Step 2: After a complete close, it removes the SIM card and the SD card. Step 3: Wait 15 seconds and put all the removable items. Step 4: Turn on your mobile device. You've successfully completed a soft reboot. Process 2: Reset Plant with Customization If Process 1 doesn't work, you can use Process 2 to reset your mobile phone. This process is only used if your mobile device is hanging, the app is not working, you are not properly using the problems, etc. that you are using this process. Watch the plant reset process below: Step 1: Turn on the blackBerry No.30 smartphone and tap the menu button and go to the menu setting. Step 2: Then go to the security and privacy menu and tap and click on the option. Step 3: Now you have the option to wipe the security and tap the options as well. Step 4: Tap and write to Blackberry and click Delete Data option. Step 5: Your phone will be removed all data and your phone will reboot. You have successfully completed the factory reboot. Warning: This erasure process is all without being informed to you. Because during the Factory reset, your device will be rebooted and all the data formatted. So make sure your mobile device is fully ready for the format. Process 3: Hard Reset Using Step 1 button: Turn on your new BlackBerry No.30 smartphone. Step 2: Now click on the time of VOL UP BUTTON and VOL DOWN BUTTON 10 Second. Step 3: After a few seconds The plant reset is complete and your phone will restart. Now your problem has been solved. Share0 Note: If you use BlackBerry No.10, check out our post on how to restart the BlackBerry 10 smartphone Some useful information every BlackBerry savvy® smartphone owner should know how to reset their device. The BlackBerry smartphone reset is a troubleshooting method that completely shuts down and restarts the operating system and BlackBerry smartphone application. In terms of troubleshooting, this is a useful first step if a BlackBerry smartphone is experiencing hardware, software or wireless network problems. There are two options when you reset: hard reset or soft reset. The difference between the two is that performing a hard relief involves removing the battery temporarily, whereas performing a soft reset, a key combination is used to reset the BlackBerry smartphone. Both are options to accomplish the same goal - a BlackBerry smartphone restart - but the important thing to know is that soft reset can only be performed on BlackBerry smartphones with the WERTY keyboard, such as the BlackBerry® Bold™ 9900 smartphone or BlackBerry® torch™ 9810 smartphone. Note: Before you follow the reset method listed below, make sure that any open documents, emails, or files are closed. Performing a hard reset As mentioned earlier, if you're using a BlackBerry smartphone that doesn't contain a WERTY keyboard, such as a BlackBerry smartphone® Torch™ 9850, you can only perform a hard reset because a soft reboot is not possible. The BlackBerry smartphone reset method is applied to every BlackBerry smartphone. Here are some steps you can take to make a hard reset: Remove the battery cover from the back of the BlackBerry smartphone Remove the battery and then reinstall it after a few seconds Replace the battery cover. Performing a soft reboot is a combination of three keys that resets the BlackBerry smartphone without removing the battery. As mentioned earlier, it is only available on BlackBerry models with the WERTY keyboard, such as the BlackBerry Bold 9900 smartphone or the BlackBerry Torch 9810 smartphone. Here are some steps you can do to make a soft reboot: Tap and hold the alt key (1) Holding the Alt key, press and hold the Right Shift key (2) With both of these buttons still pressed, press the Backspace/Delete (3) When the screen is off to indicate that the BlackBerry smartphone restarts, you can release the keys that you held. A few more things you should know about the reset process: Is there a question about resetting a BlackBerry smartphone? Leave a comment and let me know! Yes I know!
