More Louisiana Department of Agriculture and Forestry and Louisiana Animal Health Council filed court papers to limit operations of a known bail pen in the state. Two state agencies filed a motion for a temporary restraining order, as well as a request for a preliminary and permanent injunction against Gary Thompson and his son Jacob Thompson, both from Vernon Parish, to stop buying and selling livestock. A court date for the agency's request is set for August 17. According to the petition, both Thompsons were explicitly banned from buying and selling livestock after the Animal Health Board refused to renew the cattle permit in 2018. The petition alleges that Gary Thompson never held the cattle trader's permit required in Louisiana. The two have a stake in Thompson Horse Lot, which marketed horses on social media under various page names as available for bail with a seat on a truck headed for Mexican slaughter sites. The petition will also prevent anyone from acting as a cattle trader on behalf of the Thompsons. The first scam was they claimed that the private care facilities that the horse purchased would be moved there and kept in quarantine. I paid an extra fee to have them placed privately and the horses showed 500 pounds thinner than when buying. The next issue was one horse has a severely injured leg and neurological problems. Upon learning this, I looked back at the video they took and it is clearly visible even if they tell you how healthy and how great the legs are on this horse. The last question was they claimed the tone of the horse 8 years. He was 20. The horse should be put down two weeks after arriving at home.
