(September 2012) (Learn how and when to delete this template message) (Learn how and when to delete this template message) Horrible Science Front cover of Measly MedicineAuthorNick Arnold; Phil GatesIllustratorTony De SaullesCover artistDe SaullesCountryUnited KingdomSubjectScienceGenreChildren Literature; science writingPublisherScholasticPublication date1996-present Horrible Science is a similar series of books to Horrible Histories, written by Nick Arnold (with the exception of Evolve or Die, which was written by Phil Gates), illustrated by Tony de Saulles and published in the UK and India by Scholastic. They are designed to interest children in science, focusing on trivial, unusual, gory or unpleasant. Books are circulating in 24 countries and more than 4 million books have been sold in the UK alone. Nick Arnold has published an article titled Teaching Science the Horrible Way, which shows why the Horrible Science series makes a positive contribution to science. According to Arnold, Horrible Science books are based on everyday topics and key areas of the curriculum. The range of approaches used in Horrible Science books is aimed at highlighting the drama and excitement and the miracle of science. Scientific words and concepts are introduced gradually often using humor or fact files. Although mathematics is not needed at the level of the sciences covered in the books, some activities require calculators. The books contain experiments under the heading Dare you will discover... Experiments do not require expensive or complicated equipment. Several books end with thoughts on how science will shape our future. On your website Nick Arnold also has downloadable experiments for teachers to use in the classroom as a help for his book books experiment with horrible hydrogen in [3]). History Before writing the series Nick Arnold worked on an educational project at the University of North London. He explained to The Birmingham Post: 'It was actually a happy break or a well-placed letter - whatever you want to believe - because I wrote this really cheeky letter to Scholastic publishers saying that if they were looking for someone to write a horrible science book, Then I'm that. And do you believe that they actually allowed me to write a science book and put a lot of terrible bits in it - and then it was a huge success. In mid-2010, Horrible Science decided to make a makeover of the book by changing the covers of some old books, and all new books are published to have a new, more colorful background and updated information. In 2013, a theatrical performance of Horrible Science was created by the Birmingham Stage Company, which also brought Terrible Stories to the stage. Nick Arnold's approach explained his approach to writing the series in an interview with The Birmingham Post: My approach to the subject is much over-research it. I've become pretty good at learning by writing these books, so I already have a lot of knowledge, but then I really like to learn more information. If over-research isn't just all the facts I need, I have a lot more - and that means I can really choose what I want to include. The thing about the book Horrible Science is that it's actually about imagination. The more you know, the more you want to know and the more you want to develop it. [4] Critical reception The reaction to the series was generally positive. Some reviews on the series website [5] included The Independent's review that Really Rotten Experiments is Ideal for keeping kids busy on a rainy day, it's full of useful tips... and fun, naughty experiments. Another review by the Evening Express (Aberdeen) said that the book Horrible Science: Painful Poison is with fantastic fact files, bizarre quizzes, humorous cartoons and easy-to-understand text, it makes science quite scary but great fun. Books For Keeps said about the book Deadly Diseases: The Gruesome Contents of Gut Churning, You Need a Strong Stomach to Solve This Problem, And Certainly Before Eating. The Scotsman commented on the whole series: Nick Arnold has a reputation as quite a showman, and his Horrible Science series gives him plenty of opportunities to acrobatic. Children appear wide-eyed and inspired. A review on [6] described the series as They are much better than some of the dry textbooks that I had to read when I was at school... I say that such books are great for students because they show students that science is really interesting and amazing! Review by Roberta from The Rising of the Science Blog said Book Chemical Chaos: It is just as humorous (downright silly in spots) and as extensive as a series of stories. He adds that [the series as a whole] go a long way to bridge this gap [between middle and high school students]. As Evil Inventions said in Jennifer Cameron-Smith's review:[7] This is a great book and will be a wonderful gift for any novice young scientist, as well as a valuable addition to the school library. Scientific play can sometimes be a challenge, but books like this certainly help. The controversy was a negative response to Issue 6 – Hidden Horrors in the Home in the magazine adaptation of the book series. An article called Loony Lab in this Horrible Science Collection had a section called Grow Your Own Manky Microbes. The complainant, a biology teacher and parent, described it as irresponsible to the extreme. A plastic Petri dish and agar powder sachet are provided as free gifts, and children are encouraged to sample areas that may contain pathogenic organisms (pathogens), such as a toilet handle, dog ear or bogeyman. In certain circumstances, contact with these substances can be life-threatening. The complainant added: 'The potential for actual harm is staggering. Even at school, under the supervision of trained staff, we could not do much of what the article suggests, namely for health and safety reasons. How can they be sure that every child will follow even modest and woefully inadequate safety advice'? [1] The Horrible Science series received the following awards [1]: the ZSL Thomson Reuters Record Award for Communicating Science awarded to Nick Arnold and Tony De Saulles for Wasted World. Arnold said: For science writer, the Thomson Reuters ZSL Award is the World Cup and I am honored and delighted to have won. Winner of the Junior Aventis Science Book Prize 2004 for Really Rotten Experiments Winner of the Rhône-Poulenc Junior Science Book Prize 1997 for Blood Bones & Body Bits Winner of the Rhône-Poulenc Junior Science Book Prize 1997 for Ugly Bugs Winner of the Royal Society Prizes for Science Books 2004 awarded to Nick Arnold and Tony de Saulles for the really Rotten Experiments Nominee of the Royal Society Awards for Science Books 2003 awarded to Nick Arnold for the Terrible Truth about the Time Nominee of the Royal Society Prizes for Science Books 2001 awarded to Nick Arnold for Suffering Scientists Winner of the Royal Society Prizes for Science Books 1997 awarded to Nick Arnold for Blood Bones and Body Bits and Ugly Bugs Book categories Original books These are the original books in the core series: Angry Animals (2005) (Animal attacks) Blood, Bones and Body Bits (1996) (Human Body) Body Owner's Manual (2002) (Human Body) Bulging Brains (1999) (Brain) Chemicals (1997) Alchemy Deadly Diseases (2000) (Diseases) Disgusting Digestion (1998) (Digestion) Bad inventions (2007) (Inventions) Evolve or Die (1999) (Evolution) Fatal Forces (1997) (Forces and Movement) Terrifying Battle for Flight (2004) (Flight History) Scary Light (1999) (Light) House of Horrors (2012) [9] How to Draw Horrible Machines (2011) Killer Energy (2001) (Energy and Thermodynamics) Wretched Medicine (2006) (Medicine) Microscopic Monsters (2001) (Very Small Bacteria - Bacteria) , Germs and Viruses) Nasty Nature (1997) (Kingdom of animals depicted in nature and those who study it) Painful poison (2004) (Poison) Shocking electricity (2000) (Electricity, both artificial and in nature) Sick! From Measly Medicine to Savage Surgery (2009) Sounds Dreadful (1998) (Sound) Space, Stars and Slimy Aliens (2003) (Space) The Terrible Truth About Time (2002) (Time) Ugly Worms (1996) (Insects and Invertebrates) Vicious Veg (199 8) (Plants) Wasted World (2009) (Global Warming) The Horrible Science of YOU (2009) (Human Body) Omnibus editions and boxed sets There are several two-in-one releases: Ugly Bugs and Nasty Blood Nature , Bones and Body Bits and Chemical Chaos Scary Light and Sounds Terrible Bulging Brains and Disgusting Digestion of Microscopic Monsters and Deadly Diseases Killer Energy and Shocking Energy Fatal Forces and Fight for Flight There were also three in one edition, such as Ugly Bugs, Nasty Nature and Vicious Veg, set of 10 books (Vicious Veg, Space, Stars and Slimy Aliens, Ugly Bugs , Bulging Brains, Deadly Diseases, Chemical Chaos, Disgusting Digestion, Blood, Bones, and Body Bits, Nasty Nature, and Evil Inventions) and a set of 20 entitled Bulging Box of Books. Shuffle Activity Books Puzzle Book Angry Animals Shuffle Puzzle Book (2008) Blood, Bones and Body Bits Shuffle Puzzle Book Jigsaw Book Dangerous Dinosaurs Jigsaw Book (2006) (Dinosaurs) Seriously Squishy Jigsaw Book Ugly Bugs Jigsaw Book (2008) Stickers-Books Activity Disgusting Etching Sticker-Activity Book Ugly Bugs Sticker-Activity Book Others Seriously Squishy Quiz Book Pack Terribly Big Quiz Book You will notice that sticker-book activities have been renamed , along with the new design, dropping the Sticker aspect and leaving the Activity. Annual 2008 Annual 2009 Annual 2010 Annual 2011 Annual 2012 [10] Annual 2013 Annual 2014 Annual Annual 2016 Special There are several books in the Horrible Science series that have a special mark on the front cover that indicate their inclusion in the special Subseries of Horrible Science. These are: Explosive Experiments (2001) (Science Experiments) Suffering Scientists (2000)(Scientist) Textbooks After suit with other major series Horrible, Horrible Science recently introduced a new range of books, known as Textbooks. Beastly Body Bulging Experiments Brain Experiment Experiments Famously Foul Experiments Sharks Teachers resources The Horrible Science Teachers Resources subseries is, as described by Nick Arnold: a whole series of books full of expert tips and photocopiable resources designed for aged pupils 7-11. They are intended for use by teachers in classrooms [2]. Electricity Human Body Forces Animals Sound Light Minibeasts Plants Micro-organisms Earth and Beyond Others These are books that do not fit into other categories. These are: The Awfully Big Quiz Book (2000) (Science) The Horrible Science of Everything (2005) (Science) Really Rotten Experiments (2003) (Science Experiments) The Seriously Squishy Science Book (2007 World Book Day Special) Smelly Science (Science) The Stunning Science of Everything (2005) How to Draw Terrible Science (2011) [11] The Front Cover Of Super Sleuth is also a collection of journals for this series, which is collectively known as the Terrible Science Collection. The series was originally intended to cover 60 releases, but due to their popularity, another 20 were added to the series. The titles are: Beastly Body Bits - (Human Body) Chemical Chaos - (Chemicals) The Smashing Solar System - (Solar System) Disgusting Digestion - (Digestive System) Shocking Electricity - (Electricity) Hidden Horrors In The Home - (Bacteria and Germs) Bulging Brains - (Brains) Savage Spiders & Slippery Slimeballs - (Spiders and Snails) Rotten Reactions - (Chemical Reactions) Bestial Bloody Body Bits - (Human Body) Horrible Earth - (Earth) Mad as Matter - (Matter) Painful Poisons - (Poisons) Bones 'n' Wing - (Bones) Insect Invaders - (Insects) Super Sleuth - (Spies Codes) Nasty Nature - (Nature) Fearsome - Fuels Fossil) Deadly Diseases - (Diseases) Gruesome Gravity - (Gravity) Medium Machines - (Machines) Universe & Worst.... - (Universe) Vicious Veg - (Plants) Body Owner's Manual - (Body Parts) Lethal Lightning - (Lightning) Mean Mammals - (Mammals) Mighty Magnetism - (Magnetism) Awesome Ants & Sleazy Bees - (Ants and Bees) Fatal Forces - (Forces) Crazy Cures & Revolving Reactions - (Cures) Barmy Birds - (Birds) Blast Off! - (Probe) Evil Evolution - (Evolution) Terrible Heat - (Heat) Twisted Fish - (Fish) Surprising Senses - (The 5 Senses: Sight, Smell, Taste, Touch and Hearing) Sounds Terrible - (Sound) Sinister Swamps - (Swamps) Spooky Genes - (Genes) Microscopic Monsters - (Microorganisms Growing Up Grossly - (Rise) Foul Frogs & Slimy Lye - (Frogs and Scoundrels) Scary Time - (Time) Scary Light - (Light) Dangerous Dinosaurs - (Dinosaurs) More Painful Poisons - (Poisons) Terrifying Flight - (Lot) Foul Food - (Food) Staying Alive - (Survival) Fearsome Flying Machines - (Flying Machines) Revolving Reptiles - (Reptiles) Dead Freezing - (Cold) Noisy Nature - (The) Animal Kingdom) Mad Medicine - (Medicine) Mushrooms - (Mushrooms) More More Dinosaurs - (Dinosaurs) Blinding Light - (Light) Gruesome Germs - (Germs) Slimy Sea Monsters - (Sea Creatures) It's About Time - (Time) Dangerous Planes - (Airlanes) Big and Bad Animals - (Dangerous Animals) Shady Spies - (Spies) Musical Mayhem - (Sounds and Music) Prehistoric Pests - (Prehistoric Life) Surprising Brainboxes - (Human Brain) Mind Boggling Materials - (Matter) Ugly Plants - (Plants) Wicked Weather - (Weather) Underwater Uglies - (Aquatic Animals) Mean Body Machine - (Human Body) Rowdy Robots - (Robots) Gruesome Guzzling - (Food and Digestion) Nuclear Nasties - (Nuclear Energy) Mind Magic - (Science of Magic) Hairy People - (Evolution) People) Freaky Future - (Futurology) Horrid Healthcare - (Health and Medicine) Terrible Inventions - (Inventions. Technology) How to be a suffering scientist - (Scientists) In the series there are also three special journals. These are: S1. DIY Shocking Science - (Experiments) S2. Spooky Science - (Hallowe'en and Monsters) S3. Alien Science - (Aliens) Flip charts March 3, 2008, several online flip greyhounds (aka Actvlessons) were released by Promethean Planet. As the site explains, these ready-made interactive whiteboard resources have an immediate appeal of the child, making teaching QCA Science units fun and effective. The titles include: Animals and Their Habitats The Human Body and Keeping Healthy Minibeasts Sounds Plants series In May 2015, British TELEVISION network CITV announced that filming had begun in the new ten-part TV series Horrible Science. The series is produced by Toff Media, a company owned and founded by comedians Ben Miller and Alexander Armstrong, and co-owned by Hat Trick Productions. It stars Ben Miller, comedian Chris Martin, Tom Bell, Jason Forbes, Letty Butler, Susie Wokoma and Eleanor Lawrence. There will also be guest appearances by other actors. The series focuses on the science show and its crew, which consists of the show's host Mark (Martin), the talking brain of Professor McTaggart (Miller) (who hosts the segment The Brain Dump), the robot Bob (Bell), the microscopic Professor Small (Lawrence) and her crew of scientists and the show's producer Lucy (Butler). Armstrong gives voice to the invisible announcer Tannoy, who tells the crew how long the show begins. Each episode also features a famous scientist who is interviewed by Mark or McTaggart. In a similar vein to the television adaptation of Horrible Histories, each episode also ends with a song that serves as a parody of another popular song. Episodes of Series 1 Series 1 Series 1 began on September 13, 2015. Not. General No. for title director writer 11Deadly Diseases[13]Simon GibneyMark Oswin13 September 2015 (2015-09-13) This episode coughs up disgusting details of snot, sneezes and viruses, from cruel after shocking smallpox. Guest star: Ben Miller as Ben Miller Miller Jenner Song of the Week: 22Abominable Blood[14]Simon GibneyMarc Haynes and Will Maclean September 20, 2015 (2015-09-20) Red blood – what is it and why do we need it? How does it transport important things around the body? Bob the robot needs his first aid badge so he can go to the robot jamboree – the only problem is that he hates blood. Mark is stopped just in time by expert Charles Drew, who is going to give someone a blood transfusion from a dog! Guest star: Jason Forbes as Charles R. Drew Song of the Week: 33Chemical Chaos[15]Simon GibneyMarc Haynes and Will Maclean September 27, 2015 (2015-09-27) This episode features explosions, atoms and devilish forces that bubble, go bang and bump! What makes things explode? Lucy made a mistake in the script and now everyone thinks the show is about elephants. It's a disaster – especially since their quest is the legendary scientist Marie Curie! Featuring: Eleanor Lawrence as Marie Curie Song of the Week: Elements 44Space, Stars and Slimy Aliens[16]Simon GibneyDavid Armand14 October 2015 (2015-10-04) This episode explores what happens to our body in space. Can we live on other planets? Who invented the telescope and how can we make it at home? Guest star: Marcus Garvey as Galileo Galilei Song of the Week: I'm Mr. Average 55Wasted World[17]TBATBA11 October 2015 (2015-10-11) Gruesome greenhouse gases and deadly toxic waste. Why do we recycle and what would happen if we stopped? Is global warming really bad? The team tries to figure out what happens to the climate, although the show almost ends in disaster again when they discover that there is a bear wandering in the studio for free! Guest Star: Bear Grylis Song of the Week: Let It Snow 66Gruesome Guts[18]Simon GibneyTBA18 October 2015 (2015-10-18) This episode explores poo, pizza and disgusting germs! Why poo and how does digestion work? Who was Louis Pasteur and what is his legacy? Mark arrives at the studio with terrible abdominal pains and asks shrinking scientists to find out what's wrong with him. In his most difficult mission, Dr. Sensible, Professor Small and Junior are preparing to fly up Mark's nose to investigate the matter. Featuring: Marcus Garvey as Louis Pasteur Song of the Week: Poohemian Rhapsody 77Microscopic Monsters[19]TBATBA25 October 2015 (2015-10-25) This episode explores some of the nasty invaders who live in our homes and on our bodies. Fleas, parasites, worms and every tiny, disgusting thing between them. Mark can't stop itching, but no one knows what's causing it. Shrinking scientists will come out and investigate. They are joined in the studio by microscope expert Robert Hooke. Guest star: Song of the week: 8 Pints 88Bulging BrainsTBATBA11 November 2015 (2015-11-01) Guest star: as Rita Levi Song of Week: 99Sounds DreadfulTBATBA8 listopad 2015 (2015-11-08) Gwiazda gościnna: Alexander Graham Bell Bell Week: 1010Vicious VegTBATBA15 November 2015 (2015-11-15) Guest Star: Song of the Week: Killer Veg References ^ Welcome to Horrible Science. horrible-science.co.uk.
