Prepared by African Ninja. Windows version can be played here. The car escape walk the thero starts here! Your game starts inside the car in the driver's seat. Look at the device panel. E is blood on and is stuck on the speedometer 40. E40 is code. Open the basket between 2 seats. Take the torch. Go left. Go again to the left. Take the scrio drawer from the back seat. Open the export able basket in the middle. Take the golden key from under the smoking hat. Lift the correct set. Raise the right cover: Take the Stanley knife. Look at the roof. Cut out R-square and wiring guide will fall into your inventory. Go back to the front. Open the Golden Key to the Kobiawali Wisdom. Take the power tape, and the batteries. Use batteries on the touch. Go back to the back seat. Cut the two pieces that keep the mid-setup: move the seat a little further. Click behind it to get the caped. Enter code E40 Press Use Touch to light the listed boot. Use the knife to cut the left light. Take the key. Go back to the front. Insert the key into the force to get power. Read the wiring guide. Only red, blue, gray and green wires need to be connected. I zoom eding wheel. Use the screw drawer to remove the screw from the plate. Contact the red, green, blue, and gray stars and separate with the power tape. Zoom out and click Trunk Lever. With air and wires attached, the trunk will open. Go back to the trunk. Open and you escaped the car off! Hope you enjoyed my walk-in. By editing by participating author September 22, 2017 Online Escape Games use a click-style format in which gamers must use their intelligence to avoid a room by clicking certain items and finally obtaining content to escape from prison. These online games can be challenging and fun-minded, but it can also be a pleasure when you get stuck and don't know what to do next. With proper guidance, you can quickly escape from prison in an air. Click on the tin colored middle console to zoom in and inspect it more closely. Click the crack to open it and click the touch to get it. Move your mouse to the left side of the screen until the pointer is pointed to the double arrow and click to zoom. Hover your mouse on the right side of the screen until your pointer becomes a double arrow point to the right and click on the right. Look at the back seat and click the scrio drawer to get it. Click on the East console of the tin to zoom in, and check its rear. Click the circular light symbol and This resulted in the yellow key to get it on. Zoom out and return to the back seats of the car. Click down the left or right seat to zoom and test the floor. Click on the tin carpet on the right and get the resulting astra knife. Zoom back to the back seats. Click on the horizontal strip of the tin roof at the top of the screen at the top of the back window to see on the roof. Select the knife and click the outline to get a wiring guide. Zoom out and turn twice immediately to face the front dashboard. Click the glove basket to zoom in and inspect it more closely. Select the yellow key and click the lock to unlock the dashboard and get the resulting batteries and electrical tape. Select batteries and click the touch to combine the two items. Zoom out and turn twice immediately to face back seats. Select the knife and click two small strips in the middle part of the screen to cut them. Click the middle coin to move it and click the black-headed area behind zooming on a number pad. Enter E40 in the number pad by clicking the Numbers and Numbers buttons and select the Insert button. Choose the touch with the batteries and click the black screen to illuminate the picture. Click on it to break open with your touch and get the resultkey cover on the left side of the exploded red light screen. Click the horizontal objects bar at the bottom of the screen to remove the touch. Zoom out and turn the dashboard right twice to face. Click on the gas pad to zoom in, select the scrio drawer and click the steering wheel down the panel to zoom again. Follow the wiring guide instructions; Contact each individual wire by clicking red, blue, green and red wires and attach them to each other using the power tape to select and click the tape. Remove the electrical tape and zoom. Click the device panel to zoom. Select the car key and click switch by car to change the vehicle's power. Zoom out to face the dashboard. Zoom on the pad and press the button with the yellow trunk symbol to open the trunk. Zoom out, turn right twice, click the middle coin to move it out, click the black circular area behind it to zoom, and click on the light coming from the open trunk to avoid zoom. Car Escape Game is the first in a series of escape games made by developer African Ninja Productions. When the game starts, you get stuck inside a car whose windows are blocked and whose doors cannot be locked. To escape, you must find hidden objects across the car and know how to use them. A torch is located in the console between two front seats. You'll find a scrio drawer sitting on the back seat on the left. On the back floor Set, under the rock, you'll get a utility knife. On the roof of the car is a wiring guide that must be removed with utility knife. Open the console back in the set area, then remove the cigarette light cap to make a significant find . . use the key to unlock the glove basket. In the glove box, you will get batteries and power tape . . . use batteries with touch. The wiring guide explains that, in case of power loss, you can access the wires in the steering column and communicate with them manually. The bottom of the steering wheel should be removed with a scrio drawer, then click on them to connect to the red, blue, gray and green wires. The connection should be protected from the electronic tape. Pink, white and yellow wires should not be attached. Check the dashboard on the car. The fuel is e-circle on the garage, and the speedometer is frozen at 40 miles per hour. Go back to the back seat and use the utility knife to cut the straps on the small center seat, then remove the set to reveal a caped. Type in E40 and press the Enter Key to access the trunk. With batteries in the reach, you will be able to see the area. Use the touch to break the broken light on your left, get a car key. Put on the keys and the car options. The trunk release work under a steering wheel. Climb through the trunk and escape the car. The author is a Bachelor of Arts from andrea writer's new school of liberal arts.
