English (United Kingdom) English (United States) Spanish (Latinoamerica) Documentation Therapeutic Strategies can only be effectively discussed if the diagnoses are objectively documented. The fact that it is now the subject of a routine because of THE KARL STOR. Scientific progress would be unthinkable without a rapid and comprehensive flow of information on diagnostic results. KARL STOR has developed technologies to make diagnostic results available to all parties involved in the treatment process. KARL STORS first received documentation on veterinary medical diagnoses using flash devices for 35 mm cameras, and in later years using powerful video systems for use in the sterile zone and gained valuable experience with these systems. Digital technologies have already replaced many conventional documentation tools. With the development of integrated operating, digital archiving and global communication from operating theatre, KARL STOR is now a pioneer of applications that tomorrow will be commonplace. THE KARL STOR product range includes the latest fully digital 3-Chip cameras along with ALL-in-ONE mobile solutions for medical practice, as well as essential peripherals such as monitors, video recorders and video printers. For all the important light source to the mobile light source of the battery. Specialist advice specialist advice VETERINARY VIDEO CAMERA III offers a small, lightweight, ergonomic head for easy handling. The head is fully immersed in clean and disinfectant fluids. Two functional buttons on the head allow the user to easily control the balance of white and accessorie devices such as a printer or VCR. There are four c-mount targets: f - 12 mm, f - 25 mm, f - 30 mm, f - 38 mm. Camera functions include automatic exposure control and balance of white with memory, minimizing the need for manual adjustment. This versatile camera can be used for all indications in veterinary endoscopy. The advice of specialists KARL STOR'TELE PACK VET X is the ultimate mobile endoscopic video system designed for all applications of veterinary endoscopy. This high-performance, all-in-one unit integrates all the components needed for endoscopic imaging: camera, light source, monitor, pump and image capture. TELE PACK VET X is compatible with all types of endoscopes, including video endoscopes, hard telescopes and exoscopes and exoscopes. The compact, lightweight TELE PACK VET X is the final solution for small spaces as well simple transport and quick setting for use in multiple exam rooms. Halls. Consultation experts consultation with XENON NOVA®, KARL STOR' presents a light source powerful enough for use in all applications of veterinary medicine. It is highly recommended for laparoscopy, cystoscopy, arthroscopy or fiber optic endoscopy. The high color temperature of 6000 K corresponds to natural sunlight, providing precise color and brilliant lighting of fabrics. Advice specialists consult Cold Light Fountain XENON 100 SCB is a quiet, easy-to-use, powerful light system designed for use with KARL STOR' video endoscopes. At a color temperature of 6000K, the XENON 100 SCB has the same color temperature as sunlight - providing optimal light that can be adjusted electronically. The adjustable integrated pump provides ammo and/or irrigation of water without the need for additional equipment. A simple adapter is available to connect directly to standard light guide cables for use using KARL STOR fiber telescopes and rigid telescopes. Karl STOR AIDA specialist advice® compact NEO is a FULL HD data archiving system compatible with all KARL STOR camera systems. However, images, video sequences and conversational comments are securely stored on DVD, USB Stick, external/internal hard drives, or on a central storage system through DICOM/HL7 standard interfaces. Patient data can be easily entered with an on-screen keyboard or a conventional keyboard. Recorded images and videos can be viewed, edited and deleted on the screen before finally storing. The picture-in-picture feature displays captured images as soon as you record. C-CAM ® is our simplest and most affordable video-shooting solution, making endoscopic research fast, easy and financially feasible for any practice. This compact, lightweight design is perfect for small spaces, while the fork and playback feature makes it easy to use in multiple exam rooms - and it's ready to use in just a few seconds! C-CAM® is ideal for video-scopic examinations in both awake patients during wellness examinations or for more thorough examinations with grayed patients. The standard capture mechanism is suitable for all rigid telescopes and fiber optic telescopes KARL STOR, which makes it suitable for various other applications in dogs, cats and small exotic animals. Images are displayed on an independent monitor connected via C-HUB® or by directly connecting to a C-MAC monitor® monitor. Consultation CONSULTATION VITOM® 25 exoscope offers a revolutionary new way of displaying open surgical procedures in an ergonomic and high-quality manner. Unlike the traditional endoscope, VITOM® 25 is an exoscope that is located at a distance of 25 to 75 cm from the surgical site, securely held in place holding device, giving the surgeon enough workspace. The magnified image, produced ® 25, is viewed on a video monitor. This allows the surgeon and support staff to work comfortably together, significantly reducing surgeon fatigue, while increased viewing of operations that can also be transferred to remote locations, without disrupting the procedure. The ability to collect and archive images and videos of surgical procedures ensures that a detailed and accurate diagnosis and treatment report is performed, while creating a valuable tool for learning, education, re-examination at a later time, and sharing with clients and colleagues. VITOM® works with any existing VIDEO system KARL STOR. You can check out the search results below by selecting interest categories on the left (special areas and media types).
