Power Without Power: Woodro Wilson and American Experience (2017) recovered from by lior Sternfield President Woodro Wilson's address in January 1918, later known as fourteen points, later described the principles for the new World Order of War According to this speech, America must help itself to be committed and to the government's consent in the favor of every nation. Wilson also declared that every nation, regardless of its area or population size, should maintain equal rights. Can this message be considered universal? These vague questions are the basis of Erez's moment. Manela reviews events that the profound impact of the amplafi was greater to Wilson than the colonial world. This case studies - Egypt, India, China, and Korea - The great world of the Communists as Wilson's exit, development, and elimination explain. Manila begins with the contrast that was found in america's new approach: a small, but still active colonial power, how can America champion a colonial order? This contrast was stated in the concept of good grace. Americans saw their project in the Philippines as a kawalisong mission that would eventually enable the locals to control their destiny. to So, because of past efforts in Cuba, they have been given good reason to believe in this policy. The American Propaganda Service (Committee for Public Information-CPI) created an impressive, in-house message that became famous worldwide by the end of World War I. A new era of the fair that Wilson promised is highly expected everywhere on the colonial world. Manela's book is more readable. With their modest expansion of expertise, Manela writes effective and enlightening introductions to each section. The ability to examine exactly the same moment in five different countries (including the United States) shows its excellent international history style. Such sources use diplomatic letters, newspapers, journals, memoirs, and stories in four different languages to make this period more comprehensive than anything that has been told so far. The Wilsonian moment is a work of international history that looks at the announcement of Woodro Wilson's post-war self-determination, the so-called fourteen points, affecting many antichonal movements. Using Egypt, India, China and Korea as case studies, The Ermanella investigation examined how great powers obtained the area in a way that was consistent and interpreted Wilson's statement, and applied to their local struggle for freedom. According to Manila, the Vilsonian moment, every present Homegard movement added local and international legitimacy, each helped in international and international cooperation, helped frame the struggle against colonial rule in a new narrative framework. It also shows that colonial powers were more than themselves in institutions and mechanics (pg. xii). The Wilsonian moment is the colonial struggle that each of them faces. This is a story of expectations raised in its core, and the results of dashed expectations. In the case of India, for example, they engaged 1,200,000 men (pg. 81) to serve in the British Army during the war. After the war, much more self-government is expected, was greeted with the Rollat Bill, a series of legislations that increased the British government's ability to hold prisoners without trial (pg. 168). The hope of far-reaching change for the Indian population gave way to bitter ness and indians (Peace Conference in Paris, 1919) If C.A. Beth and Lovasion gouring look at the history of the relevant work, then the broad movement of such ideas leads to the least of human reacted by launching a widely popular movement against the British government (pg. 168). These protests were a reflection of Wilson's statement. agency, a view that leads to the least, and if ferguson puts the human agency at the heart of the war's first. Battle, Manela combined both ways in his presentation of the Wilsonian moment. This is a work that is to judge the vast international impact of Wilson's concept, with a specific case study where local actors take in, translate, and apply Wilson's statement to their specific circumstances. Its story has enough space to breathe big ideas and human agency, and to communicate with each other is a task that seems to be comfortably international, international, and local all within one story. (Consider ingle) The Wilsonian moment is a strong work of comparison history. Manila craftsmanship is a story that skillfully balances the diplomatic history of great powers immediately after world war, and the local history of each of their case-reading countries. Manela is serving both diplomatically and locally as well. The level of detail, and its width of knowledge when I was reading case studies then I felt as I was reading a book, say, Indian or Egyptian history. He is impressive in the balance and attention that he maintains throughout the book, and will act as a good guide to historians looking for such comparable work. In the way of future research, I was killed in this book, and in others I have recently encountered -American power and the unanimous results of the statement. Manela writes that positive, even the ideal picture of America... Not less, and perhaps more influencial in the history of America... Not less, and perhaps more influence on the world (pg. xi). Seeing this trend is a long task, its international effects, and the results will be a useful study.
