Thrilling, ExcitingAudioGerman, German, English - audio description, English [Original], English - audio description, English [Original], French, French, Italian, Italian, Turkish, Turkish Marvel Cinematic Universe has long been unable to take advantage of one of Marvel's most famous heroes, Spider-Man. So when the character finally headed to the MCU, the film was aptly titled 'Spider-Man: Homecoming'. For people like us who grew up watching Sam Raimi movies, starring Tobey Maguire as Spider-Man, and later Andrew Garfield, this film was a refreshing change. While previous films have focused either on the socioeconomic problems Peter faced and how he juggled them, in addition to being a hero, or shining a light on the various interpersonal relationships in Spider-Man's life, 'Spider-Man: Homecoming' is directly about how fun web-saggy it can be. It must be said that with the kind of tone that the MCU goes in its movies, Spider-Man is the perfect fit. As a result, Spider-Man: Homecoming is a delicate balance between many light moments and stunning action. This confirms the key lesson of character – that with great power comes great responsibility, but there is no reason that a little fun can not come along with it. 'Spider-Man: Homecoming' received special praise for driving to focus on the high school life of Peter Parker, which is something none of the previous films have done. With 'Spider-Man: Far From Home', a sequel already out, you have to ask where you can watch 'Spider-Man: Homecoming' if you haven't seen it yet or where to watch it. Well, before we tell you, let us first explain the plot of Spider-Man: Homecoming. What is Spider-Man: Homecoming about? 'Spider-Man: Homecoming' takes place after the events of the first Avengers movie, and we see New York is still recovering from the aftermath of the alien invasion that destroyed many cities in its wake, even though the Avengers were able to quell the threat. Enter Adrian Toomes (Michael Keaton), and his rescue company, who are contracted by the city to clean up the mess. However, this is soon taken over by the Department of Damage Control (D.O.D.C.), a joint effort between Tony Stark and the U.S. government. Toomes is furious that he is deprived of such a huge business opportunity and instructs his workers to steal the Chitauri technology they plan to use to create and sell advanced weapons. The film then jumps on eight years later as we see Peter Parker (Tom Holland) being drafted by Tony Stark, or Iron Man (Robert Downey Jr.) to join the Avengers. This is the part that is featured in 'Captain America: Civil War'. However, Stark decides that Parker isn't ready to become a full-time Avenger anymore, so the friendly neighborhood hero continues to study at the Midtown School of Science and Technology. But Parker, who got the urge to be a hero, is leaving his college academic decathlon to spend more time fighting crime. On one of these crime missions, they run into criminals who use toomes-made weapons. That leads to the two of them being emming for the first time, and Toomes dropped Spider-Man into the lake, where he was rescued by Tony Stark, who was watching the suit. He's been warned to stay away from Tooms and his crew. Meanwhile, a new Spider-Man villain emerges from Toomes' crew, that's Shocker. It's even more complicated for Peter when his best friend Ned reveals his secret identity. However, he joins in and helps Parker follow Shocker, and so Toomes; and also helps him disable Stark's tracker and unlock the suit's maximum potential. With these newly unlocked abilities, Peter is hot on the Trail of Toomes, and that leads to spectacular stunts and sequences at the Washington Monument, where Parker rescues his friends, and then to the Staten Island Ferry, where Spider-Man goes to arrest Toomed and his new buyer. He does capture the buyer, Mac Gargan (who later becomes Scorpion). However, Toomes shows up and things go wrong. Eventually, the ferry is torn in half and Spider-Man tries to save everyone, but eventually needs help from Iron Man. Tony, dissatisfied with Peter's evading responsibility and going against direct orders, is taking away the Spider-Man suit. They say heroes know their true value when they're at the lowest level, and that's what happens with Peter. On the night of his prom, which is also why the film is called 'Homecoming', he realizes that Toomes is planning to steal even more tech, this time from the Avengers. He's wearing his old suit and watching Tooms. He goes over Shocker first, with some help from Nedo, but is eventually able to suppress Toomes after a long campaign fight that is shown brilliantly in the film. The film ends with Parker rejecting Stark's offer to join the Avengers full-time, and we see Tony propose to Pepper Potts (Gwyneth Paltrow). Stark also returns Parker's suit, which he married, and just as Parker tries it out, Aunt May (Marisa Tomei) walks in. A scene with medium credit shows A prison meeting between Scorpion and Vulture.
