Here in Brazil, the most famous version of the franchise was an animated series, the title of which was literally a translation of the original game, Cadillacs and Dinosaurs. The title now arrives with an Android version. The app is an adaptation of the arcade game for smartphones. This is a game of good old-fashioned street fight (or beat them) where the player chooses one of several characters with different characteristics to come out filling hordes and more hordes of enemies from punches, kicks and special moves. The game is mostly sidescroller, but with an initial three-dimensional feel that allows the character to go up or down a bit to give him some freedom of movement. The progression of the linear from left to right (or vice versa), and enemies come from all sides. Then just press the punch button and try to prevent opponents from harming your character. There are also some items left behind, now falling from defeated enemies, now hidden in boxes and other elements of scenery. These items can be a mismeanor of weapons, firearms or food, which serves to restore a good percentage of the player's bar health. From time to time bosses seem to haunt the user's life and, despite the fact that they are trivial and predictable, like the vast majority of enemies, Have great health bars and require a lot of attention, so they don't beat the player easily. Download Cadillacs and Dinosaurs and remember the hit season of this 90s animated series! Our review of Cadillacs and Dinosaurs is a fairly dated style game that no longer exists, and offers users a kind of nostalgic feeling that is now acquiring an Android version. The gameplay is pretty simple, as it does beat them. The controls are basically walking and pressing a button that always performs the same repetitive movements on enemies. There is a simple variation in the use of a special move or ground pistol, which in any case does not adjust the diverse style of gameplay. The graphics are made with great conceptual art, based on beautiful drawings of the comic/cartoon series that make the mood of the game good. However, the sin of the visual part of the reps. Animation is even good, but not diverse, which makes the game tedious after a certain time, as the gameplay continues to equal phase after stage. The level of difficulty of enemies also should not be satisfied. Their intelligence is poor, and their attacks are predictable and repeated. However, their number increases and opponents with new abilities also appear to beat the player by fatigue and quantity rather than intelligence. Bosses can also be a setback for their long-life bars and even offer a moderate challenge. Overall, Cadillacs and Dinosaurs is a game that serves much more as a reminder of the 1990s series than as the game itself. If your goal is to remember the good moments of childhood, this is a request because it is not a good game in technical aspects. Pros Good Concept Art Simple Gameplay Cons Recurring Games difficulty level is very low, almost offers no problems Uptodown is currently on maintenance. We'll be back soon.
