Beyonce's receiving co-writing credits for changing a single lyrics to a song: Well, it's not songwriting, but some of these artists believe that your song won't go out. The original part of the song was written by Abel Tesfay, Knowles, Danny Scofield, Ben Deal, Terius Nash, Ahmad Balchet and Jordan Usher. Also rated as songwriters, Bad Bachlach and David Portner, Noah Lennox, and Brian Weitz from the neo-psychedelic band Animal Collective (for interpolation of the 2009 song My Girls). The music video for this song is part of an hour-long movie with the same title as the parent album originally aired on HBO. Background and recording music producer Ben Vilions Deal told Billboard about his work with a great artist and Beyonce said she already knows the song 6 inches since 2013. According to Deal, he, rapper Berry and producer Danny Boys StylesHe worked on music in October of the same year. Originally a berry song with participation from Montana in France, Deal said. I got a response that Beyonce likes and decided we should continue working together. It turned out that I didn't know when the day would come. When the singer released a surprise visual album in December 2013, Deal immediately checked the list of songs, but there was no 6 inch. Everything went well Deal closes. Three years later, in 2016, she finally appeared on Beyonce's sixth album, Lemonade, and made a quest appearance on The Weekend. The commercial performance 6 Inches after lemonade's release debuted at No. 18 on the Billboard Hot 100 chart, became Beyonce's 26th top 20 on the charts, fongs that have entered the top five digital charts, including Greece and Sweden. The live performance 6 Inch was included in the set list of formation world tours in which singers play songs while interrupting upside down at the last show at MetLife Stadium in New Jersey on October 7, 2016.
