Divergent aptitude test percentage

The eligibility test is an annual assessment taken by every 16 year old. This serum, like others, will change the reality in your mind, to help you decide which group you are, helping you select the rest of your life before you choose the next day permanently. This test is arranged the day before the school starts. The test [Edit | Edit Source] The test itself is taken by drinking serum like water, which causes the start of the halukanti, during the course of the test, they have two options. The knife or cheese (in the book but in the movie is meat) is a function of the selection ceremony where the test-scores should be selected to which group they will enter. They can either leave their families and choose a completely new group or they can live with them. The result of their eligibility test is usually taken into account by the tacars, but the final decision is left to them. Administration [Edit | Edit Source] Test [Edit | Source Editing] This test is conducted every year for children reaching the age of sixteen who are considered adults in Chicago. The test cannot be administered by a member of his own group of young people, so the volunteer test allwaters usually consist of eight nats, which test non-nat youth, after examining two of the other four groups with two oalwaters, ten test-back. A non-nat test is the tori-no, which performs the geo-and-cross test and hides the secret that its results show it is multiple Chicago. Before the test room [Edit | Edit Source] there are 10 rooms for the qualification test. Two are called

from each sect at a time. Administrators are mostly nato volunteers, but there is a pundit and a jet to the net (Tori No), because the rules state you cannot be tested by any of your own group. The description & scenario [Edit | Edit | Source] In the picture it is through the process of elimination after each stage, which determines what group you are, for example: first: one of the tables, two baskets, one of which is an ant of cheese in it. Then you choose to shout a woman's voice! '. The gout often chooses the knife and the sertramy often chooses cheese. In the earlier case of Beatrice she refused to present the dog that happens either then, reacting a snout, and when a baby appears and the dog walks on it, Beatrice puts herself on the dog-a-jet and answers the cat. After that, a devil-looking dog appears and starts to chase you. If you stay calm, the dog will walk you and take a blow to your face, its aggressive manner melts. If you use dogs in a smart way to calm down, you may be a pundit. Then a The girl in a white dress appears on the other side of the room. He runs the 'dog' and starts to run towards animal rights as it bares his teeth and his teeth to pounce on him. If you are a live, you chase and jump, and use the knife to kill his dog. If you are a nota, then you protect the child from any harm, usually by the kick in between the girl and the dog. If you are suffering, you feed the dog trying to block the cheese to help it to stop the tension. (This is also in the full scene film). Another scenario is the one on a bus where the so-called (my) man asks you if you know the person involved on the front page reading a newspaper, if you don't accept the cleaning as you know the offender that ends up being clean. There is also the scene of the bus, which the man says 'Do you know this guy? (And a picture of this person in a newspaper shows that the safaka killer finally killed him). You have a feeling that the person in the picture knows you, but it would be a 'very bad idea' if you tell him. You may realize that something terrible will happen to you. If you know this man, you tell the truth. If you say 'no', then the human says in a scratchy head that you are lying. If you deny it, man will say, If you know it, you can save me! If you say yes to this guy now, you are most likely the nat. Then your ability test results are derived. Results [Edit | Source Edit] If the test is inconclous, resulting in the elimination of only three or fewer factions, the monitor either has a multiple Chicago or knows what to do to appear as one. In the case of Tras, only two were eliminated, with the other three being his perfection decision and therefore refusing to make a choice at the start, ending with an equal April qualification test, and only qualified for two races. As a result, young people are considered to be unsaic... They value compassion, nature and peace. The clean-up is the fact that should be shared and denied by the false, black and white thinking. The geot-he is considered brave and brave. Pundit-he is considered curious and intelligent. Many Chicago-themed groups are not fit in society, and therefore threaten the group's system.
