Home / Class 5 Saxon Math 6/5 Packing The average 5 includes word problems, add/subtract/multiply/divide whole numbers/decimals/fractions/mixed numbers, equivalent fractions, conversions between fractions/decimals/percentages, estimates, variables/expressions/equations, geometry and measurements, probabilities, etc. Manipulations are referred across these levels (unlike 4.5 and 6.5), but are optional. The same methodology has been applied in both the intermediate and traditional Saxon Homeschool math courses, but the average goes further into detail with 4 process problem solving stages: 1) problem understanding, 2) plan, 3) project, and 4) look back (evaluation). Hoke, Stephen Hoke, Saxon Hoke, Saxon
