I downloaded SSAG native software, but with this installed neither Nebulosity nor SharpCap recognize SSAG. any help appreciated. Published March 13, 2019 - 04:16 PM On the right side under the software downloads is the driver: I use SSAG on my Windows 10 machine and have no problem getting SharpCap to recognize. Good luck! Published March 13, 2019 - 04:34 PM On the right side under the software downloads is the driver: I use SSAG on my Windows 10 machine and have no problem getting SharpCap to recognize. Good luck! I got Sharpcap to admit it, but I don't have a Ph.D. while I'm walking. Do you connect yours to Phd2? Attached By Thumbnails Published 13 March 2019 - 04:36 PM EDIT - Edited by Jim Waters, 13 March 2019 - 04:39PM Published March 13, 2019 - 05:24 PM When I used to use SSAG with ST4 cable going from camera to auto guide port on the mountain, I always chose on camera for the mounting choice in PHD2. After I switched to qHY5L-IIIM (no ST4 cable, and using eqdirect cable) the setup was different. But the on-camera part for SSAG messed up with me until I figured that out. Do you use a cable that goes between the camera and the port of the auto guide on the mountain? Edit: It seems my advice doesn't even matter yet if PHD2 can't even recognize the camera. Carry on. Edited by mistateo, 13 March 2019 - 05:26PM Published March 13, 2019 - 05:25 PM I got Sharpcap to recognize it, but Phd, don't go yet. Do you connect yours to Phd2? Yes SGP and Sharp Cap. They all see the camera. It's strange that PHD doesn't see it. Have you tried to remove any profiles you have in there and starting from scratch? Published March 13, 2019 - 05:53 PM Yes definitely, I use PHD, SGP and Sharp Cap. They all see the camera. It's strange that PHD doesn't see it. Have you tried to remove any profiles you have in there and starting from scratch? I used a new profile master. So what does that mean, it won't work on my computer w Phd2? THAT will render the auto guide useless. EDIT: Possibly a false warning. I was still associated with SharpCap. Maybe the camera can't be connected to two apps at the same time. I turned off SharpCap and it seems that SSAG is connecting to Phd2. EDIT, EDIT He creates his own dark library. To tweak the brain/camera, can anyone recommend a good setting for SSAG? 1 So excited to get this new auto guide - uhhg, sensor, everything seems much better than 15 y/o DSI. Plus I get my new ASI 294 chilled camera delivered tomorrow - just in time for this weekend's full moon Edited by Ballyhoo, 13 March 2019 - 06:01PM. and get sales updates, new products, and astronomy.
