The third app in the Timmy Learning Time series contains a new reading game, new videos, stickers and party themes to help young children learn English. English is a complex but popular language. It is one of the most popular languages in the world, in fact, and it is common in many countries. Learning English is a bit difficult but rewarding because you can use it almost anywhere. There are an amazing number of apps to help people learn English. They fall into several different categories. You have a complete learning experience like Memrise or Drops, practice apps such as HelloTalk or Tandem, and then phrasebook style apps such as just learning English. We have a combination of all three below. You probably already have at least a little knowledge if you've found your way here and can read the whole paragraph. So here are the best apps for learning English for Android! BusuuDrops: Learn EnglishDuolingoHello EnglishHelloTalkPrice: Free / \$69.99 per yearBusuu is a popular language learning app. It also supports English from a variety of other languages. It uses several traditional methods. You will learn grammar, spelling, words, phrases and spoken English. The app also includes a training emphasis and it is one of the few good standalone Applications learning English. It's a bit expensive for its annual subscription. However, you get a decent amount of content for free to start yourself. The app itself is about the only other potential problem. It has its quirks, but it is functional. Drops: Learn EnglishPrice: Free/\$7.49 per month/\$48.99 per year/\$109.99 once Language Drops actually has two English learning apps. One is for British English and the other is for American English. It's a good choice to have. The app uses an aggressive method of vocabulary. He doesn't learn so much grammar. Instead, he learns colloquial English and you learn grammar yourself as you go. It also includes offline support, games, and various subscription levels and prices. This is a pretty decent application, especially for those who don't have a ton of time to study every day. DuolingoPrice: Free /\$9.99 per monthDuolingo is one of the best free applications to learn English. It supports more than two dozen languages in total and English is one of them. Duolingo uses a fun method for learning. You do a bunch of grammar and vocabulary lessons disguised as games. So it's a little more colorful and fun than more serious apps like Mondly, Memrise, and others. Bite-sized lessons also make it great for quick sessions during the lunch break. This is definitely one of the English learning apps we recommend primarily for people. Learning a new language is one of the most common bucket list tasks for people around the world, and with a plethora of freely available language applications, it should be easy, right? But how effective ... Hello EnglishPrice: Free / / Per month/\$29.99 per yearHello English is a popular application for learning English. This allows you to learn a language from 22 other languages. This should work for most people. The app has 475 lessons, offline support, a 10,000-word dictionary, and a teacher to help you out. It also uses some fun learning techniques like daily news, audio and video clips, and even e-books. People seem to really like this one and it worked well during our testing. Subscriptions are also pretty reasonably priced, although we recommend a year's subscription as it is significantly cheaper. HelloTalkPrice: Free/\$1.99-\$4.99 per month/\$21.99-\$29.99 a year HelloTalk is one of the most interesting applications for learning English. He uses a social network of varieties to teach. You're paired with other people. They teach you your language, and you teach it yours. The exchange helps with spoken English, vocabulary and even grammar. The app supports more than 100 languages and includes voice calls, video calls, text messages, picture messages and audio messages. We recommend using this as a secondary form of training. This with something like Duolingo edd you most of the way there without much hassle. Google TranslatePrice: FreeGoogle Translate is a great app for language scientists and travelers. The app has three main features that make it really useful. First, it's a standard text translation. It works with 103 languages online and 59 languages offline. The app also translates the talk in real time. It's a great tool to practice your vocabulary and diction. Finally, you can point the camera at things. The app translates things to the camera in real time as well, and that works great for menus, street signs, etc. Google Translate is free and anyone who studies a second language should have it. Microsoft Translator (link to Google Play) is also surprisingly good for learning languages as well. Learn English phrasePrice: Free / \$4.99 Recognize English phrases is a simple, affordable application for learning English. This one works best as a phrasebook or reference book. It has a bunch of English words and phrases along with American and British pronunciations. You can also record your own voice and hear how you sound. It is also one of the best standalone applications for learning English, even if it works better as a learning aid. This, along with another app like Duolingo or Busuu makes for a really good combination. MemrisePrice: Free /\$9 per month/ \$59.99 per month Memrise is one of the most powerful and popular applications for language learning. It supports different languages, and this includes Language. Memrise is a community site and it uses many different learning methods. This includes your basic vocabulary and grammar lessons along with games, spoken English, pronunciation guide, and more. It even has autonomous support. It's a little more expensive than most. Most. There is enough content here to keep you busy for a long time. Mondly is another English-enabled app that works very well. Just Learn American EnglishPrice: Free /Up \$7.99Simply Learning American English is a very simple app. However, it is mostly useful as a phrasebook. The premium version contains more than 1,000 words and phrases in 30 categories. The free version gets about 300. The app also includes audio pronunciations, quizzes and flash cards for easier study. This is an excellent secondary study help when paired with a more serious app like Busuu, Duolingo, or Memrise. It also works offline in case you want to know. TandemPrice: Free/\$6.99 per month/\$34.99 per yearTandem is a community language learning app. It's very similar to HelloTalk. You are paired with people who teach them their language and they teach you theirs. The app supports voice and video calls, as well as images, text and audio messages. It supports more than 150 languages. So, it shouldn't be hard to find a couple. Tandem even offers professional tutors. You can also choose a topic you want to explore more on any given day. It works best as a secondary learning source just like HelloTalk.If we missed any great English learning apps, tell us about them in the comments! You can also click here to check out our latest Android app and game lists! Busuu is one of the best applications in English available today and is highly recommended for learning English at the initial level. This app is developed by linguists and combines human interaction and learning with artificial intelligence to help you learn the language faster. The Busuu app has courses in 12 languages in its mobile app, which is used by more than 90 million students worldwide. Busu's lessons include typical reading, writing, speaking, spelling and language generation, which you expect in any language study course. With Busuu, you can talk to native English speakers to practice your English. You can also provide feedback to people learning English or get feedback from more advanced English learners. Busuu's English course is designed to help you improve all the skills you need to speak English fluently. Busuu is one of the few good standalone applications for learning English, allowing you to download lessons to enjoy where and when you want, without an internet connection. You can visually track your progress through the Busuu course by seeing your increasing the completion estimate and watching the color of each unit you complete the change. In addition, Busuu sends you a weekly progress report that tells you what you've achieved in the last seven days. The Busuu team regularly measures the effectiveness of the Busu language methodology. In 2016, they conducted an independent study with a research team from the City University of New York. Carolina to measure the learning results of our product. The study found that 22 hours of Busuu is equivalent to one semester of college language study. Devices: Android, iPhone, iPad, Website Download Busuu English Now Educatorstechnology Saturday, March 03, 2016 Android language apps In response to the requests of some of our readers here at EdTech and mLearning asking for recommendations for Android apps to learn English, we went ahead and curated for you list below.
