order for easy delivery. Seller Inventory No. 9780321837349 For more information about this seller Contact this seller International Edition Blitzler, Robert F. Published Pearson ISBN 10: 0321837347 ISBN 13: 9780321837349 New Paperback Number Available: 1 International Edition Seller: Campustexts (Vicksburg, Michigan, USA) Seller Rating: Description of Pearson's Book. soft lid. Condition: New. International edition. No additional materials. International publications may have different coverages or ISBN, but usually have exactly the same content as a U.S. edition, only at a more affordable price. In some cases, the end of chapter matters may differ slightly from the American edition. International publications are generally printed on a grey scale, and, will have no color throughout the book. New functions. Books ship from several locations depending on availability. All orders are sent with tracking information. We are proud of our customer service. Please contact us if you have any questions regarding this list. Seller Inventory No. 12778 12778 Information about this seller Contact this seller International Edition Blitzler, Robert F. Published by Pearson (2013) ISBN 10: 0321837347 ISBN 13: 9780321837349 New Softcover Number Available: 1 International Edition Seller: Wal-Store (Frisco, Texas, USA) Ranking Seller: Description of Pearson Book, 2013. Soft cover. Condition: New. International edition of Paperback/Paperback Is a textbook printed in English. Brand New. Most international edition has a variety of ISBN and cover design. Some books may show sales waivers such as Not for Sale or limited in the US on the cover of the page, but this is absolutely legal to use. All textbooks arrive within 5-7 business days. Please provide a valid phone number with your easy delivery order. Seller Inventory - C9780321837349 For more information on this seller Contact this seller Bob Blitzler inspired thousands of students with his interesting approach to math, making this a favorite #1 on the market. Blitzler draws on his unique experience in mathematics and behavioral sciences to present a full range of mathematics with bright applications in real-world situations. Students remain involved because Blitzler often uses pop culture and cutting-edge references, to connect mathematics with the lives of students, showing that their world is deeply mathematical.P. Prerequisites P. Premise; Fundamental concepts of algebra P.1 algebraic expressions, mathematical models and real numbers P.2 Exhibitors and scientific notation P.3 Radicals and Rational Exhibitors P.4 Polynomial P.5 Factoring Polynomial P.6 Features and Graphics 1.1 Graphics and Graphing Utilities 1.2 Features Basics and Their Graphics 1.3 More on Features and Their Graphics 1.4 Linear Features and Slope 1.5 More on the Slope 1.6 Conversion Features 1.7 Feature Combinations; Composite Features 1.8 Reverse Features 1.9 Remote and Medium Formulas; Circles 2. Polynomial and Rational Features 2.1 Complex Numbers 2.2 Square Features 2.3 Polynomial Functions and Their Graphics 2.4 Dividing Polynomials; The remainder and theorem factor is 2.5 zeros of polynomial functions 2.6 Rational functions and their graphs are 2.7 Polynomial and Rational Inequality 2.8 Modeling using Variation 3. Extensive and Logarithmic Functions 3.1 Exponential Functions 3.2 Logarithmic Features 3.3 Logarithm Properties 3.4 Exponential and Logarithmic Equations 3.5 Exponential Growth and Decay; Data modeling 4. Trigonometry Features 4.1 Angles and Radian Measure 4.2 Trigonometry Function: Circle Block 4.3 Right Triangle Trigonometry 4.4 Trigonometry Features Of Any Angle 4. 5 Graphics Features of Cena and Kosina 4.6 Graphics other Trigonometry Features 4.7 Reverse Trigonometer Function 4.8 Application Application 5. Analytical Trigonometry 5.1 Checking trigonometry identifications 5.2 Amount and difference difference 5.3 Two-cornered, energy-intensive and half-coal formulas 5.4 Product to sum and Amount-product Formula 5.5 Trigonometry Equations 6. Additional topics in trigonometry 6.1 Law Sines 6.2 Law cosins 6.3 Polar coordinates 6.4 Charts of polar equations 6.5 Complex numbers in polar form; DeMoivre Theorem 6.6 Vectors 6.7 Product dot 7. Systems of Equations and Inequality 7.1 Linear Equation Systems in Two Variable 7.2 Linear Equation Systems in Three Variable 7.3 Partial Fractions 7.4 Systems of Nonlinear Equations in Two Variable 7.5 Inequality Systems 7.6 Linear Programming 8. Matrix and Determinants 8.1 Matrix Solutions for Linear Systems 8.2 Incompatible and Dependent Systems and Their Applications 8.3 Matrix Operations and Their Applications 8.4 Multiple Reverse Matrix and Matrix Equation 8.5 Determined and Kramer Rule 9. Conical sections and analytical geometry 9.1 Ellipses 9.2 Hyperbole 9.3 Parabola 9.4 Rotation of axes 9.5 Parametric equations 9.6 Conical sections in polar coordinates 10. Sequences, induction and probability 10.1 Sequences and summation of notation 10.2 Arithmetic sequences 10.3 Geometric sequences and Series 10.4 Mathematical induction 10.5 Binomial theorem 10.6 Principles of Counting, Permutation and Combination 10.7 Probability 11. Introduction to Calculus 11.1 Search limits using tables and graphs 11.2 Search limits using property limits 11.3 Limits and Continuity 11.4 Introduction to DerivativeAdd Both for CartThis item does not belong on this page.
