This sophisticated modern humidifier, designed with an attractive brushed metal finish, is clean and resistant to scale and fingerprints. Oversay water tank provides moisturizing relaxation to symptoms related to dry air and allows time for continuous operation in any setting. The independent 360-degree rotating mist nozzle is pointed in the opposite direction for a variety of room coverage and a more powerful steam output in the same direction. Optional noc much light creates a soft and beautiful glow at the base of the humidifier, adding a relaxed atmosphere to every room. Press the night mode icon to dim the light on the LED control panel and turn off the night light during sleep. HumeXL features an automatic shut-off safety function that automatically clears the humidifier when the water level is low or the water tank is removed from the base. HumeXL is supported by an industry-leading five-year warranty for pure enrichment, so your satisfaction is 100% guaranteed. Free shipping on orders over 50 dollars! It's very quiet (I haven't noticed it's turned on) and loves Night Mode. Definitely five out of five stars. It passes through a lot of water quickly, but I think that's how the air continues to humidifier so well. I am very happy with this humidifier. - MK awesome shopping. Super quiet, very easy to refill, I absolutely love dual directional sput, very easy to operate. I should have bought those two!- Brian E.J. Best Humidifier, we still tried. The others we found at Walmart and Target were This has been going well for a few weeks and is the first thing that feels like it's actually going well. We love to get a better sleep, feel better, and have a sophisticated design and ease of use. A great product. - Daniel a great purchase with a lot of humidity added to our master bedroom. Good-looking appliances, too. I'm very happy. - The cleave humidifier works very well as expected. The machine is completely silent and it's a plus. Unlike others I've used in the past, it's easy to use and there's no filter to replace. - Joseph S. 8.9x 5.9 x 14.4 / 5.3 lbs humidifier5 liter water tank, water tank cap, user manual high up to 16 hours. Moisten dry air in your home or office with MistAire ultrasonic cool mist humidifier from pure concentration to low 50 hours in minutes. This powerful aesthetically enjoyable tabletop humidifier is packed with smart features that make it the perfect solution for improving air quality in any room. The humidifier's 1.5-liter tank provides a moisture output of up to 150 milliliters per hour with a 360 degree fog nozzle, providing an optimal solution for relieving symptoms associated with dry air. At low settings, continuous and safe operation of up to 16 hours can be expected. MistAire has an automatic shut-off safety function that turns off the humidifier when the water level is low or when the water tank is removed from the base. High and slow settings make it easy to adjust the direction and speed of the mist to suit your comfort level. MistAire is supported by an industry-leading five-year warranty for pure enrichment, so your satisfaction is 100% guaranteed. Free shipping on orders over 50 dollars! What I like most about it is that you can turn the steam flow in any direction you want. It's clean and easy to use. It is a very quiet, very refreshing and no more dry nose. I'm going to order another one, I love it and am very happy with it. - Dorothy loves this thing! You don't have to clean it every day like some. This year it lasted long next to the Christmas tree!!! It quietly whispers and has a good capacity! - Rebecca. I couldn't be happier with my choice.Ultrasound whispers quietly with occasional echoes of water, a soft cascade as if it were a drop of water rather than dripping, so a little white noise is a little calm because I haven't plugd in the fan yet. The reservoir is easy to fill (uses distilled water) and is ready. The fog is cool and overwhelming, but instead of smoky, you can turn the nozzle in the desired direction. - Tracy J This product works great! This humidifier is quiet and doesn't make a sound or light that I personally enjoy. So far, this humidifier has helped me wake up feeling well refreshed and ready to start the day. Since I bought this humidifier, I've actually noticed that I'm reducing the amount of nosebleeds and sore throat I get. - Megan M humidifier is the quietest thing I've ever had, so I can finally keep it up at night. The size was perfect for my nightstand and it was very easy to assemble.Use <a0> for the first time to set it up.</a0> Humidifiers give a certain amount of moisture (quietly) without leaving the room cold or condensed. We are very happy with the purchase of this product. - Nady humidifier, disc cleaning brush, power adapter, user manual English (UK) English (U.S.) Espanyol (Latinoam'a) Spruce / Claudia Fisher feels like a small, space-saving design contemporary look we like, feels an effective look to cooling and moisturizing, settings we do not like, it is difficult to manage the mist nozzle mist nozzle please continue to read the review of the product fully may leak a little. Many people turn to humidifiers in dry months (or climates) to relieve common problems such as allergy flare-ups, congestion, and dry skin. But what you choose for your living space boils down to many tastes beyond mere performance. We tested the Pure Enrichment humidifier every night for a week to see not only how effective it was, but also whether its extra functionality overall enhanced or impaired the product. Read on to what we've found. Looking at the user manual briefly, the pure enrichment humidifier is very easy to set up. Once you have found a place to set it, the manufacturer recommends that you release the tank at least 6 inches from the base, open the tank lid, twist it, fill it with water (un filtered tap water works well), reasse the cap and return it to the base. After following these instructions, we plugged it in and pressed the power button several times to set the humidifier high and it quickly released the steady flow of fog. Despite the Spruce/Claudia Fisher small 1.5-liter tank, the MistAire ultrasonic cool mist humidifier can run for up to 16 hours and is a pretty impressive feat considering that a 4-liter competitor can only run up to 10 hours. Humidifiers have turned out to be more aesthetically enjoyable than their many opponents, the main plus if you are planning to put it in a well curated room or guest often just one. The shape of the unit is similar to a drop of water and can be easily pushed over a corner or small stand or bookshelf. It's also very quiet, so you don't have to worry about disturbing the TV marathon. Despite the small 1.5-liter tank, The MistAire Ultrasonic Cool Mist humidifier can operate for up to 16 hours, but when turned on, the power button of the humidifier shines blue and there is an option to light the water tank in blue nocer light. While not necessarily related to the core functions of humidifiers, these lighting features give the device a more modern feel than some other similar products. The humidifier has just one button near the base of the device. Click on it once.Click this button, click again to increase the speed setting (start at a lower speed), and then click again to turn it off. This is a simple design, but it's a bit of a hassle not to know which settings are in at a look. We liked the dialing features of other models we tested. Spruce/Claudia Fisher We tested the Mistaire in a small bedroom in New York City in the middle of winter (when we needed the most humidifiers). The humidifier did a good job of freshening the air in the room, but it only take 10 to 15 minutes to actually make a noticeable difference, but it was a little difficult to understand how to change the mist setting from low to high. In addition, it is possible to change the direction in which the mist blows, but one piece of machine that seems to be of low quality is the mist nozzle itself. It was able to lead the fog, but the thin plastic parts are very unstable and do not turn easily. MistAire was very effective in our small room, but the performance will probably go down as the room gets bigger. Pure Enrichment recommends this product for medium-sized rooms up to 250 square feet. Thanks to the automatic shut-off, you can rest soundly while running MistAire. The humidifier is programmed to turn off when the tank is removed or when it becomes low, so you don't have to worry about moving in the sky. As mentioned above Spruce/Claudia Fisher, the optional night light is also a nice, modern touch. This feature can be turned on or off, but the power button light can't be turned off. If you are worried about turning the humidifier away from your face or turning it on and falling asleep, you need to cover it. You can't turn off the power button light - there's something sensitive sleepers to keep in mind. The humidifier is quite small and has only two main parts (aquarium and base), so we've found it pretty easy to clean. The manufacturer will also throw a little disc cleaning brush to help you. Unlike other humidifiers we tested, there are no filters to clean or other removable parts, so the cleaning process has been simplified. It is very easy to store when not in use. We found it to fit under our closet, bedside table, and our bed. The Pure Enrichment humidifier is pretty priced for what it is, but you're paying more for looks than the added features. Petite design is sophisticated as well as simple size and shape for most tabletops, shelves and counters in your home. This is an important consideration when you run out of space and need a subtly designed device. The humidifier is quite small and has only two main parts (aquarium and base), so we've found it pretty easy to clean. Honeywell HCM350W Germ Free Cool Mist Humidifier:MistAire humidifiers are small and clean and can moisturize the air in small spaces, but if you're looking for a larger tank and a model with a longer run time, it's worth considering Honeywell, which is sold for about 70 dollars. The Pure Enrichment model can run for 16 hours in a 1.5-liter tank, while its competitors can run straight for 24 hours in a 1-gallon tank. In addition, it can humidifier 3,600 square feet (approximately 14.5 times that of mist air). Of course, it doesn't look and has a much larger footprint, so if you don't want to use it in a big space, MistAire is still a worth buy. TaoTronics Ultrasonic Cool Mist Humidifier: The model cost of TaoTronics is almost the same as pure enrichment, and the design is not too far away, sporting both blue and white plastic designs. The main difference is that it offers the first 3.5 liter tank, and the latter offers a 1.5 liter tank. Surprisingly, the TaoTronics model can only run for 10 hours even though the tank is large, but the pure enrichment model can run for 16 hours. Both humidifiers approximately the same square feet, but one leg of the TaoTronics humidifier has a twin nozzle design, allowing the mist to be turned in two directions. If you don't think it's necessary, think about going pure enrichment, just for longer runtimes and smaller, easier hidden designs. The final verdict is worth it. If you need a multi-faceted humidifier that offers a variety of features and customization settings, Pure Enrichment devices are for you. But if you're looking for a simple humidifier that's more chic than cumbersome, this device will look cool after work. That.
