Project management software is now an umbrella term covering a range of solutions, from easier work management tools to robust portfolio management solutions. It's important to understand the differences between these types of software so that you can choose the tool that best suits your needs. The Project Management Guide for Buyers missed the deadline. Bottlenecks. Conversation of silos. These questions cost you time and money. Fortunately, you don't have to break the bank to find a solution. If you have a small team, are on a tight budget, and are willing to compromise on some premium features, then a free or freemium project management product may be right for you. (Freemium products are free versions of paid software that offer limited functionality, user locations, or both.) In this article, we highlight the top 10 best-rated free project management options on Capterra and explain each product offer and upgrade cost. Use this list to determine 1), whether free software is the right solution for your organization, and 2) which free system is best for your needs. Looking for open source project management software? What does top-rated mean? Each of the 10 tools included in this article has a higher average overall user rating compared to other category products. You can find our full methodology here. 10 free project management software options that we'll cover: (Products presented in alphabetical order) Project Management vs. Work Management, which you need? Project Management Software (PM) has become an umbrella term covering a range of solutions, from easier collaboration tools to robust portfolio management solutions. It's important to understand the differences between these types of software so that you can choose the tool that best meets your needs: work management software helps teams manage workflows, organize tasks and actions (projects and processes) and collaborate in a shared workplace. These tools capture the performance by providing live notifications and presentations relevant to different stakeholders. Their target user is not technical business professionals. True PM software helps project managers and organizations execute projects: unique initiatives with a set of areas (results), timelines and budgets (resources). These tools help companies plan, control and control graphics and resources so they can provide value and meet the criteria for project success. Their target user is technical specialists, i.e. project managers. The 10 most rated free project management software solutions for Airtable are a cloud-based collaborative work management solution. Teams can view tasks on a grid (similar to a spreadsheet), calendar, Kanban board, or gallery. Key functions include task management, collaboration, reporting/project tracking, and time tracking. See the detailed feature feature The central component of Airtable is the databases that contain all the data you need for the project. The base consists of a collection of tables, and each table covers a specific aspect of the project. Tables contain fields (file attachments, checkboxes, etc.) and records (appropriate data points you're tracking). The free Airtable plan includes unlimited databases, 1,200 entries on base, 2GB of space attachments to the base, as well as two weeks of review and history of images, as well as real-time collaboration and commentary. Paid plans include additional on-base entries, more attachment space, and a longer review history, as well as priority support and access to blocks, modular applications that expand the functionality of databases. Network View in Airtable (Source) Pros: Airtable offers advance templates for multiple usage, including content production, creative, HR and hiring, marketing and more. Cons: Despite the similar look of the spreadsheet, several reviewers point out that it lacks some of the features that Excel and other database tools can do. At the same time, novice users note that there is a steep learning curve in figuring out how the tool works because it is so flexible and does not prescribe. Upgrade cost: When billing monthly -\$12 per user per month (plus), \$24 per user per month (Pro). Contact the supplier for corporate prices. Discounts available for annual subscriptions. Mobile apps: iOS, Android highly rated: Last year, 81% of Airtable user reviews on Capterra came from individuals in small businesses in various industries. The top five in were marketing and advertising, computer software, higher education, design and non-profit activities. Read feedback from Airtable Avaza is PM's cloud solution. Key functions include task management, project planning, project tracking, resource management, time tracking, and citation and billing, and all of this functionality is available in its free plan. See detailed descriptions of the features. Although Avaza does not limit functionality at different levels of the product, it differentiates and restricts access by user role. Role types include admin/account user, schedule/expense user, resource planning user, customer, and employee. Avaza's free plan includes access to a single schedule/account user, one user administrator/invoice and one user planning, as well as five active projects (unlimited archival projects), 10 customers, five invoices per month, 100MB storage, and regular electronic support and chat plus the knowledge base on the Internet. Paid plans include access for additional users/roles, additional active projects, unlimited customers, higher invoices per month, more memory and priority support. Kanban View in Avaza (Source) Pros: Reviewers praise avaza in customer support (email and live chat) and its extensive online resources (knowledge base and textbooks). Cons: Some reviewers note that while Avaza is reliable, it is perhaps weak when it comes to social collaboration functions. Cost of upgrade: When billing monthly -\$9.95 per month, (Startup), \$19.95 per month (basic), \$39.95 per month (Business). Mobile apps: iOS, Android highly rated: Last year, 89% of Avaza user reviews on Capterra came from individuals in small businesses. The greatest number of reviews were from users in the IT services industry, followed by marketing and advertising, computer software and design. Reading user feedback about Avaza's backlog is a cloud-based work management solution for developers. Features include Gantt charts, task/release management, reporting/project tracking, collaboration and version management (integrated with GIT and SVN. Set up private repositories, offer changes, compare changes, commentary on pull and comment tracking). See detailed descriptions of the features. The free backlog plan includes access to up to 10 users, total storage of 100MB, online email and chat support, as well as an online help center and knowledge base, as well as a single project workspace, as well as tracking and reviewing and collaborating on releases (Git, Disruptive Activities and Wiki). Paid plans include additional users, projects and storage, as well as Gantt diagrams, burnout diagrams, templates, and sub-backs. User Dashboard in Backlog (Source) Pros: Reviewers praise the ease of using Backlog, saying that its simple user interface makes it fast for novice users and experienced users alike to learn the tool. Cons: The free plan is quite limited, both in function and in storage. Teams must jump two levels to buy a standard plan (\$100 per month) to create subs and access Gantt charts and burnout charts. In addition, the free plan includes one active project without archiving, so teams must remove their project to start a new one. Upgrade: Monthly billing is \$20 per month (starter), \$100 per month (standard) and \$175 per month (Premium). Discounts are available with an annual subscription. Teams can also purchase a self-hosted version that costs \$1200 a year (Enterprise). Mobile apps: iOS, Android Highly rated: Last year, 70% of the user reviews of Backlog on Capterra came from individuals in small businesses, while 19% came from medium business. The largest number of feedback came from users in IT services and computer software. Read user feedback on backlog ClickUp ClickUp, a cloud-based work management solution positioning itself as productivity software. It helps individuals and teams set goals, manage tasks, and organize work in project spaces. Key functions include task management, collaboration, reporting/project tracking, time tracking, Gantt charts. See detailed descriptions of the features. The central components of ClickUp include tasks, custom fields, goals (certain targets that down into measurable targets and portfolios (a high-level view similar to a dashboard). The free ClickUp plan includes an unlimited number of users, unlimited tasks and project workspaces, 100MB file storage, 24/7 support (chat, phone, email, and online help center), and 100 uses custom fields, 100 uses targets, 100 portfolio use, and limited reporting. Paid plans include unlimited storage, integration, full reporting options, and additional features such as Gantt charts. View boards in ClickUp (Source) Pros: While most vendors offer a discount when buying software on an annual subscription, ClickUp is the biggest discount of any product on our list (users save 45% on payment annually, compared to other tools where savings are closer to 15% to 20%). Upgrade cost: With monthly billing - \$9 per user per month (Unlimited), \$19 per user per month (Business) and \$29 per user per month (Enterprise). Discounts are available with an annual subscription. Computer software, IT services, design and education management. ClickUp Flowlu Flowlu user reviews are a cloud-based business management solution that offers more than 10 tools for business needs, including PM, Finance Management, and CRM. PM's key capabilities include task management, project planning, reporting/project tracking, time tracking, and Gantt charts. See detailed descriptions of the features. The free Flowlu plan includes access for two users (one administrator), one project workspace, 1GB of file storage, and support through an online support center and knowledge base, as well as limited PM functionality (task management only). Paid plans include additional users, more storage, and more advanced functionality (e.g., repetitive tasks, templates, project planning, time tracking, reporting). Project Dashboard in Flowlu (Source) Pros: Reviewers praise the ease of using Flowlu and its range of business management functions (CRM, knowledge base, etc.) in addition to PM capabilities. Cons: PM's free functionality is quite limited - teams will find it difficult to do more than manage tasks before upgrading. Cost of upgrade: When billed monthly -\$39/month, up to eight users (Team), \$74 per month, up to 16 users (Business), \$149 per month, up to 25 users (Professional), and \$299 per month, unlimited users (Enterprise). Discounts are available with an annual subscription. Mobile apps: iOS, Android Highly rated: Last year, 65% of Flowlu's reviews on Capterra came from 22 per cent of medium-sized enterprises and 13 per cent of large enterprises. The largest majority of feedback came from users in the computer software industry, followed by financial services, higher education and a non-profit organization. Read feedback from Flowlu Freedcamp Freedcamp users is a collaborative work management solution that can be deployed in the cloud or installed on a Mac or Windows OS. Key features include task management, collaboration, reporting/project tracking, time tracking and Gantt charts. See detailed descriptions of the features. The free Freedcamp plan includes access to unlimited users, tasks, project workspaces and storage (10MB per file), as well as standard support. Paid plans include larger download file sizes, premium support, periodic backups, and additional features such as Gantt diagrams, project templates, reports, and billing. User dashboard in Freedcamp (Source) Pros: Freedcamp offers unlimited storage with its free plan, suggesting that only one other vendor on this list matches. Cons: For teams in need of more PM functionality than basic task management, they will need to switch to a business plan (\$8.99 per user per month). Cost of upgrade: With monthly billing - \$2.49 per user per month (minimalist), \$4.99 per user per month (Freelancer), \$8.99 per user per month (business), \$16.99 per user per month (Enterprise). Discounts are available with an annual subscription. Mobile apps: iOS, Android Highly rated: Last year, 87% of Freedcamp reviews on Capterra came from individuals at small businesses in various industries. Accounting/financial services, marketing and advertising, IT services, computer software and design were in the top five. Read user feedback about Freedcamp MeisterTask MeisterTask is a visual work management solution that helps teams manage workflows and organize tasks on a common Kanban board. It can be deployed in the cloud or installed on a Mac or Windows OS. Key functions include task management, collaboration, reporting/project tracking, and time tracking. See detailed descriptions of the features. The free MeisterTask plan includes unlimited users, tasks, Kanban boards, storage and file attachments of up to 20MB. Paid plans include priority support and additional features such as repetitive tasks, reporting, and user fields. Time dashboard in MeisterTask (Source) Pros: There are no limits on the number of tasks, Kanban boards, or internal employees on the free version of MeisterTask. Reviewers Praised the simplicity of the product and say that it is easy for new users to get up to speed. Cons: While most task management functionality is free, workflow automation (repetitive tasks) and complete search through archival tasks and projects are not. This functionality, along with priority support and guest access, is limited to paid plans. Upgrade cost: When paid annually - \$8.25 per user on (Pro), \$20.75 per user per month (Business). Mobile apps: iOS, Android Highly rated: Last year, 76% of MeisterTask reviews on Capterra came from individuals in small businesses and 15% from large businesses. The largest number of feedback came from users in the computer software industry, followed by marketing and advertising, IT services, design and education management. Read user reviews about MeisterTask Paymo Paymo is a reliable PM solution available for deployment in the cloud or installed on Mac, Windows or Linux OS. Key features include Gantt, Kanban boards, task management, collaboration, reporting/project tracking, project planning, resource management, and time tracking. See detailed descriptions of the features. Paymo's free plan includes single-user access, unlimited tasks and Kanban boards, community support plus online knowledge base, and 1GB of memory, and time tracking. Paid plans include additional storage, free training and priority support, as well as project planning, project tracking, and resource management capabilities. Project dashboard at Paymo (Source) Pros: Reviewers praise Paymo's customer service and support team, applauding how quickly they respond, as well as the quality of their responses. Users also have access to Paymo's online help center and knowledge base. Cons: If you need PM functionality outside of task management, you need to switch to a paid plan. If you need Gantt charts and resource management in particular, you will need to purchase a business plan for \$18.95 per user per month, which will be the most expensive update of the tools on this list. Upgrade cost: When billed monthly -\$11.95 per user per month (Small office), \$18.95 per user per month (Business). Discounts are available with an annual subscription. Mobile apps: iOS, Android. High score: Last year, 80% of paymo reviews on Capterra came from individuals at small businesses and 14% from large ones. Reviewers from various industries, with the top five IT services, marketing and advertising, management consulting, design and architecture and planning. Read users' feedback about Paymo Streamtime Streamtime is a cloud-based PM solution designed for freelancers, creative teams, and agencies that do contract work for customers. Key functions are task management, reporting/project tracking, project planning (so-called work planning), and citation and billing. See detailed descriptions of the features. Note: Time tracking is listed as a feature on the vendor's website, but the product does not track time using a timer or schedule. Instead, tasks are set with time and can be manually updated to reflect the actual working time (you pull on the edge of the task card to increase or reduce the time spent). Then, when you drag the item out to do on done, the actual time is recorded in respect of the relationship The free Streamtime plan includes five active assignments, 50 archival assignments and multiple support options (online knowledge base, one-on-one chat, and sessions), as well as the functionality above. Paid plans include unlimited active jobs and unlimited archival jobs, as well as additional team planning options, purchase orders and accounting integration. The planning and command capacity in Streamtime (Source) Pros: Streamtime is transparent with regard to its product roadmap, emphasizing what is currently being built (e.g. the ability to quote and invoice jobs in multiple currencies and languages), as well as changes that are being considered for future releases. Capterra reviewers note that the vendor responds quickly and includes user feedback in its roadmap. Cons: Reviewers seem to be divided on Streamtime's approach to time tracking, with some saying adjustable time blocks are actually more intuitive, others say they would prefer a traditional timer. Upgrade: Monthly billing - \$15 per user per month (Standard); \$20 per user per month (Standard); and \$30 per user per month (Premium). Discounts are available with an annual subscription. Mobile apps: iOS is highly rated: Last year, 95% of Streamtime reviews on Capterra came from small businesses. Reviewers were from four major industries: design, marketing and advertising, graphic design, architecture and planning. Reading user feedback on Streamtime Teamwork Projects is a cloud-based work management solution that helps teams organize their tasks, collaborate, and execute them on time. Key features include Gantt charts, Kanban boards, task management, collaboration, reporting/project tracking, time tracking, and resource management. See detailed descriptions of the features. The free Teamwork plan includes access for five users, two active projects, 100MB storage, and several support options (email, chat, phone, online knowledge base, and tutorials), as well as a limited offer of higher functionality. Paid plans include additional projects, more storage, priority support, and more reliable tracking, such as portfolio presentation and risk register. The dashboard layout in teamwork Projects (Source) Pros: Teamwork offers 24/7 email and chat support, phone 24/5 support, and extensive online documentation through its knowledge base. The provider also offers several other tools in its product suite, including Chat, Desk (Software Help Service), and Space (Management Cons: One particular problem is that users can only export Gantt charts to Microsoft Project or GanttProject, making it difficult to share project schedules and progress on this timeline if stakeholders don't have one of these two tools. In addition, reviewers note a significant learning curve in Teamwork Projects, and in fact, its ease of using the rating is lower below Average. Upgrade cost: With monthly billing - \$11.25 per user per month, minimum 5 users (Pro), \$18.75 per user per month, minimum 5 users (Premium), contact the supplier at corporate prices. Discounts are available with an annual subscription. Mobile apps: iOS, Android highly rated: Last year, 75% of Teamwork Projects reviews on Capterra came from individuals in small businesses, 13% from medium size, and 13% from large ones. While reviewers came from a wide range of industries, the top three included marketing and advertising, computer software and IT services. Read user feedback on Teamwork projects in search of open source tools? To be included in this update, products had to have at least 20 reviews last year and have a higher average overall user rating compared to other products in the category (i.e. 4.5/5 stars). Unfortunately, no open source tools have been rated highly enough to make our list this year. If you're looking for open source PM tools, Here are the two most rated products with at least 20 reviews over the 12 months that we analyzed (February 2018-February 2019): Description of features below the description of the functionality of the software that is mentioned in the writing of the product above: Key features and features of PM software management Creating tasks, add descriptions, set start dates and deadlines, set a priority, evaluate the level of effort (e.g. hours, scores, etc.) and tasks assign. Users can add attachments, leave comments, and update task status while working on an item, or move tasks through the workflow on a task board (kanban or Scrum). Additional features include: converting email into tasks, a set of dependencies, creating subtasks, creating repetitive tasks, creating task checklists. Collaboration provides a centralized workspace that allows multiple users to communicate, talk, and coordinate with each other to facilitate group work. Create shared commands and/or tips for project tasks, calendars, wikis, dashboards, etc.; Stay up-to-date with other users through the activity feed. Cycle in team members through @mentions; Share files Chat video conferences and invite guests to participate. Reports/project tracking reports and dashboards provide a quick and visual way for users to understand the state of a project, its costs, or other key information. View progress made over a project plan, tracking, tracking, tracking, viewing completed tasks, comparing with actual time spent comparisons with actual costs and tracking team performance. Project Planning Determine project area, timing and resources/budget. Break projects into a high-impact, determine results and predict cash flow. Create a work breakdown structure, outline a critical path, identify dependencies and limitations, and plan key resources. Time tracking track time spent on various tasks, report on alleged alleged The actual time spent working on tasks, measuring billable compared to unpaid hours, pulling time, entering the time table for billing customers. Resource Management Create a Resource Chart/Record with Contact Information, Payment Rate, Role, and Skill Level. Staff allocation for projects and workload monitoring. Features can include planning resource capacity and prioritizing projects based on demand for key resources. Gantt charts Cascading, a horizontal bar chart with dates that mark the beginning and finish of interdependent parts of the project. Tasks are laid out in order when each item has to be completed. Often used to create a work breakdown structure and chart a critical path when planning a project, and then compare the current state of the project with the original plans during the project. Kanban board the digital equivalent of sticky notes on a white board, Kanban boards provide a visual representation of the workflow or process. The board is divided into columns representing the stages of the workflow (such as lag, development, and testing), or status (e.g. do, process and done). Tasks are presented as maps that can be extended to show the assigned (s), task details, and comments. Kanban metrics include aggregate flow diagrams and lead and cycle time charts. The methodology of this article has been updated 5/10/19. The products reviewed for this article were to: Offer a free, self-sufficient version of the software (not a trial version of the software where you have to purchase the product after a limited amount of time). Check out our definition of the PM market. This definition includes the evolution of PM software, covering a range of solutions, from easier task/work management tools to robust portfolio management solutions: Work management software helps teams plan and manage workflows, organize tasks and actions, and collaborate in the overall workplace. These tools capture the performance by providing live notifications and presentations relevant to different stakeholders. PM software helps managers and organizations execute projects such as initiatives with a specific start-up and end date, a specific area, and certain resources/budget. PM solutions help companies plan, control and control project costs and schedules so they can provide value and meet the criteria for project success (e.g. on time, on budget, within scope, and to achieve business goals). Software that met market definition also needed at least user reviews published between February 15, 2018 and February 15, 2019, and have a higher average overall user rating compared to other category products. Top free tools have been rated at least 4.5/5 stars overall by users. Note: The content in this part, which provides opinions and points of view expressed by users, does not reflect the views of Capterra. A capterra.
