From old school runescape Wiki Brutal blue dragons are found in the northwest part of the catacombs of Kourend. They are currently the only monster to drop the blue d'hide body (an element rarely required for medium and hard emote tracks). Like all brutal dragons, they use melee, magic and long-range dragon fire. Using both Protect from Magic and Antifire potion will completely protect players from injury if players are not in melee knowledge. Location[edit | edit source] Drops[edit | edit source] Drop rates estimated based on 28,937 kills from the Drop Rate Project, unless otherwise stated. The average Brutal blue dragon kill is worth 10,328.86. Del Get there and return. Blue dragons are to the right of the entrance. Navigate obstacle pipes with 70 agility to reach them. This guide assumes 100 kills per hour. Your profit per hour may vary depending on your speed. Blue dragons always drop dragon bones and blue dragonhide (along with other chance drops), which sell for 2,713 and 1,755 respectively. This makes each kill worth 4,468 coins. Players who have completed Dragon Slayer II may prefer to kill blue dragons in the Myths' Guild basement as they are much closer to a bank along with easy access with the mythical cape teleport. Dragons can be attacked safely and effectively with Ranged (level 70+ recommended) or Magic (Fire Bolt or Fire Blast recommended). To engage the dragons with Melee, 90 Combat or higher is recommended. Each trip will require a few minutes to bank hides and bones and return to Taverley Dungeon if kill them there. The best method of banking is to teleport to Falador using a Falador teleport tablet, bank on the Falador West Bank, and return to the dungeon; Use the shortcut in the western wall of the city (west of falador west bank bank) and drive northwest to the dungeon entrance. With 70 Agility, the agility shortcut to the blue dragon area can be used and it only takes a few minutes to run from the Falador West Bank to this area of the dungeon. The shortcut can be used at 65 Agility, but will require the use of Summer pies to increase to 70 Agility. It is recommended to have at least 65 Agility to use the pipe shortcut. It is very time consuming to run around the dungeon and will require the player to bring the dusty key, which will greatly reduce kills per hour. Kills per hour can be maximized by picking up drops in rotation as it takes a second or two for each dragon drops to appear after being killed. Players could also use the imp-in-a-box to extend the length of their trips. Each imp will bank two entries. The resulting magic boxes should be dropped as they are worth significantly less than dragon bones and blue dragonhides. However, it should be noted that imp-in-boxes are unworkable and should only be used by players who have a surplus of them as a result of training Hunter. It is ineffective to collect imp-in-a-box in order to kill blue dragons in order to make money.
