You can download the game according to the links below, you also have an APK version. How to download and install NBA LIVE Mobile Basketball MOD APK on Android Mod APK file is very easy to install: Just click the download button below Download MOD APK Wait until the file is downloaded then open it Install NBA LIVE Mobile Basketball Mod Apk file on your Android device Follow the instructions inside Start and Enjoy Mod Make sure you tick the box for - "Enable installations from sources other than play store" in your Electronic Arts settings crashed into the NBA Jam on Android, and you won't be happier. They still have many elements of the original console game and added some features that will be produced soon. We couldn't believe it when we first saw it and waited to hit the Wi-Fi to download it. And it costs more than 300 MB. This 2in2 arcade basketball NBA Jam game is just like the one you remember to play as a kid. But it is more creative in gameplay. We summarize everything you liked from console messages in this version of the mobile game, from the announcer to the blocks jumping high. The thing that made this game so unique and fun is that there were no real fouls, free throws, or violations except 24. Everything else is a fair game, and there has to be a bull running sky-high antics at the finish line. Every comment in the Google Play Store about this app says: It's worth the price or really brings me back to my kids. They hit a substantial impact in the NBA Jam market, and you're getting a lot of the classic title. The multiplayer feature is an essential addition and we are sure it will amaze anyone who plays the game. National Basketball Association It's a North American professional basketball tournament. It's the oldest professional basketball tournament in the world. The match has 30 clubs participating in the competition (including 29 American basketball clubs and one Canadian club). On June 6, 1946, they hosted the NBA Basketball Tournament in New York for the first time. The prize is called the National Basketball Association. The competition is organized and managed under the administration of the Basketball Association of America (BAA). Since its inception, the tournament has undergone more than 70 years of intensive development. The NBA has become the most attractive basketball tournament in the world. The game always attracts the attention and watching of most basketball fans. In particular, the NBA basketball tournament has always occupied television waves in North America and other basketball fan countries in the world such as the Philippines, China, and Guyana. With its charm, the NBA basketball tournament has become aimed at attracting basketball players, the world's leading coaches to compete. That's why NBA revenue is always at the top of the world's sporting tournaments. Famous players playing football in the NBA are also high-income athletes, no worse than footballers like L. Messi and C. Ronaldo. Once answered what is the NBA? Let's learn about the most attractive basketball tournament on the planet. As for the format of the game, the NBA professional basketball tournament divides teams into two groups (which corresponds to two groups in the east and west of the United States). It divides each group into three regions and there are five teams for each location. The teams will play three phases: Preseason, Regular Season, and Playoff. - Preseason: It's a team at the start of the warm-up season. During this period, teams will play randomly without a rating (as friendly matches in football). Therefore, couples can choose their opponents from outside North America to play. Each team will play 82 matches, four matches against teams in the same area, 3 - 4 matches against teams in the region. Next, there will be a two-match against teams in other areas (Eastern Team vs. Western Coalition and vice versa). At the end of the regular season, eight teams with the highest ratings in each domain will enter the playoffs. There will be a motivational reward for the basketball team at the top of the domain ladder during the regular season. - Playoff round: It's the last round of the NBA season. The winner of the season will be decided by the playoff round. This round will be attended by 16 basketball teams, including the eight teams with the highest ratings in each domain - the format of the cross-match between basketball teams from 2 regions. The team that ranks first in the same domain plays against a team with an eighth rating in the second field. order is based on the primary season). The winner of the above matches will continue to play against each other in every pair of games. Eliminate select two winning teams to enter the finals and select the winner. EA released nba jam for Android in 2012. As a hardcore basketball fan, we have been looking forward to this game for a long time. NBA Jam maintains many elements of the NBA series, and they will add some additional features in the following version of the upgrades. However, the game must download the 300MB data package. We recommend that players download it when they are connected to Wi-Fi. NBA Jam is a 2v2 basketball game, just like the one we played when we were young, but with a comprehensive upgrade. From voice comments to dunk action, this is consistent with the console version of the game. And there's no bad setting in NBA Jam. Players can play freely and the only rule is 24 seconds and scoring. After you choose your team, and your opponent's team, the game can begin. The first is the battle between the two sides. The buttons on the screen are very sensitive, and if you put your finger on the buttons, there will be different actions. The initial buttons include passes, acceleration and dunk, and if you press acceleration and then slam Dunk, three new blocking actions, aerial relays and shooting will appear. Similarly, if a stroke occurs, there will be an opportunity to pass or steal the ball. We also like this game, because when you tap the accelerator, you can use your elbow, which allows you to break the opponent's defenses and create space for shooting. We can also use different other actions through different gestures. In NBA Jam, players can play in the league and choose one of their teams to beat 36 other opponents. And multiple companies can be played at the same time, each of which can be automatically saved to an SD card. Once you have settled the best rookie and veteran tiring games, you can try a higher level of difficulty. Highly demanding computer AI is complex, and all kinds of steals and blocks make you suffer. Another highlight of NBA Jam is the achievement system that appears in game consoles like Xbox360 and PS3. Completing the challenge of the game will also bring you extra fun. We are glad that such a simple but attractive game can finally be transferred to the Android platform. We found that since we downloaded NBA Jam, we rarely play Xbox, but have played NBA Jam Leagues and Challenges. We also recommended this game to our friends, and many people also downloaded and played against it. Both game screens and background music are excellent, but we can still only get 9 points for NBA Jam because this game does not support online battles. Fortunately, we can connect via Wi-Fi LAN, which to some extent will make up for the shortcomings of multiplayer games. After Your team and your opponents, the game begins, and jump-ball is where the action begins. The controls on the screen are responsive, and if you move your fingers across each department, there are different actions. There are buttons for Pass, Turbo and Dunk. If you tap Turbo and slide your finger through Dunk, the selection will open for Block (Defense), Alley-Oop and Shoot. If you swipe towards pass, you can push or steal the ball. Now what's cool is that if you tap turbo, you can throw your elbows. This will help you free up some game space and take those desperate seconds to the last role. There are also gesture controls that you can use to delete them by clicking the right buttons. Otherwise, you can swipe your finger in different directions on the mat to release additional movements. Make sure you read the controls before playing as we create them and can challenge yourself to understand them at a glance. As mentioned earlier, there is a campaign where you choose your division to go to the Northwest Atlantic, Southwest, Southeast, Pacific, Central. Or play them all. Select a team and defeat 36 rival teams. The noble thing about this model is that you can have multiple campaigns at once and automatically save each one to an SD card. Once you've mastered the troubles of the rookie and veterans, try the heavier ones where the CPU plays its game, steals the ball and constantly blocks your shots. This game mode allows you to get a quick game. You can select teams for you and mobile devices. And after unlocking, you can choose different players and customize the unit. If you get tired of your chosen character, you can replace it with another part-time one. It's excellent when you have little time, and this mode helps unlock some challenges where you don't want to ruin anything in your campaign. You can join or create a game match between you and someone else who shares the same Wi-Fi in the area. It's an exciting feature and can leave some friendship on board after a few matches. The only thing missing is the ability to play against random people online, rather than just friends over Wi-Fi. Another great mode is the Challenges section, which is now seen in many console games like Xbox360 and Playstation 3. As well as achievements that you can unlock, you will have challenges to complete. It provides that extra bit of fun after beating the campaign or just taking a break. NBA LIVE Mobile Basketball is a mobile basketball game with extreme 3D graphics, reproducing realistic images from athletes' shapes to the ball lines' movement on the field. Your task in the game is to choose your favorite team, build and bring this team to victory. NBA LIVE Mobile Basketball will guide players on how to play, with basic tasks such as choosing their favorite team, building a team, and arranging playing positions to compete. Other groups Player movements and ball is the way to get the ball into the net accurately. NBA LIVE Mobile Basketball has a new generation of basketball game with simple button controls. Your goal must be to steal the ball in competitive ball contests, move sensibly, and score points. The game has fast pace, short games, but enough for two teams to show off their smooth runs and accurate pitching. Victory will bring you gold, valuable items and unlock special skills. These factors help the team get up a level faster. The fundamental thing in the game is still the player's ability, knowledge of basketball tactics. Matches, events and players in NBA Live Mobile Basketball Android will be based on real NBA tournaments, even if they injure an external player. This makes the gaming experience more authentic and engaging than ever. The game also supports online game mode, where you can compete with other players to win attractive prizes. The game is available for free on Android. Thanks to Android, NBA Jam MOD APK finally came to the platform. Because something as beautiful and simple as this classic never gets old. From the moment you download, you play less Xbox and just take advantage of the NBA Jam MOD APK campaign and challenges. From gaming graphics to background music and smooth play, it's a solid game. We just ranked nine out of ten due to the lack of online multiplayer option. Also, there is sometimes additional Wi-Fi to download while the game is loading, which can stop gameplay. These are our only complaints and they are small. Try it, because once you start, you'll want to play more! More!
