Description There is a JL Wrangler with the steel ball group and you want to catch your stock ball and add a windshield? We can help! Our winch plate is designed to work with your steel Jeep JL bumper and is designed to fit most standard size winches including: *Warn Zeon Series1Warn VR Series (VR8, VR10, VR122, VR8,0003, VR10,0003, VR12,0002,3)Warn XD2 & XDiWarn XP2Warn M8Ramsey REP2,3Ramsey Patroit2 (Up to 9,500lb)Smitybuilt XRC (9,500, 12,000lb)Superwinch Tigershark3Superwinch LPQuadrac Q series (All2, Q11,0002,3)Rugged Ridge3 (excluding 8500 or any with side mounted freespool level)Badland (9,500, 12,000 lb)Features:CNC cut and formed from 3/16 SteelBolt-On ApplicationIncludes Fairlead Mounting BracketIncludes mounting hardwareIncludes JcrOffroad StickerHand built in the USA!*We are working with very tight tolerances and there are many winches on the market, so be sure and verify that your winch will fit. Now we know that the Superwinch Exposition, Superwinch Heel, Warn cti, and Winch powerplant Powerplant do not have enough clearance.1 The Zeon Warning Series is a tight fit, and depending on your specific jeep is very moderate in the frame horns can be required. 2 Due to clearance problems, winches and a 7.10 or longer engine (measuring end motor for winning plate mounted bottle center) will be compensated in the driver's side above 7.10.3 Any windshield with a solenoid box mounted directly above the engine will need to relocate, often other riding options or brackets are available, please contact manufacturer. Product Q&A 6 Questions Asked About JL Wrangler Steel Bumper Winch Plate | 2018 + Jeep and Gladiator • Ask a Question Q Kris • 05/01/2020, 7:32:55 PM Will the Smitybilt XRC GEN3 9500 be fine on your wiper plate? A 05/04/2020, 10:14:05 AM Yes, no problem. Q Cleonik • 06/01/2020, 6:08: 25 PM Does The Badland Apex 12k Synthetic winthetic first of all fit with this plate, and its second is required to share a portion of the frame train, which was shown in the video? A 06/02/2020, 11:25:09 AM We don't have to test this fit the windshield of the shop, but based on the wide dimensions it looks like it should fit fine and won't be asked for streaming. Q Howard Lorenz • 06/03/2020, 9:33:00 pm This will work with XD9000i Warning? A 06/04/2020, 4:45:08 PM Should Fit Fine. Q John • 07/29/2020, 4:01:06 PM Will this work for a Smitybilt X20 laptop, 12,000 lb. winch? An 08/05/2020, 1:07:37 PM We are not tested specifically, but the dimensions look like it will be. Kyle • 08/26/2020, 7:20:54 PM Will this work plate with the Country Rough Pro series? (9500 or 12000) A 09/09/2020, 2:07:14 PM We do not test this wizard in this mountain. Review ★★★★★ ★★★★★ 5.00/5 Stars from 5 Review Writes a Product Review: JL Wrangler Steel Bumper Winch Plate | 2018 + Jeep Wrangler and Gladiator Dany (BC Canada) | December 17th, 2019 I bought and installed JC Offroad Steel Bumper Windshield Plates for my 2020 Jeep JT Gladiator and it was easily well done and looks solid! Give it a 5 star Jack collins (TX) | October 10th, 2019 Yes the installation is easy and quick. Something you should know is the warranty will not cover any damage due to failures of the products! I got stuck in sand and wanted to use my brand new windshield (smitty 10k) and in doing this the hulk bracket bold pushed the windshield into the suffering and twisted it to the point of being non-repair. I hear the noise from the rear and stop to see what happened and it was late. For the money you spend on recovery gear, pls be the idea of what you buy and to whom. Anonymous | December 31st, 2016 my first JCR product, but won't last me. Hire sales knowledge and fast shipping. Came in well packs. The quality of crafts was great. The installation was incredibly easy, everything lined up with no problems. Anonymous | May 4th, 2018 Deep! Be careful that the color bolts of our Wrangler magazine Rider from a few weeks. Ramsey (Elk Grove, CA) | June 13th, 2019 Buy this a few weeks ago and when it comes to, the smallest plate is totally lowered. This made the small plate uninstalleable without going out and buying other shekels that are in The mountain plate was okay, but I'm not how they didn't see the bending of the weakened plate. It was great, and doubled my install time. This kind of thing makes me think that this company doesn't care about the quality of products you send out. Actually been looking to buy the grey grill from this company as well, but I'm now afraid it may come in with some kind of damage as well. Note from JcrOffroad: Very less heard about the bracket brackets! We do all of our parts perfect before shipment, but sometimes things are missed. There is also a chance that the product has been lowered in shipping. We will contact you to resolve these issues ASAP. Sorry again for the complex! PLEASE NOTE: Wiper information wiper below. Please review before you buy this wiper plate. The new JL Wrangler looks as if it will catch a windshield, but unfortunately, it's not factory shape. Rusty's has addressed that topic and a bolt on mountain windshield that uses rom to factory if desired. The JL Winch Mount Rusty will accept winches and steel cords fitted or synthetic ropes and can use a roller or a bankrupt hawse. Laser cut from 1/4 steel and CNC formed for a perfect fit. The Rusty JL's Coating is an easy bolt-on installation and comes with all the required hardware and doom plate riding. Rusty's conducted extensive research when designing this patch of windshield so that it will work with famous winches, even going so far demanding designs from established manufacturers to make sure they would work on our mountains without hassle, and we also test-equipped several winches in-house before releasing our final design. However, with all the winchel on the market these days it's impossible to test - fit every single windshield to make sure it will work. Clearances are tight, and there are a lot of options out there. The mount includes a standard windshield bolt model and will work with manufacturer's best reputable wiper manufacturer. Key Features: Made from 1/4-inch thick laser-cut steel bolt on installation Keeps factory bumper in stock location, doesn't bad outward made in the USA See back note know that ALL winches will be fit but see do that the following WILL fit: Warn VR series Warn Zeon series Warn M8 series Warn 9.0Rc Warn XDi WarnD Superwinch Tiger Shark Superwinch LP series Ramsey REP series Ramsey Patriot series Smitybilt XRC Quadrac Q9000 Quadrac Q9500 With this said see highly recommend you compare thesements: Winch Dimensions: 21.8L. x6.3D. x7.6H. (555mm L. x 160mm D. x 193mm H.) We also recommend 89305 88980 88980
