Most or all Aquatech models should have a light button plus three others, marked mode, start/stop, and circle/reboot. To set the time and date, etc.: Starting with the clock set on time (if not already, use the mode switch until time shows), click the mode button 3 times ... The first takes you into stopwatch mode the second takes you to set the alarm time the third takes you to the settings (and Tuesday TU and seconds the flag will flash) then use the lap/reset button to advance through: each of the items (minutes, hour, date, month, day of the week). When on each one, you can press the start/stop button to advance through the details (minutes, hours, etc.). When on an hour of tuning, it progresses through a 12-hour am (A), a 12-hour PM (P), or a 24-hour (H). If you keep going, it just recycles back to the end. Switching between 12 hours and 24 hours (military) systems is done as part of the setting for time and date. Whenever you have everything set the way you want, just click the mode button and it comes back to normal time. To turn off the hourly beep: By holding the lap/reset button down, press the mode button. When all 7-day flags show, the hourly chime chime on. When the day flags are not shown, the chime is off. For alarm: If you want to use it (I think how it is and light use the battery faster than when not stretching), you set it by pressing the mode button twice as above, then move on to an hour or a minute setting by pressing the lap/reset button, and move on to the time you want by pressing the start/stop button. Clicking mode will take you back to normal time again. To turn the alarm on or off, hold the lap/reset button and at the same time press the Start/Stop button. The alarm icon will appear on or off. When you release the lap/reset button, it will be back to normal time. If the alarm is turned off, it will start ringing for a while or until the lap/reset button is pressed (off) or the start/stop button (repeat). The headquarters in the heart of New York's trendy district was founded in 1967. The company has experienced significant growth due to the further development of new watch programs, successful licensing agreements, and is a leader in the production and marketing of many private label brands. When asked by a Wiki Four button on this watch, light, MODE, RESET, and START TO SELECT THE DISPLAY MODE Push the Mode Button to select one of the following four display modes in the following order: Normal Time - Stop Watch - 'gt; Alarm Reset, - Gt; Reset Mode in normal time, day of the week, hour and second. If Alarm and Hourly Chime icons don't show up, the alarm and hourly call go off. To DISPLAY DAY WEEK, HOUR, MINUTE, SECOND AND LI ALARM AND HOURS CURMA ON: Click mode until the icon flashes. Anxiety and hourly chimes are turned off if the Alarm or Chime icon is not displayed near the Second Display. FOR DISPLAY DAY, MONTH and DAY WEEK AND LI ALARM AND HOURS CURMS ON: In normal time, click Start. Anxiety and hourly chimes are turned off if you don't see an alarm icon or chimes. BEFORE TIME in normal time mode, click the reset button. P or A near the alarm time indicates the time of PM or AM. P or A below the alarming time indicates a 12-hour clock; H points to a 24-hour clock. TO STOP/START THE ALARM AND HOURLY CHIMES In normal time mode, hold the Start button down and press the reset button (the date and day of the week will be displayed) to turn on the set alarm and hourly chimes, or turn off (to save the battery). To check the alarm, hold the reset button down. The alarm and chimes are off when the alarm and chimes icons are not displayed. TO STOP THE HOURLY CHIME in normal time mode, hold the reset button (alarm time Show) and press the mode button until the Day of the Week display is no longer highlighted; otherwise, the hourly chime drains the battery. TO SET THE TIME To fast-forward until the correct number is displayed, hold the Start Start Down. To set month of year, select time reset mode and click the reset button before the month of the year flashes; Click start until the correct month of the year is displayed and click the reset button. To set the Day of the Month, select the time reset mode and press the reset button before the Day of the Month flash; Click start before displaying the correct day of the month and press the reset button. To set the Day of the Week, select the time reset mode and press the reset button before the Day of the Week display flashes; Click start until the day of the week is displayed correctly and click the reset button. To set the hour, select the time reset mode and press the reset button until the hour number flashes; Click Start/Stop before displaying the correct hour and press the reset button. For 24 hours, press the reset button before displaying H. For 12 hours, press the reset button before displaying A or P. To set the second, select the reset mode and press the reset button until the second number flashes. The second number is reset to zero every time you press the Start button. After dialing the second number, set the Minute number by selecting the time reset mode and pressing the reset button until the minute number breaks in; Click start until you see the right minute and press the reset button. To SET ALARM TIME AND TURN ON THE ALARM Choose signal reset mode. The alarm is activated every time the alarm is reset. To select The Hour, click the Start button during the Hour flashing and before the correct hour is displayed, and then press the reset button (there will be alarm and hourly chime icons). To select Minute, click the Start button while the Minute is flashing and click Reboot until the correct minute is displayed. Click the mode button after the right alarm time has been selected. Disturbing and hourly chime icons will be displayed next to the second numbers. The P icon indicates PM. The A-point icon indicates AM. The H icon indicates a 24-hour clock. TO USE THE STOPWATCH Choose stopwatch mode. Click Start/Stop to start lap time. To pause the stop hour, click Start to stop it and press again to continue working. To reset Stop Watch to zero, stop the lap time by clicking the Start/Stop button, and then press the reset button (otherwise Stop Watch will continue counting after selecting other modes).
