QWhy should I switch to digital TV? ADigital TV will give you excellent image quality, multi audio and subtitle choices, weekly TV schedules and information about TV shows. In addition, with our STB and USB storage device, you can record your favorite TV shows, as well as pause live TV and continue watching again without missing a part of your show. The current analog TV broadcast will also no longer be available after Singapore has completed its migration to Digital TV. QWhat video and audio formats are supported on STB? AOur STB is a versatile media player and we support the file formats. File type Video Codec Audio Codec mp3 MPEG1, MPEG2 MP2, MP3, LPCM ts, TRP MPEG2, H.264 MP2, MP3, AAC, HEAAC vob MPEG1, MPEG2 MP2, MP3, LPCM mp4 MPEG2, H.264 AAC, HEAAC, MP3 mkv MPEG1, MPEG2, MPEG4, H.264 MP2, MP3, AAC, HEAAC, LPCM avi MPEG2, MPEG4, H.264 MP2, MP3, LPCM, ADPCM, AAC, HEAAC flv H.264 MP3, AAC mp3 MPEG1 Layer 2, MPEG1 Layer 3 QMy TV programs 'No signal' and the signal light on STB lights up in yellow AThe signal received by STB is weak or unavailable. Try the following. Place the antenna higher and away from other electronic devices to avoid possible interference. Place the antenna near a window or door facing the outside of your house. Try rotating the antenna by placing it vertically, horizontally or diagonally. Make sure the antenna effect on the STB is turned on (Select Menu->Installation->Manual Search. Make sure the antenna effect is turned on.). Click here to check if your site is ready to receive digital TV channels. AThis is probably due to the different sound levels between the HDMI, A/V and TV inputs on the TV. We recommend that you adjust the sound level of stb to 28 or higher and no worries, you will still enjoy superior sound quality from the digital TV broadcast even when setting to a higher sound level at STB. Q Do I need to sign up for warranty? ANei, you don't have to sign up to enjoy the one-year warranty that comes with your purchase. But keep the receipt as proof of purchase within the warranty period in the event of a need for repair or replacement. If the receipt is printed on thermal paper, make a copy on plain paper, as the thermal receipt may fade out over time. Download the firmware. If the first 6 digits of the serial number are 180818 or less: Download If the first 6 digits of the serial number are greater than 180818: Download\* The serial number is the 15-digit number located on the bottom of the STB. Extract the downloaded file and copy STB2T2Firmware.abs to a USB flash drive. Connect the USB flash drive to the STB and go to Menu->Miscellaneous. Select Firmware Upgrade (Via USB) and select STB2T2Firmware.abs. Continue following the on-screen instructions to upgrade the firmware. When the upgrade is complete, NMS ETA Stereo STB will perform the upgrade and restart automatically. Congratulations! The set-top box is now upgraded with the latest firmware. Upgrade firmware for KONKA Digital TV Set-top Box 1. Download KonkaFirmware.zip by clicking Download. 2. Extract the file and copy program.bin to a thumbdrive. 3. Connect the USB flash drive to the Set-top Box and select the following menu on the remote control. Menu -> extra -> USB control -> USB upgrade 4. When prompted for a password, type 0000. 5.
