There is of course an upgrade to your town hall after maxing out the current always accumulating for a player in the clash of clans. After the introduction of Th12 and Th13, many players have confusion over their improvements and strategies related to their town hall upgrade. Questions like what to upgrade, which troops go, unlocking new items in order, and many others. So, working on the same perspective, this article is a complete clash of clans town hall 12 guide, a guide that will benefit the main start of Town Hall 12, to update priorities, war and farming strategies. In addition, we added several basic layouts that can be used to make it better for City Hall 12 to build. Although it was more than a year and a half after the town hall reopened, there were still guestions about the reopening of Town Hall 12 and the strategies that will be explained in this article. Clash of Clans Town Hall 12: What to follow after the Town Hall update completed clash clans town hall update, the resources should be completely and busy enough for your 5 builders (almost everyone will have 5 by the time you reach Th12). After the end of the town hall update, you should look at your priorities, order them and go with it. As you kick start Town Hall 12, it is better to stay out of wars until you upgrade your troops and semi-max defense. Whether it's offensive, you should be ready for it when discussed. Because this avoids matchmaking weight only in the 12 wars of the upgraded Town Hall. First of all, it gives you the opportunity to better prepare for wars with max soldiers. Stick to farming and modernization to build your base and army. Clash of Clans Town Hall 12 Updated prioritiesConceptitic renewal steps are important. Therefore, what updates you are going to do, I think, which is necessary early to develop your base and then go for the idea of it. To make things simpler, we have the main priority of the update, as shown below:1. LaboratoryThe first and always top priority of any collision. The need for higher-level troops is very important, even if priority for farming. The idea that the army is being pushed out to a specific town hall is implemented by reopening the laboratory. Then again, you have to use other resources to renew the army. But if you're not raiding it won't be a problem. But remember that do not leave your lab for free. Let it work to update the army, the free laboratory delays your upgrade.2. Army CampBetter counts, better advantages. Correctly said that, reopening an army camp clash of clans at City Hall 12 is significant, it gives you 20 extra space, which can increase the chances of a successful raid or attack. Even if you are a short elixir, you can collect them slowly and then resume your army camps.3. StorageYou need to update your repository to save more loot. As City Hall 12 has units that cost more than the max storage. While you are busy with lab and army camp upgrades, both elixirs resources utilize your golden elixirs for storage upgrades. With this, you can have a lot of resources to fill in another upgrade.4. HeroesHelp, when your Grand Warden has a higher level of improvements awaiting, as the Th11 will have the LvI20 Warden, which is to be upgraded to level 40 at City Hall 12. Initially, you have to patiently wait for your elixir upgrades to complete so you can focus on updating your Grand Warden. Then, after potential Elixir Updates, shift your focus to Grand Warden.5. Clan CastleClan Castle can only be upgraded after updating its resource storage. After updating, you get +5 extra soldiers to fit into your Clan Castle. It may sound meh, but here's a bonus. You can have 2 Yetis, 2 Dragons, Extra Loon, extra Valkyrie. stop, stop. Guess this is enough that you realize that refurbishing Clan Castle will help you both Attack and Defense. Related - Clash of Clans: Was Operation Blue Skies SuccessUnits and Items That Are Unlocked at City Hall 12Siege MachinesSiege MachinesVery Powerful Offensive Units That Are Available for Use at City Hall 12. If you are a clan that is active in donating siege machines, then we offer not to build unless the major upgrades are complete. YetiYetilt troop is a really good offensive tank. After unlocking, it is best used for Wars and Trophy Pushing. Another advantage is that the Yeti can be used for any ground attack combos. Offensive updates Shared guestion and confusion. After I'm done with the lab update, what's next? Thus, if the focused on farming, we would insist on updating farming, we would insist on updating farming warriors such as barbarians, archers, giants, etc. if you plan to play play (in our opinion, at the beginning, its better to make sure that you have at least one desired military troop combined before you start playing wars. In addition, these are some of our suggestions that can be used in both farming and wars: Giants, Witch, Bowlers, Electro Drags (mass E-Drags are not preferred from farming perspective) and miners. While you have to focus on Spelling Updates, the army should be your priority. Strengthening your defenses in offense, if not especially, of some sort. On the defensive side, there is no order that you need to follow, but if you want to go for greater weight in your defense, go with X-Bows, Infernos and Wizard Tower upgrades. Infernos, in particular, carry a lot of weight in the base and associated with significant damage to higher levels. If you want your borders. Refurbishing walls may seem like a frustrating process, but its best done than to ignore it. In the later stages, some max out your defense and soldiers at City Hall 12, but not the walls; And looking at Town Hall 13, you would feel lazy max from the remaining walls and go straight to Town Hall 13. Avoiding this will be better. Given other defense measures, they are recommended to upgrade Tesla towers. It's always nice to surprise opponents with a higher Tesla tower level, most of which don't expect a growing Town Hall 12 base. Another soldiers. You can follow then upgrade air defenses, cannons, archer towers and then other defenses. Clash of Clans Town Hall 12 Updates: Giga TeslaTown Hall, Level 12 is the only TH level clash of clans to have Giga Teslas activated under attack (not ignoring giga inferno at TH13). Level 1 Giga Tesla is already built-in with city hall when City Hall level 12 update. It is activated when the town hall is damaged (army or spell), or when 51% of the base is destroyed. LEVELDAMAGE PER SECOND TARGET NUMBER HITDPS PER TARGETDESTRUCTION DAMAGECOST (GOLD)UPDATE TIME (DAYS)1150275N/AN/AN/A2175287.5N/A8,000,00023175387.5N/A8,000,000,000 000442003100N/A10,000,0006520041001,00012,000,0008Source: Clash of Clans FandomUpgrading Giga Tesla is actually good practice, but from 4 to 5, there is a huge weight added to your base. Giga Tesla greatly improves when upgraded, so depending on how you want your base to be, you can decide when to improve your Town Hall 12 defense. Level 5 Giga Tesla has destruction damage that can easily clear soldiers with low hit points. In conclusion, it's good if you're insisting on maxing out your Giga Tesla. Clash of Clans in The Simple Steps: Using A Sufficient Amount of Clans and items. Stay in the lower league. (Depends on your army) Defense targeting soldiers if the cover loot is inside the base. The overall farming strategy was massive goblins. But it wasn't very effective because of how powerful Wizard Towers and Mortars splash damage. So Barch (Barbarians + Archers) was common in low leagues. Still, it's not easy to run crystal+ league. Even dead Town Hall 12 can take down this combo easily. Another cheap strategy may be miners + Queen walk with goblins/barch/minion. Clearing some resource buildings using gueen walk, using miners and heroes clearing out enemy units. In your Clan Castle, carry soldiers like Loons, Hogs, Giants to distract enemy defenses and help loot more. Giants + Wiz + Goblins/Barch is also a solid strategy for farming. Sometimes Giants + Witch gives you a balance between elixir and dark elixir. Using events and reducing the cost of soldiers is also an effective way of holding. You get a cheaper army to raid with. Trophy PushingIf you push for higher league, you can use yeti - Pekka, Mass E-Drags + Loon, Baby Loon, GiWiBo (Giants + Witch + Bowlers) etc. strategies. But after a certain level, it becomes difficult as the bases get harder and planning their attacks is very important, with 30 seconds available. There are combinations that can be very effective pushing. Many prefer Mass Hogs as it is dedicated to defense, so guaranteed you can get the worst star. Another popular meta is the mass Electro Dragon attack, which most feels safe. Well, it's not always the soldiers you carry out, it's based on your troops' level and the strategy vou follow. Better heroes are another requirement, knowing the different attacking strategies and troop combos allow you to climb high. War attackwar attackwar attackwar attackwar attackwar attack on the base, imagine traps and pieces that can get activated, etc. however a very important role is played by the choice of the right base strategy. However, one attack strategy does not apply to all types of bases, there are several changes that are being monitored. This means how you plan your attack, how your soldiers should go through, how to take out vulnerable defenses, and so on. Here are some tips to follow the landing of good war attacks: Always have your war soldiers and spells maxed out at City Hall 12Know for your strategy and keep it well planned. Plan according to your opponent baseDon't keep any heroes under the upgrade/cure warsWhat's for the tips prosDyk troop early, patiently clearly distracted buildings, and then push your troops inside. DragBat attack is one of the best strategies while offering excellent potential for 3 star attack clash clans. This is very only after practice; because it's never easy to carry out an attack for the first time Here's a video about how it's run. Pekka smashA is a popular strategy that is sometimes risky. It is desirable to attack bases where Infernos are set to multiple targets, because if Infernos are set to multiple targets, because if Infernos are set to multiple targets, because if Infernos lock on your pekka, it can be difficult to get a triple on the base. Pekkas is paired with Hogs or Bowlers, after Queen's Walk. Yeti smashSimilar in pekka smash, a Yeti smash. You can have a Yeti + Pekka or Yeti + Bowlers combo. If you are satisfied with the Queen's walks, you can have the Queen walk/caretaker walk to clear the outside pieces so you can push your Yeti and Pekka inside. For soldiers are slow, it is advisable to make sure that your gueen is going through the maximum time. These are just examples; it is not necessary to practice these if you have other better strategies. In addition, you can turn to this video for another strategy clash of clans at City Hall 12 if you want to practice more attacks. Clash of Clans Town Hall 12: Base LayoutsDesigning base layout was very frustrating when clash of clans did not copy the base function. Before its introduction, the players took time and therefore delayed the base was common. But now, it was simple. Clicks on the link and you will get your base copy. It would have been difficult for many, especially at the higher levels of the town hall, to create a basic layout.
