Sophie Macon Did you know that the CFA Institute updates its curriculum and theme scales annually in August for all 3 levels? However, due to coronavirus, the CFA Institute has maintained the 2021 curriculum just like the 2020s. We know that time is a super meagre resource for all CFA candidates. So here's a quick guide to the 2020 weight topic and curriculum changes for Level 1, 2 and 3 that you need to know. The weight of the topic is key to the CFA study plans, as it guides candidates on the importance of each topic for exams. Needless to say, more weighted topics deserve more time to study, focus and practice. On the other hand, knowing the changes in the curriculum in advance is useful under certain circumstances, for example: candidates who have not yet registered for the next exam, but want to get a start on reading existing materials. They need to make sure that what they are studying now will be part of the updated curriculum; Candidates interested in getting a second-hand version of third-party training materials for the next exam last year; or candidates who (unfortunately) failed this June exam and plan to retake the exams in June next year. Existing third-party study materials can be reused if changes in the curriculum are minor during these 2 years. Here's a quick summary of the weights and learning changes you need to know for your exam. For each level, there is also a free 1 pager PDF summary you can download at the end of each section. In 2019-2020, there are no changes in the weights of the level 1 theme. In 2018-2019, there have been major changes, resulting in a significant reduction in financial reporting and analysis and quantitative methods to ensure a more balanced thematic range. These changes may have been made to discourage candidates from completely ignoring topics such as derivatives and alternative investments to prepare Level 1. In short, there have been many small updates throughout the Level 1 curriculum, but nothing serious in general. There are 57 readings in the 2020 Level 1 curriculum (against 58 in 2019): 1 reading from 2019 removed (Reading 7 - Discounted cashflow apps) No new readings added (yay!) 14 readings have been updated: mostly minor changes except FRA. For the FRA, there are significant updates regarding new accounting standards for income and rent. More information about the changes is available in the table below, as well as one PDF summary pager you can download. Download L1 Training Changes (PDF) There are no changes in the level 2 theme weights in 2019-2020. In 2018-2019, the focus on Reporting and Analysis (FRA), fixed income and equity investments, with a slight increase in portfolio management weight. Overall, the Level 2 update has reduced the variability of the theme theme 10 topics, with a maximum difference of 5% on the topic. It is even possible for 10 themes that will be tested evenly at 10% weighting each. These changes may have been made to discourage candidates from purely concentrating on (previously) big 5 Level 2 topics (FRA, corporate finance, equity investment, fixed income and derivatives). In short, although a few basic readings have been added and removed, the total length of content for the Level 2 curriculum is similar to last year's. There are 48 readings in the 2020 Level 2 curriculum (vs 51 in 2019): 8 readings from 2019 have been removed: Reading 4 - Trade Distribution: Fair Deal and Disclosure Reading 5 - Changing Investment Goals Reading 6 - Fintech in Investment Management Reading 23 - Corporate Performance, Management, and Business Ethics Reading 24 - Corporate Governance Reading 41 - Derivative Strategies Reading 46 - Process Portfolio Management and Investment Policy Statement Reading 51 - Algorithmic Trading and High Frequency Trading 5 New Readings Have Been Added : Reading 7 - Machine Learning Reading 8 - Big Data Projects Reading 22 - Corporate Governance - Other ESG Considerations in Investment Analysis Reading 43 - Exchange Funds: Mechanics and Applications Reading 48 - Trading Expenses and Electronic Markets 5 Readings have been updated, mostly minor changes, except intercorporate Investments, where content has been largely revised due to accounting changes. More information about the changes is available in the table below, as well as one PDF summary pager you can download. Download L2 Curriculum Changes (PDF) there are no changes in the level 3 theme weights in 2019-2020. In 2018-2019, there were major changes, which resulted in a significantly reduced weighting of portfolio management, as well as in favor of increased attention to equity and fixed income. Overall, the Level 3 update reduced the weight variability of the topic by 10 topics, with a maximum difference of 5% on the topic. In short, the major reconstruction of the Level 3 curriculum over the past two years continues. There are 38 readings in the 2020 Level 3 curriculum (vs. 37 in 2019): 12 readings from 2019 have been deleted: Reading 5: Asset

Management Industry Review and Portfolio Management Reading 10: Management of Individual Investor Portfolios Reading 15: Institutional Investor Portfolio Management Reading 16: Capital Market Expectations Reading 17: Stock Market Assessment Reading 30: Alternative Investment Management Portfolio Reading 31 : Risk Management Reading 32 : Risk Management Applications Forward and Futures Strategies Reading 33: Risk Management Applications Option Strategies Reading 34: Risk Management Applications Swap Strategies Reading 35: Execution of Portfolio Solutions 36: Evaluation of portfolio performance 13 new readings were added: Reading 10: Capital Market Expectations, Part 1: 1: and Macro Review Reading 11: Capital Market Expectations, Part 2: Asset Class Prediction Returns Reading 15: Option Strategies Reading 16: Swaps, Forwards, and Futures Strategies Reading 26: Hedge Fund Strategies Reading 27: Asset Distribution for Alternative Investment Reading 28: Private Wealth Management Review Reading 33: Portfolio Management for Institutional Investors Reading 34: Trading Strategy and Execution Reading 35: Portfolio Performance Assessment: Portfolio Manager's Choice : Example in Portfolio Management: Institutional Reading 38: Example in Risk Management: Private Wealth 5 Readings have been updated, mostly major content changes in the Portfolio Management section.
