Gone, into the shape of a gone person, raise the demon Etrigan! I think if you told the old Jason Blood that he would have featured the very first choice of a brand new action figure in the line that kicked off the foray into the entire DC Universe, even he would have said you're crazy. I mean, am I really so happy to treat not one, but two Jack Kirby DC creations as a one-action figure of choice? At the time, it just seemed like a really cool deal to get Etrigan and Orion at the same time, but looking back, it was pretty amazing considering what's never been done in the DC Universe in terms of action figures at this point. Etrigan's inclusion in the DCUC Series 1, more than any other number, was very much to say that the Four Horsemen and Mattel had a rather ambitious plan for their approach to Classics. We were going to take a tour of the entire Universe right get-go and be able to tick off a character like The Demon so quickly made that statement in a bold way. He also helped stage a grand tradition of getting tons of Jack Kirby characters from a series of universes he is not (mostly) known for. Look, it's likely that during the time before The Classics, Etrigan had Mattel on the list of characters they could produce due to his connection to Batman. So he, like some other first-ass assortment, was probably ready to roll because he would have seen the light of day the DC Superheroes line had the rights the entire DCU was not granted. It's a bit of speculation on my part, but man, I'd love to sit down with 4H and Toy Guru for about two weeks and hash out the whole history of this seminal line. Another thing that made this figure a little odd is its general uniqueness, and I'm not talking about character. Look, Etrigan is a very stout character with a wide discipline and wide torso; the drawing reflects that completely and it contains many unique parts to create the appearance. There lies the rub, though, and I find it very strange that anything about this figure, not even the torso, ever used a dcuc, a line built into the concept of reuse. I'm not saying that his parts could be used as a ton of characters, but no one ever got that upper body again, even if the chance to do so was ripe for picking. Again, this is a question I would love to ask about the powers that will be at some point in the future. After words, please welcome the king, dear! King Kirby, this is. While most of this first-choice DCUC pulled straight from the old Super Powers line (at least as a character of choice), Etrigan went and broke the mold and had a statement that classics had to be so much more. Even if one of the first figures in the line, Etrigan still stands for having one of the best similarities between the sheet of plastic and all the unique tool was important to achieve this, and he paid off with the pot. I think this figure was a bit forgotten by all the hype at the beginning of the DCUC, but going back and doing an Archive entry like this really puts things in perspective and I although I've always really liked the figure, I have a new found respect for how good it really is. We're now more than halfway through our look at this first choice DCUC, I bet you can guess who's up next week...
