Download MX Player 1.29.4 beta APK. If you're looking for the MX Player app, you can get it from here. We offer a free MX player APK download for Android from our website. We often update this page with the latest APK file. You can download the latest version of the MX player (and older versions), or the MX Player Pro from this page. MX Player managed to make a difference in a short time. It's simplicity in the user interface and the ability to do what other players are not able to do. Gestures and other impressive features of this app make video playback smooth and convenient on your Android device. It has a great gesture control that makes video playback experience easy and enjoyable. For example, you can pinch to zoom in, scroll for brightness and volume on the appropriate sides, exit a video on your home screen, and can do much more. In addition, there are tons of other features that give the MX player an edge over any other Android video player app. A feature where the video pops up and place itself on the home screen is commendable. RECOMMENDED CHECK: You can download the MX player download links mentioned below. However, I would also recommend you guys to check out the MX player pro download and download the MX codec from our site. Installing codec will help you play every type of media file on this app. MX Player APK Download LatestThimMX Player 1.29.4'File Size 37.14MBSytem Requirement Android 4.2 (armeabi), Android 5.0 (arm64) DeveloperJ2 InteractiveDown MX Player armeabi-v7aDownADown MloadX Player Arm64-v8aPro Tip: If you have a computer /Mac, if you have a computer /Mac, if you have a computer /Mac, if you have a computer /Mac, if you have a computer / Mac, Mac, then you have to download MX Player for PC or MX Player for Mac. I'm sure you won't use any other media player after trying it on your computer. You can download the app from our website or Google Play. If you're having trouble downloading from Google Play, I suggest a way to download the MX player pack installation (commonly known as APK) for Android with the download button above. The package is considered to be a standalone way to install any Android app. You can transfer it from one phone to another phone using Wi-Fi Direct and Bluetooth using apps such as Xender.MX Player works on almost all phones such as Samsung, Huawei, HTC, Xiaomi, Lenovo, OnePlus one/two, OnePlus three/X, Oppo, etc., and even some not-so-popular LG branded phones, Vivo, SEE, Micromax, Sony, etc. How to install MX Player on Android DeviceDownload MX Player with the download button above. After downloading Click on this link to start the installation procedure.Follow the screen instructions to install the app on your Android Device.First of all, you can directly download the APK file from this site, or you can do a Google search for the MX Player APK download. Open any of the search page, and click on the download button. It's easy. The download will start after download, open the download folder where the file is downloaded. If you downloaded via PCER, transfer the app via Bluetooth or USB cable. Now go to the folder where the file is sent. If you downloaded the file on your mobile phone, then click on it. Now, if you don't have the permission of unknown sources, turn it on, qgt; in the unknown sources. You can then install the package. Installing the package; Wait for installation and then the label will be created on the home screen for the app, now you can open it and view the video. I would recommend you install the latest version of MX Player on the process of installing the package because you won't be able to update it if you're having problems with Google Play.If you're having any problems, you can just go to Google Play and install by going to the installation page in the Google Play app. I hope you enjoy this incredible player. However, you can also check out the list of other amazing media players for android. Frequently asked questions☞ How to download MX Player APK? If you love this player, then share this site with friends and family. Thanks for reading the tutorial, comment, if there is any problem with installation, we will return to you soon.mx player apk MX Player is one of the only media players for the Android platform that uses the full potential processors that are available in modern smartphones. The ability to use multi-core rendering is not something common with Android players, and this makes MX Player a special kind of application. The app also has support for subtitles, zoom, and panning, not to mention the hostess of other options that are usually only available on conventional PCs. You can resume video, change between hardware and decor software on the fly, switch between multiple audio tracks, change the ratio of sides, turn the movie, and more. Overall, MX Player provides almost all the features that a user may want from a player, with the only downside being that it shows small ads when pausing videos.
