Learn more about map styles Each map type offers different information, and each map style is designed for a different purpose. Read about the map styles and projection used in the map above (3D Physical Map of pine Rivers). Physical map Physical map illustrates the mountains, plains, oceans, lakes and rivers and other characteristics of the physical landscape of the Pine rivers. Differences in land elevations in relation to sea level are represented by color. The green color represents lower elevations, orange or brown indicate higher elevations, shades of gray are used for the highest mountain ranges in the world. The underwater topography is represented by the blues. The darker blues are used for the deeper water, lighter shades of blue represent shallower waters, such as the continental shelf. Plate Map projection A map projection is a way to turn points into an Earth to points on a map. This 3D map uses the Plate Carree projection, a one variant of equidistant cylindrical projection originated in ancient times. Parallels and meridians are equally spaced, they together form equally sized squares over the entire world map. Using simple grid, where each cell has the same size and shape, brings significant benefits. For comparison, detailed maps of Pine Rivers use mercator projection instead. Mercator projection better preserves the shapes and angles of small areas, but on the other hand significantly distorts the size of the areas. Administrative classification region (level 2) Sub-regions n/a South 27° 25' S North 27° 5' 16 S West 152° 40' 44 E East 153° 4' 8 And Minimum elevation -1374 m Maximum elevation 774 m Land/Water coast Page 2 Maphill is definitely the most comprehensive map gallery on the web. But the gallery is not a great gallery without visitors. If you like any of the maps, please do not keep it to yourself. Share this page. Use the share buttons for Facebook, Twitter, or Google+. Give your friends a chance to see how the world has turned into images. Maps of the Pine Rivers region, Queensland, Australia are just a few of the many available. Get maps of Pine Rivers for free. You can easily download, print or embed 3D maps of Pine Rivers, Queensland, Australia on your website, blog or presentation. Still image maps look the same in all browsers. Administrative classification region (level 2) Sub-regions n/a South 27° 25' S North 27° 5' 16 S West 152° 40' 44 E East 153° 4' 8 And Minimum elevation -1374 m Maximum elevation 774 m Land/Water coast of Australia is officially known as the Commonwealth of Australia. This country comprises the mainland, the island of Tasmania, and several other smaller islands. The land mass of the country covers an area of 7,620,000 square kilometers and is on the Indo-Australian Plate. It is surrounded by the Indian Ocean as well as the Pacific Oceans and is separated separately Asia by the seas of Arafura and Timor. The Tasman Sea lies between the mainland of Australia and New Zealand. This is the smallest continent in the world, consisting of the Great Barrier Reef, the world's largest coral reefs nearby, off the northeast coast. The world's largest monolith, Mount Augustus, is located in the West. At 2,228 meters above sea level, Mount Kosciuszko, in the Great Dividing Range, is the highest mountain. The Australian continent has a wide variety of landscapes. The country consists of many tropical forests, mountain ranges and dry desert in the center. It is a flat continent and has one of the oldest and most non-fertile soils. There are desert lands commonly called outbacks and these make up most of the portion of land. It is the continent inhabited by droughts with various climatic conditions and varied topographic characteristics. Maphill is a collection of map images. The underwater topography is represented by the blues. The darker blues are used for the deeper water, lighter shades of blue represent shallower waters, such as the continental shelf. Geographic projection of the map A map projection is a way to turn points into an Earth to points on a map. This map of Pine Rivers uses plate carree's projection. The projection of the Carree Plate is a simple cylindrical projection originated in ancient times. It has straight and equally spaced and parallel meridians that are at right angles. All projections from a sphere to a plane are distorted. The disadvantage of Carree's projection is that it doesn't try to compensate for these distortions. For Pine Rivers' overview, this is not a significant problem. Detailed maps make better use of mercator projection, which better preserves the shape of small areas. Administrative region of administrative classification (level 2) Sub-regions n/a South 27° 25' S North 27° 5' 16 S West 152° 40' 44 E East 153° 4' 8 E Minimum elevation -1374 m Maximum elevation 774 m Land/Water coast Page 2 Maphill is a collection of map images.
